Alibaba Cloud Certified Expert - Solutions Architect (SAE-C01) Sample Questions (Q106-Q111):

NEW QUESTION # 106
A company stores data in OSS buckets. According to the company's security policy, static data must be encrypted at rest. Which of the following methods can meet this requirement?
An e-commerce platform, implementing a highavailability architecture, uses an Alibaba Cloud Server Load Balancer (SLB) instance to connect user terminals to its applications. Users note login states not being updated after logging in and items disappearing from shopping carts. Addressing this issue revolves around the management of user sessions and persistence.

Which solutions can resolve issues such as session inconsistency and cleared shopping cart items?
(Choose three)
Response:

- A. Enable session persistence for SLB instances, ensuring user requests maintain session continuity with backend processing servers. Upload an object and specify a server-side encryption method for the object.
