Demo Version and Oracle 1Z0-182 Free Questions Updates for Up to 12 Months
Everyone has their roles in society, and they are busy with their jobs and family. So the time and energy are very precious for the preparation of 1Z0-182 actual test. While, now you are lucky. 1Z0-182 cert guide will give you some instructions and help you do study plan for your coming test. If you are a fresh men in this industry, do not worry, Oracle 1Z0-182 PDF training will help you. The questions and knowledge points are very simple and easy to get. You can download the 1Z0-182 test engine and install it on your phone. When you take the subway, you can open it and do test practice. To take full use of the spare time by 1Z0-182 test engine, you will enjoy a high efficiency study experience.

The modern Oracle world is changing its dynamics at a fast pace. To stay updated and competitive you have to learn these technological changes. With the one Oracle Database 23ai Administration Associate (1Z0-182) certification exam you can do this easily. The Oracle Database 23ai Administration Associate (1Z0-182) certification exam offers a unique and quick way to learn new in-demand expertise and enhance your knowledge.

Reliable 1Z0-182 Test Camp | 1Z0-182 Examcollection Dumps

PDFBraindumps provides you with the best preparation material. What makes PDFBraindumps 1Z0-182 brain dumps the first choice for their exam preparation is obviously its superior content that beats its competitors in quality and usefulness. PDFBraindumps currently has a clientele of more than 60,000 satisfied customers all over the world. This is factual proof of the incomparable quality of our products. The way our brain dumps introduce you the syllabus contents of 1Z0-182 Exam increases your confidence to perform well in the actual exam paper.

Oracle Database 23ai Administration Associate Sample Questions (Q32-Q37):

NEW QUESTION # 32

You execute this command: [oracle@host01 ~]$ expdp system/oracle FULL=Y DUMPFILE=exp_db_full.dmp PARALLEL=4 LOGFILE=exp_db_full.log JOB_NAME=exp_db_full. During the export operation, you detach from the job by using CTRL+C and then execute this command: Export> STOP_JOB=IMMEDIATE. Are you sure you wish to stop the job ([yes]/no): yes. Which two statements are true about the job?

- A. You cannot monitor it.
- B. It continues to run in the background.
- C. You can reattach to it and monitor it.
- D. It terminates.

Answer: C,D

Explanation:
A .False. STOP_JOB=IMMEDIATE halts the job, not backgrounds it.
B .False. You can monitor before stopping or after restarting.
C .True. Before stopping, you can reattach with expdp attach=exp_db_full.
D .True. STOP_JOB=IMMEDIATE terminates the job instantly.

NEW QUESTION # 33
In the SPFILE of a single instance database, LOCAL_LISTENER is set to LISTENER_1. The TNSNAMES.ORA file in $ORACLE_HOME/network/admin in the database home contains: LISTENER_1 = (ADDRESS = (PROTOCOL = TCP)(HOST = host1.abc.com)(PORT = 1521)). Which statement is true?

- A. Dynamic service registration cannot be used for this database instance.
- B. The definition for LISTENER_1 requires a CONNECT_DATA section to enable dynamic service registration.
- C. LISTENER_1 must also be defined in the LISTENER.ORA file to enable dynamic service registration.
- D. There are two listeners named LISTENER and LISTENER_1 running simultaneously using port 1521 on the same host as the database in LISTENERS.
- E. The LREG process registers services dynamically with the LISTENER_1 listener.

Answer: E

Explanation:
Dynamic service registration allows a database to automatically register its services with a listener without manual configuration in LISTENER.ORA. Let's analyze each option:
A . The definition for LISTENER_1 requires a CONNECT_DATA section to enable dynamic service registration.
False. The CONNECT_DATA section is part of a client-side TNSNAMES.ORA entry for connecting to a service, not for listener registration. Dynamic registration is handled by the database's LREG (Listener Registration) process, which uses the LOCAL_LISTENER parameter to locate the listener's address (e.g., host1.abc.com:1521). No CONNECT_DATA is needed in the listener address definition itself. This option confuses client connection syntax with listener configuration.
Mechanics:The listener address in TNSNAMES.ORA (LISTENER_1) is sufficient for LREG to find and register with it, as long as the listener is running at that address.
B . LISTENER_1 must also be defined in the LISTENER.ORA file to enable dynamic service registration.
False. Dynamic registration doesn't require the listener to be explicitly defined in LISTENER.ORA. The LOCAL_LISTENER parameter pointing to LISTENER_1 (resolved via TNSNAMES.ORA) tells LREG where to register services. If the listener is running on host1.abc.com:1521, LREG will find it without a LISTENER.ORA entry. However, LISTENER.ORA is needed tostartthe listener process, but that's separate from dynamic registration.
Practical Note:If LISTENER.ORA isn't configured, a default listener might run on port 1521, but the question implies LISTENER_1 is operational.
C . The LREG process registers services dynamically with the LISTENER_1 listener.
True. In Oracle 23ai, the LREG background process (replacing PMON's registration role in earlier versions) dynamically registers database services with listeners specified by LOCAL_LISTENER. Here, LOCAL_LISTENER=LISTENER_1 resolves to host1.abc.com:1521 via TNSNAMES.ORA. LREG periodically sends service information (e.g., service names, instance details) to the listener, enabling clients to connect without static configuration.
Mechanics:LREG uses the TNS alias (LISTENER_1) to locate the listener's IP and port, registers services like orcl or orclpdb, and updates the listener's service table. This happens automatically every 60 seconds or on significant events (e.g., instance startup).
D . Dynamic service registration cannot be used for this database instance.
False. The setup (LOCAL_LISTENER set and a valid TNSNAMES.ORA entry) explicitly supports dynamic registration. No blockers (e.g., REGISTRATION_EXCLUDED_LISTENERS) are mentioned, so LREG can function normally.
E . There are two listeners named LISTENER and LISTENER_1 running simultaneously using port 1521 on the same host as the

