

# Quiz 2026 Cisco Accurate 800-150: Supporting Cisco Devices for Field Technicians Valid Test Sims

BTW, DOWNLOAD part of Dumps4PDF 800-150 dumps from Cloud Storage: <https://drive.google.com/open?id=1wwO8vPXcsdtD-9BAwe50JyQuoqSSmHSE>

The marketplace is competitive, especially for securing a well-paid job. Moving your career one step ahead with 800-150 certification will be a necessary and important thing. How to get the 800-150 exam dumps with 100% pass is also important. Cisco 800-150 training topics will ensure you pass at first time. The experts who involved in the edition of 800-150 questions & answers all have rich hands-on experience, which guarantee you the high quality and high pass rate.

Even though our 800-150 training materials have received quick sale all around the world, in order to help as many candidates for the exam as possible to pass the exam and get the related certification at their first try, we still keep the most favorable price for our best 800-150 test prep. In addition, if you keep a close eye on our website you will find that we will provide discount in some important festivals, we can assure you that you can use the least amount of money to buy the best product in here. We aim at providing the best 800-150 Exam Engine for our customers and at trying our best to get your satisfaction.

## Cisco 800-150 Discount & 800-150 Latest Test Format

In the 21 Century, the 800-150 certification became more and more recognized in the society because it represented the certain ability of examinees. However, in order to obtain 800-150 certification, you have to spend a lot of time preparing for the 800-150 Exam. Many people gave up because of all kinds of difficulties before the examination, and finally lost the opportunity to enhance their self-worth. As a thriving multinational company, we are always committed to solving this problem.

## Cisco 800-150 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Networking Foundations:</b> This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP</li> <li>• IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Cisco Hardware Replacement:</b> This section of the exam measures the skills of a Technical Support Engineer and teaches how to safely and correctly replace Cisco hardware. It explains safety procedures such as creating safe work zones and handling electrostatic discharge. Students learn the step-by-step processes to replace a wide range of Cisco devices, from switches and routers to firewalls, UCS servers, and collaboration endpoints. It also covers configuring Cisco NX-OS software, including understanding operating modes, boot procedures, and password recovery, and introduces Cisco collaboration endpoint solutions like IP phones and video systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Cisco Software:</b> This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.</li> </ul>

## Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q35-Q40):

### NEW QUESTION # 35

When should a crossover UTP cable be used instead of a straight-through cable when connecting network devices?

- A. To connect electrically unlike devices
- **B. To connect electrically like devices**
- C. To connect a switch to a router
- D. To connect a PC to a wireless access point

**Answer: B**

Explanation:

Acrossover UTP (Unshielded Twisted Pair) cableis used to connect two similar devices directly. This includes:

- \* Switch to switch
- \* Router to router
- \* PC to PC

The crossover cable reverses the transmit and receive pairs, allowing for proper communication between like devices without the need for an intermediary device.

Conversely, astraight-through cableis used to connect dissimilar devices, such as:

- \* PC to switch
- \* Router to switch
- \* PC to router

This cable maintains the same wiring on both ends, suitable for connecting different types of devices.

Therefore, when connecting electrically like devices, a crossover cable is appropriate.

### NEW QUESTION # 36

Which scenario would result in a speed mismatch when configuring Ethernet devices with different speed settings?

- A. Both ends are manually set to thesame speed
- **B. Both ends are set to auto-negotiation and fail, reverting to their lowest speeds**

- C. One end is manually set to 1 Gbps, and the other end is manually set to 100 Mbps
- D. One end is manually set to 100 Mbps, and the other end is set to auto-negotiation

**Answer: C**

Explanation:

A speed mismatch occurs when two connected Ethernet devices are configured to operate at different speeds.

In scenario A, one device is manually set to 1 Gbps, while the other is set to 100 Mbps. Since both ends are hard-coded to different speeds, they cannot successfully negotiate a common speed, leading to a mismatch and resulting in a failed or unstable link.

In contrast, scenario B, where both ends are manually set to the same speed, ensures compatibility and stable communication.

Scenario C can lead to a duplex mismatch rather than a speed mismatch; the auto-negotiating end may default to half-duplex if it cannot determine the duplex setting of the manually configured end.

Scenario D is less common; if auto-negotiation fails, devices may revert to their lowest common speed, but this typically results in reduced performance rather than a complete mismatch.

### NEW QUESTION # 37

Refer to the exhibit. Which CLI show command identifies the serial number on a router?

- A. show platform
- B. show inventory
- C. show idprom
- D. show version

**Answer: B**

Explanation:

The show inventory command is used on Cisco devices to display detailed information about the hardware components installed, including:

\* Product Identifier (PID)

\* Version Identifier (VID)

\* Serial Number (SN)

\* Description of the component

In the exhibit, the output clearly shows:

NAME: "Chassis", DESCR: "Cisco ISR4451-X/K9"

PID:ISR4451-X/K9, VID: V01, SN: FCW2134L0SH

This confirms that show inventory is the correct command to retrieve the serial number and hardware inventory details.

\* show version provides some system information and sometimes includes serial numbers, but it's not as reliable or detailed for component-level hardware info.

\* show idprom is not commonly used and not supported on all platforms.

\* show platform provides platform-specific info but not typically the serial number.

### NEW QUESTION # 38

Which command is used to download a copied configuration file from a TFTP server to merge it with the running configuration of a replacement Cisco device?

- A. merge tftp: running-config
- B. copy tftp: startup-config
- C. copy tftp: running-config
- D. load tftp: running-config

**Answer: C**

Explanation:

The command copy tftp: running-config is used to retrieve a configuration file from a TFTP server and merge it with the current running configuration of a Cisco device. This operation is additive, meaning it integrates the new configuration commands into the existing running configuration without removing any pre-existing commands unless explicitly overridden.

This method is particularly useful when restoring configurations to a replacement device, as it allows for the seamless integration of

necessary settings without disrupting the current operational state.

In contrast, using `copy tftp: startup-config` would overwrite the startup configuration file, which could lead to unintended consequences upon the next device reload. The options `load tftp: running-config` and `merge tftp: running-config` are not valid Cisco IOS commands.

### NEW QUESTION # 39

Drag and drop the safety actions that must be taken prior to beginning work into order on the right for working with electrical equipment.

**Answer:**

Explanation:

Explanation:

In the FLDTEC course, under Safety and ESD Procedures, Cisco outlines the following safety workflow before working on any network hardware:

- \* Locate Emergency Power-Off Switch: Identifying how to cut power quickly is essential in case of an electrical fault or emergency.
- \* Disconnect Power: Always ensure the power source is turned off and disconnected before handling any components.
- \* Verify with Multimeter: Use a multimeter to confirm that no voltage is present before proceeding.
- \* Connect ESD Strap: Once confirmed safe, attach your ESD strap to a grounded point to prevent electrostatic damage to sensitive components.

Following this process is critical not only for personal safety but also for equipment protection, especially during hardware installation, maintenance, or RMA replacements.

### NEW QUESTION # 40

.....

As the development of the science and technologies, there are a lot of changes coming up with the design of our 800-150 exam questions. We are applying new technology to perfect the 800-150 study materials. Through our test, the performance of our 800-150 learning guide becomes better than before. In a word, our 800-150 training braindumps will move with the times. Please pay great attention to our 800-150 actual exam.
