220-1201 Study Guide Pdf, Testking 220-1201 Exam Questions

The 220-1201 study materials of our company is the study tool which best suits these people who long to pass the exam and get the related certification. So we want to tell you that it is high time for you to buy and use our 220-1201 Study Materials carefully. Now

we are glad to introduce the study materials from our company to you in detail in order to let you understanding our study products.

CompTIA A+ Core 1 Exam (2026) Sample Questions (Q167-Q172):

NEW QUESTION # 167

A user connects a company-issued laptop to a 4K TV but can only get 1080p resolution on the TV. The technician confirms that the laptop is capable of producing a 4K output. Which of the following is the most likely cause of the issue?

- A. The CPU cannot keep up with the transcoding
- B. The laptop firmware is not current
- C. The TV firmware is out of date
- **D. The HDMI cable version is incorrect**

Answer: D

Explanation:

An older HDMI cable version may not support 4K resolution. For 4K output, both the device and the cable must support HDMI 2.0 or higher.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.1 - Display troubleshooting:

"Ensure the correct version of HDMI cable is used for high-resolution outputs like 4K. Older cables may be limited to 1080p."

* CompTIA Exam Objectives 220-1101, Domain 3.1

NEW QUESTION # 168

Which of the following statements best summarize managed vs unmanaged switches? (Select two).

- **A. Unmanaged switches start working as soon as they are plugged in to the network**
- B. Unmanaged switches have more security capabilities
- C. Managed switches consume less power
- D. Managed switches require no configuration
- E. Unmanaged switches are generally more expensive
- **F. Managed switches have more features**

Answer: A,F

Explanation:

Unmanaged switches require no configuration they simply need to be plugged in and start working immediately, making them ideal for simple network setups.

Managed switches provide advanced features such as VLANs, SNMP monitoring, port security, and traffic management, but require configuration.

From CompTIA A+ 220-1101 Official Study Guide, Objective 2.2 - Compare and contrast common networking hardware:

"Unmanaged switches operate out of the box with no configuration and are designed for simple connectivity.

Managed switches allow for configuration, monitoring, and management of network traffic and security." Verified Source:

NEW QUESTION # 169

A human resources department uses a network shared with other departments to produce a variety of printed resources for legal retention. The human resources department only wants its members to have access to these materials. Which of the following should the technician implement?

- A. Print server
- B. Audit logs
- C. Time-of-day access
- **D. Security groups**

Answer: D

Explanation:

Security groups are used to manage access permissions to network resources, ensuring only authorized HR department members can access the shared materials.

Why Not B (Audit logs): Audit logs monitor activity but do not restrict access.

Why Not C (Time-of-day access): Time-of-day access limits when users can access resources but doesn't specify user permissions.

Why Not D (Print server): A print server manages print jobs but does not control file access.

CompTIA A+ Exam Reference: Core 2 (220-1102), Section 2.5, access control and permissions.

NEW QUESTION # 170

Which of the following internet connection types is primarily used for high-speed internet access in rural areas where traditional broadband services are unavailable?

- A. Satellite
- B. DSL
- C. Cable
- D. Fiber

Answer: A

Explanation:

Satellite internet is primarily used for high-speed access in rural and remote areas where traditional wired services (fiber, cable, and DSL) are unavailable because it does not require physical ground-based infrastructure. It works by transmitting data between a dish at the user's location and orbiting satellites, making it accessible in geographically isolated regions.

NEW QUESTION # 171

A technician wants to upgrade a computer to a new Windows version. The Windows Upgrade Advisor states that the computer is not compatible with the new Windows version due to a lack of TPM 2.0 support.

Which of the following should the technician do next?

- A. Install an HSM in the computer.
- B. Perform a clean Install of the new Windows version.
- C. Implement BitLocker on the computer.
- D. Enable the module in the UEFI BIOS.

Answer: D

Explanation:

TPM 2.0 (Trusted Platform Module) is often disabled by default in the UEFI BIOS. Enabling it is necessary to meet the requirements for certain Windows installations, including Windows 11.

NEW QUESTION # 172

.....

If you don't want to waste much time on preparing for your exam, CompTIA 220-1201 exam braindumps files will be a shortcut for you. Good exam materials make you twice the result with half the effort. Our CompTIA 220-1201 exam braindumps cover many questions and answers of the real test so that you can be familiar with the real test question.
