

305-300 Sample Exam - Reliable 305-300 Test Topics

DOWNLOAD the newest Prep4pass 305-300 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1Ucv5Qv9pAFh70ZCrPsYKYGhJwLFyqpX>

Now I want to introduce the online version of our 305-300 learning guide to you. The most advantage of the online version is that this version can support all electronic equipment. If you choose the online version of our 305-300 study materials, you can use our products by your any electronic equipment including computer, telephone, IPAD and so on. We believe the online version of our 305-300 practice quiz will be very convenient for you.

Now, do you want to enjoy all these Lpi 305-300 Exam benefits? Looking for a simple and quick way to pass the LPIC-3 Exam 305: Virtualization and Containerization (305-300) exam? If your answer is yes then you do not need to worry about it. Just visit the "Prep4pass" exam questions and download "Prep4pass" exam questions and start preparation right now.

Reliable 305-300 Test Topics - 305-300 Exam Certification

It is widely accepted that where there is a will, there is a way; so to speak, a man who has a settled purpose will surely succeed. To obtain the 305-300 certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the 305-300 Exam, you need more external assistance to help yourself. With our 305-300 exam questions, you will not only get aid to gain your dreaming certification, but also you can enjoy the first-class service online.

Lpi LPIC-3 Exam 305: Virtualization and Containerization Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which file in a group directory contains the list of processes belonging to this group?

- A. procs
- B. casks
- C. subjects
- D. pids
- E. members

Answer: A

NEW QUESTION # 40

Which of the following are container orchestration platforms?

- A. Docker Swarm
- B. Kubernetes
- C. Docker Compose

- D. LXC

Answer: A,B

Explanation:

Container orchestration platforms are responsible for deploying, scaling, networking, and managing containerized applications across multiple hosts. According to containerization documentation, Docker Swarm and Kubernetes are recognized container orchestration platforms.

Docker Swarm is Docker's native orchestration solution, providing clustering, service discovery, load balancing, and rolling updates. Kubernetes is the industry-standard orchestration platform, offering advanced scheduling, self-healing, horizontal scaling, and declarative configuration.

Docker Compose is not considered a full orchestration platform; it is primarily designed for defining and running multi-container applications on a single host, mainly for development and testing. LXC is a container runtime and system container technology, not an orchestration framework.

Container documentation clearly distinguishes orchestration platforms from runtimes and local development tools. Therefore, the correct answers are B and D.

NEW QUESTION # 41

Which of the following statements about the command `lxc-checkpoint` is correct?

- A. It creates a container image based on an existing container.
- **B. It writes the status of the container to a file.**
- C. It creates a clone of a container.
- D. It doubles the memory consumption of the container.
- E. It only works on stopped containers.

Answer: B

Explanation:

Explanation

The command `lxc-checkpoint` is used to checkpoint and restore containers. Checkpointing a container means saving the state of the container, including its memory, processes, file descriptors, and network connections, to a file or a directory. Restoring a container means resuming the container from the saved state, as if it was never stopped. Checkpointing and restoring containers can be useful for various purposes, such as live migration, backup, debugging, or snapshotting. The command `lxc-checkpoint` has the following syntax:

```
lxc-checkpoint {-n name} {-D path} [-r] [-s] [-v] [-d] [-F]
```

The options are:

- * `-n name`: Specify the name of the container to checkpoint or restore.
- * `-D path`: Specify the path to the file or directory where the checkpoint data is dumped or restored.
- * `-r, --restore`: Restore the checkpoint for the container, instead of dumping it. This option is incompatible with `-s`.
- * `-s, --stop`: Optionally stop the container after dumping. This option is incompatible with `-r`.
- * `-v, --verbose`: Enable verbose CRIU logging. Only available when providing `-r`.
- * `-d, --daemon`: Restore the container in the background (this is the default). Only available when providing `-r`.
- * `-F, --foreground`: Restore the container in the foreground. Only available when providing `-r`.

The command `lxc-checkpoint` uses the CRIU (Checkpoint/Restore In Userspace) tool to perform the checkpoint and restore operations. CRIU is a software that can freeze a running application (or part of it) and checkpoint it to a hard drive as a collection of files. It can then use the files to restore and run the application from the point it was frozen at.

The other statements about the command `lxc-checkpoint` are not correct. It does not create a clone or an image of a container, nor does it double the memory consumption of the container. It can work on both running and stopped containers, depending on the options provided. References:

- * Linux Containers - LXC - Manpages - `lxc-checkpoint.12`
- * `lxc-checkpoint(1)` - Linux manual page - man7.org
- * CRIU4

NEW QUESTION # 42

What is true about `containerd`?

- A. It runs in each Docker container and provides DHCP client functionality
- B. It is the initial process run at the start of any Docker container.

- C. It requires the Docker engine and Docker CLI to be installed.
- D. It is a text file format defining the build process of containers.
- E. It uses **rune to start containers on a container host.**

Answer: E

Explanation:

Explanation

Containerd is an industry-standard container runtime that uses Runc (a low-level container runtime) by default, but can be configured to use others as well. Containerd manages the complete container lifecycle of its host system, from image transfer and storage to container execution and supervision. It supports the standards established by the Open Container Initiative (OCI). Containerd does not require the Docker engine and Docker CLI to be installed, as it can be used independently or with other container platforms. Containerd is not a text file format, nor does it run in each Docker container or provide DHCP client functionality. Containerd is not the initial process run at the start of any Docker container, as that is the role of the container runtime, such as Runc. References: 1 (search for "containerd"), 2 (search for "Containerd is an open source"), 3 (search for "It uses rune to start containers").

NEW QUESTION # 43

Which of the following types of guest systems does Xen support? (Choose two.)

- A. Emulated guests
- B. **Paravirtualized guests (PVI)**
- C. Container virtualized guests
- D. **Fully virtualized guests**
- E. Foreign architecture guests (FA)

Answer: B,D

NEW QUESTION # 44

.....

Lpi 305-300 certifications are thought to be the best way to get good jobs in the high-demanding market. There is a large range of 305-300 certifications that can help you improve your professional worth and make your dreams come true. Our LPIC-3 Exam 305: Virtualization and Containerization 305-300 Certification Practice materials provide you with a wonderful opportunity to get your dream certification with confidence and ensure your success by your first attempt.

Reliable 305-300 Test Topics: https://www.prep4pass.com/305-300_exam-braindumps.html

305-300 exam practice materials would maximally lighten your hesitation and help you make the decision as soon as possible, Lpi 305-300 Sample Exam With customizable exams and a real exam environment, our practice tests are the perfect way to prepare for the test pressure you will face during the final exam, So the reviews and comments about 305-300 dumps torrent on the feedback are real and valid.

Multiple and awesome which have very good material for exams, There searching 305-300 related to sorting is a surprising amount of interplay between both chapters, with strong analogies tying the topics together.

2026 305-300 Sample Exam | Professional Reliable 305-300 Test Topics: LPIC-3 Exam 305: Virtualization and Containerization 100% Pass

305-300 Exam Practice materials would maximally lighten your hesitation and help you make the decision as soon as possible, With customizable exams and a real exam environment, our practice 305-300 Sample Exam tests are the perfect way to prepare for the test pressure you will face during the final exam.

So the reviews and comments about 305-300 dumps torrent on the feedback are real and valid, For example, you will enjoy free renewal for one year, which means that you can enjoy the best 305-300 actual test material.

Good choice will make you get double results with half efforts.