database in LISTENERS.
False. The question mentions only LISTENER_1 in the SPFILE and TNSNAMES.ORA. There's no evidence of a second listener (LISTENER) or a LISTENERS configuration (possibly a typo). Two listeners can't share the same port (1521) on the same host due to port conflicts unless explicitly configured with different IPs, which isn't indicated here.

NEW QUESTION # 34

In which two ways would you disable timing information collected for wait events and much of the performance monitoring capability of the database?

- A. By executing the PL/SQL procedure DBMS_TIME_STATISTIC.DISABLE(TRUE).
- B. By executing the PL/SQL procedure DBMS_TIME_STATISTIC.LEVEL(BASIC).
- C. By setting the STATISTICS_LEVEL parameter to BASIC.
- D. By setting the TIMED_STATISTICS_LEVEL system parameter to FALSE.
- E. By setting the TIMED_STATISTICS system parameter to FALSE.

Answer: C,E

Explanation:
A .True. TIMED_STATISTICS = FALSE disables timing data collection.
B .False. No such procedure exists.
C .False. No TIMED_STATISTICS_LEVEL parameter exists.
D .True. STATISTICS_LEVEL = BASIC disables most performance monitoring.
E .False. No such procedure exists.

NEW QUESTION # 35

Which three statements are true about a dedicated server configuration?

- A. A dedicated server process can be spawned without a listener when using local clients.
- B. A dedicated server process communicates directly with a client or middle-tier process once the session is established.
- C. The DBA configures the maximum number of dedicated server processes that can share the samedispatcher process.
- D. Each dedicated server process has its own dispatcher process.
- E. A dedicated server process may be reused by a new session after the session using that process terminates.
- F. A dedicated server process can be spawned by the listener when using local clients.

Answer: A,B,F

Explanation:
A .False. Dispatchers are for shared servers, not dedicated.
B .False. Dedicated processes die with the session.
C .True. Direct client-server communication occurs.
D .False. No dispatchers in dedicated mode.
E .True. Listener spawns for local/remote clients.
F .True. Local logins (e.g., sqlplus /) bypass the listener.

NEW QUESTION # 36

Which two statements are true about database instances and Real Application Clusters (RAC)?

- A. A RAC database must have three or more instances.
- B. A RAC database can have one instance.
- C. Two RAC databases can share their instances.
- D. A RAC database can have instances on separate servers.
- E. A RAC database must have two or more instances.

Answer: B,D

Explanation:
A .False. RAC can run with one instance (degraded mode).
B .True. Possible, though not typical for RAC.

C .False. No minimum of three.
D .True. RAC instances run on separate nodes.
E .False. Instances are DB-specific in RAC.

NEW QUESTION # 37

......

Our company has successfully launched the new version of the 1Z0-182 study materials. Perhaps you are deeply bothered by preparing the 1Z0-182 exam. Now, you can totally feel relaxed with the assistance of our 1Z0-182 study materials. Our products are reliable and excellent. What is more, the passing rate of our 1Z0-182 Study Materials is the highest in the market. Purchasing our 1Z0-182 study materials means you have been half success. Good decision is of great significance if you want to pass the 1Z0-182 exam for the first time.

Reliable 1Z0-182 Test Camp: https://www.pdfbraindumps.com/1Z0-182_valid-braindumps.html

Oracle 1Z0-182 Accurate Answers As for appropriate price, there are two aspects involved, So you can buy our 1Z0-182 valid practice questions without any misgivings, There are a lot of sites provide the Oracle 1Z0-182 exam certification and other training materials for you, With PDFBraindumps, you do not have to spend extra because we offer up to 12 months of free Oracle 1Z0-182 valid dumps updates, These Oracle 1Z0-182 practice exams include questions that are based on a similar pattern as the finals.

Additionally, a new option is available to disable the host 1Z0-182 monitoring feature heartbeat) when doing network maintenance to avoid triggering HA when hosts become isolated.

The Leadership Challenge, As for appropriate price, there are two aspects involved, So you can buy our 1Z0-182 Valid Practice Questions without any misgivings.

Oracle 1Z0-182 Exam | 1Z0-182 Accurate Answers - 10 Years of Excellence of Reliable 1Z0-182 Test Camp

There are a lot of sites provide the Oracle 1Z0-182 exam certification and other training materials for you, With PDFBraindumps, you do not have to spend extra because we offer up to 12 months of free Oracle 1Z0-182 valid dumps updates.

These Oracle 1Z0-182 practice exams include questions that are based on a similar pattern as the finals.
