C-S4CPB-2502 test dumps & C-S4CPB-2502 pass rate & C-S4CPB-2502 Test king

Many job-hunters want to gain the competition advantages and become the hottest people which the companies rush to get. But if they want to realize that they must boost some valuable C-S4CPB-2502 certificate to raise their values and positions. The C-S4CPB-2502 certificate enjoys a high reputation among the labor market circle and is widely recognized as the proof of excellent talents and if you are one of them and you want to pass the test smoothly you can choose our C-S4CPB-2502 Practice Questions.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q13-Q18):

NEW QUESTION # 13

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Communication arrangement
- B. Communication system
- C. Communication API
- D. Communication interface

Answer: A,B

Explanation:

When you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition, you must create a communication system and a communication arrangement.

A communication system represents the communication partner within a communication, such as the system that calls or provides services. A communication arrangement defines the settings for a specific communication scenario, such as the authentication method, the communication user, and the service URL.

You can use the Communication Systems app and the Communication Arrangements app to create and manage these objects in the SAP Fiori launchpad. References = Setting up Communication Management - SAP Learning, Setting up SAP Best Practices Integrations - SAP Learning, Setting Up Integrations in SAP S/4HANA Cloud Public Edition

NEW QUESTION # 14

In which application can you see the available business context capacity remaining for extension items?

- A. Extensibility Cockpit app
- B. Extensibility Inventory app
- C. Extensibility Explorer app
- D. Custom Reusable Elements app

Answer: A

Explanation:

The Extensibility Cockpit app within SAP S/4HANA Cloud Public Edition is a central tool for managing and monitoring the extensibility aspects of the system. It provides an overview of the extension items created, including custom fields, custom business objects, and other extension elements. Importantly, it also shows the available business context capacity remaining for these extension items, which is crucial for ensuring that the system's extensibility is managed within the provided limits. This helps in

planning and managing customizations effectively, ensuring that the system remains scalable and performant.

NEW QUESTION # 15

To which partner role does the IT Contact first assign access permission for SAP Cloud ALM?

- A. Lead configuration expert
- B. Communication contact
- C. LoB configuration expert
- **D. Project manager**

Answer: D

Explanation:

The IT Contact is the person who receives the welcome email from SAP and is responsible for setting up the initial access to SAP Cloud ALM. The IT Contact needs to eventually provide all project team members access to SAP Cloud ALM, but it's most important the partner and customer project managers are given access first, because they are responsible for setting up the implementation project and assigning tasks to the other project team members¹. The project manager is a partner role that has the authorization to create and manage projects in SAP Cloud ALM². References = Setting up the Implementation Project in SAP Cloud ALM, Teams, Roles, and Access Restrictions | SAP Help Portal In the context of SAP Cloud ALM (Application Lifecycle Management), the IT Contact is typically responsible for the initial setup and assignment of roles within the project. The first role to which the IT Contact often assigns access permission is:

* Project manager: The project manager plays a crucial role in overseeing the SAP project's planning, execution, and completion. By assigning access permission to the project manager first, the IT Contact ensures that the project manager has the necessary tools and insights to manage the project effectively within SAP Cloud ALM. This access allows the project manager to monitor project progress, manage resources, and make informed decisions, facilitating successful project execution and alignment with business goals.

Granting the project manager access to SAP Cloud ALM is a strategic decision that empowers them to lead the project efficiently, leveraging the platform's capabilities for project management, monitoring, and collaboration.

NEW QUESTION # 16

In which type of extensibility is the SAP Business Technology Platform used to host a custom extension?

- **A. Side-by-side extensibility**
- B. Key user extensibility
- C. Classic extensibility
- D. Developer extensibility

Answer: A

Explanation:

Side-by-side extensibility is the type of extensibility where the SAP Business Technology Platform is used to host a custom extension and integrate it with the SAP S/4HANA Cloud system. Side-by-side extensibility enables customers and partners to build extensions that are decoupled from the core SAP S/4HANA Cloud system, ensuring lifecycle stability and avoiding modification of SAP code. Side-by-side extensibility leverages the capabilities of the SAP Business Technology Platform, such as SAP Cloud Platform Workflow Services, SAP Cloud Platform Business Rules, SAP Cloud Platform Integration, and SAP Cloud Platform Extension Factory. References = Utilizing the Clean Core Strategy and Extensibility Tools; Using Side-by-Side Extensibility with SAP Business Technology Platform

NEW QUESTION # 17

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Maintain technical catalogs
- **B. Assign business catalogs to a business role**
- C. Assign PFCG profiles to a business role
- **D. Maintain restrictions**

Answer: B,D

You can complete the following activities in the Maintain Business Roles SAP Fiori app:

* **Maintain restrictions.** Restrictions are rules that limit the access of a business role to certain data or functions based on predefined criteria, such as company code, plant, or sales organization. You can maintain restrictions for a business role in a new UI that provides an overview of the restriction types and values².

* Maintain technical catalogs. Technical catalogs are collections of SAP Fiori apps that are grouped by technical criteria, such as application component or OData service. Technical catalogs are not assigned to business roles, but rather to business catalogs as dependencies³.

= Maintain Business Roles; Maintain Business Roles and Business Users; Maintain Business Roles - New (Preview); Maintain Business Catalogs
