## **BIO 235 EXAM 2 EXAM STUDY SHEET 2026** **ACTUAL EXAM QUESTIONS WITH** **SOLUTIONS.**

- What is the maximum recombination frequency between two genes and why? Answer: The maximum recombination frequency observed will be 50%, as the higher the recombination frequency, the more double crossover events will occur due to the distance between the genes. This means past a certain point, there will be many crossover events that are detected, underestimating the recombination frequency.
- If two genes are showing recombination 15% of the time they are \_\_\_\_\_. If two genes show a recombination frequency of 50% they are \_\_\_\_\_. Answer: linked, un-linked
- If two genes are linked they are: Answer: close to each other on the same chromosome
- When genes are linked, are the parental or recombinant classes higher in proportion in the F2 test cross offspring? Answer: parental
- Two genes with a map distance of 15.5 map units between them indicates that: Answer: 1) the genes are close to each other on the same chromosome

## Exam Adobe AD0-E725 Simulator - Relevant AD0-E725 Answers

We consider the actual situation of the test-takers and provide them with high-quality learning materials at a reasonable price. Choose the AD0-E725 test guide absolutely excellent quality and reasonable price, because the more times the user buys the AD0-E725 test guide, the more discounts he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the AD0-E725 learning questions, our staff will help solve them as soon as possible.

### Adobe Commerce Developer Expert Sample Questions (Q45-Q50):

#### NEW QUESTION # 45

A Developer is notified that custom API results are not cached, which is causing additional delays. What are two potential causes for this behavior? (Choose two.)

- A. The request is using HTTP GET.
- B. The request is using HTTP POST.**
- C. The request is using HTTP PUT.**
- D. The request is using HTTP HEAD.

**Answer: B,C**

Explanation:

Adobe Commerce API caching (including GraphQL and REST) works only for idempotent requests such as HTTP GET. C (POST) and D (PUT) are not cacheable because they are used for creating or updating resources.

A (GET) is cacheable.

B (HEAD) is technically idempotent, but not commonly used in Adobe Commerce APIs.

HTTP/1.1 RFC 7231 - Cacheable methods

#### NEW QUESTION # 46

An Adobe Commerce Expert is tasked with implementing a custom condition on salable quantity with reservations. The condition needs to be applicable only when added to cart.

Which option should the Developer implement?

- A. <preference for="Magento\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC type="Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsCo

/>

- B. <virtualType name="IsProductSalableForRequestedQtyConditionChainOnAddToCart">  
<arguments>  
<argument name="conditions" xsi:type="array">  
<item name="is\_salable\_with\_reservations" xsi:type="array">  
<item name="object" xsi:type="object">  
>Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC  
</item>  
</item>  
</argument>  
</arguments>  
</virtualType>
- C. <type name="Magento\InventoryApi\Model\Stock\ValidatorChain">  
<arguments>  
<argument name="validators" xsi:type="array">  
<item name="is\_salable\_with\_reservations" xsi:type="object">  
>Vendor\InventorySales\Model\Stock\Validator\IsSalableWithReservationsValidator</item>  
</argument>  
</arguments>  
</type>

**Answer: B**

Explanation:

To add a custom salable quantity condition for use only during the add-to-cart flow, developers must extend the IsProductSalableForRequestedQtyConditionChainOnAddToCart virtual type. This chain is designed specifically for cart validation, ensuring the new condition runs only at that stage.

A would override the core class completely, not scoped to add-to-cart.

B relates to stock validator chains, not salable quantity conditions.

C is correct: defining a virtual type extension ensures proper conditional logic for reservations during cart validation.

**NEW QUESTION # 47**

An Adobe Commerce Developer is tasked to frequently send data to a third-party API. The API utilizes a JSON Web Token (JWT) that expires every hour. The developer decides to store the JWT in a custom cache.

Which step should the Developer take to implement this new custom cache type correctly?

- A. Define the custom cache type in the di.xml, ensuring the cache model implements CacheInterface.
- B. Define the custom cache type directly in system.xml at the website level.
- C. Define the custom cache type in cache.xml with a unique name and instance.

**Answer: C**

**NEW QUESTION # 48**

A Developer discovers that inline scripts are no longer working. This issue occurred after upgrading to the latest version of Adobe Commerce. When checking the console, the errors indicate that the scripts are not allowed to execute. The following is an example script:

<div id="action-div" onclick="someComponent('title')>Action</div>

How should the Developer adapt the script to run properly according to security practices?

- A. <?php echo \$block->renderAllowedElement('<div id="action-div" onclick="someComponent("title")>Action</div>'); ?>
- B. <?php echo \$secureRenderer->renderEventListenerAsTag('onclick', 'someComponent("title")', '#action- div'); ?>
- C. <?php echo \$escaper->renderSecureTag('<div id="action-div" onclick="someComponent("title")>Action</div>'); ?>

**Answer: B**

## NEW QUESTION # 49

An Adobe Commerce Expert is tasked with configuring different pricing for products across multi-site installation. Each website requires independent control of its prices while using the same catalog data.

What is the minimum store hierarchy structure required to achieve this?

- A. Multiple stores and a single store view for each store
- B. One website, one store, and multiple store views
- C. Multiple websites, each with one store and at least one store view

**Answer: C**

## NEW QUESTION # 50
