People always feel fear of the unknown thing and cannot handle themselves with a sudden change. However, our Associate-Google-Workspace-Administrator exam questions can stand by your side. And we are determined to devote ourselves to serving you with the superior Associate-Google-Workspace-Administrator Study Materials in this career. Here are some features of our Associate-Google-Workspace-Administrator learning guide in our free demos which you can free download, you can understand in detail and make a choice.

The Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) practice questions are designed by experienced and qualified Associate-Google-Workspace-Administrator exam trainers. They have the expertise, knowledge, and experience to design and maintain the top standard of Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) exam dumps. So rest assured that with the Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) exam real questions you can not only ace your Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) exam dumps preparation but also get deep insight knowledge about Google Associate-Google-Workspace-Administrator exam topics. So download Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) exam questions now and start this journey.

Associate-Google-Workspace-Administrator Latest Test Cost - Free Sample Associate-Google-Workspace-Administrator Questions

We offer you free demo for Associate-Google-Workspace-Administrator pdf dumps. You can check out the questions quality and usability of our training material before you buy. Google Associate-Google-Workspace-Administrator questions are written to the highest standards of technical accuracy with accurate answers. If you prepare for your exams using NewPassLeader Associate-Google-Workspace-Administrator practice torrent, it is easy to succeed for your certification in the first attempt. Besides, we offer the money refund policy, in case of failure, you can ask for full refund.

Google Associate Google Workspace Administrator Sample Questions (Q93-Q98):

NEW QUESTION # 93

Your organization uses live-streaming to host large Google Meet meetings. You need to limit the participation to affiliated Google Workspace domains by using the Admin console. What should you do?

- A. Add participants to an organizational unit (OU). Turn on live streaming.
- B. Turn off live streaming to Youtube.
- C. Turn on in-house live streaming. Invite users from affiliated domains.
- D. Add the Trusted Workspace domain names in the Stream dialog box.

Answer: A

Explanation:

By organizing participants into an organizational unit (OU) in the Admin console, you can control access to live streaming and ensure that only users from affiliated Google Workspace domains are allowed to participate in the live-streamed meetings. Turning on live streaming within this context will ensure that the meeting is restricted to the appropriate participants from the specified domains.

NEW QUESTION # 94

Your company recently installed a free email marketing platform from the Google Workspace Marketplace. The marketing team is unable to access customer contact information or send emails through the platform. You need to identify the cause of the problem. What should you do first?

- A. Verify that the email marketing platform's subscription is active and up-to-date.
- B. Use the security investigation tool to review Gmail logs.
- C. Check the OAuth scopes that are granted to the email marketing platform and ensure the platform has access to Contacts and Gmail.
- D. Confirm that the "Manage Third-Party App Access" setting in the Admin console is enabled.

Answer: C

Explanation:

When a third-party application from the Google Workspace Marketplace is installed, it requests specific permissions (OAuth scopes) to access Google Workspace data and services. If the marketing team is unable to access customer contact information or send emails, the most likely cause is that the installed email marketing platform was not granted the necessary OAuth scopes for Contacts and Gmail during the installation or approval process.

Here's why other options are less likely to be the first step:

A . Verify that the email marketing platform's subscription is active and up-to-date. While important for continued use, a "free" platform from the Marketplace generally doesn't have a subscription that would prevent initial access to basic functions like contacts and sending emails unless it's a trial that expired, which isn't indicated as the primary problem. This would be a later troubleshooting step if scope issues are ruled out.

C . Confirm that the "Manage Third-Party App Access" setting in the Admin console is enabled. This setting controls whether users can install any third-party apps from the Marketplace. If it were disabled, the app likely wouldn't have been installed in the first place. If it was enabled and then disabled, the app would stop working, but the specific problem points to data access, not app disablement.

D . Use the security investigation tool to review Gmail logs. The security investigation tool is excellent for reviewing security events, but it's more for post-incident analysis or suspicious activity. In this scenario, the problem is a lack of functionality for a newly installed app, not a security breach or misconfiguration that would necessarily show up in Gmail logs immediately as an access issue for the app itself. The OAuth scopes are the more direct and initial point of failure.

Reference from Google Workspace Administrator:

Manage third-party app access to data: Google Workspace administrators can control which third-party apps can access their organization's data. This includes reviewing and managing OAuth API access for configured apps.

Reference:

Understanding OAuth scopes: When an application requests access to Google data, it does so by requesting specific "scopes."

These scopes define the particular resources and operations that the application is allowed to perform. For an email marketing platform, scopes for <https://www.googleapis.com/auth/contacts> (or a more specific contact scope) and

<https://www.googleapis.com/auth/gmail.send> (or a broader Gmail scope) would be crucial.

Controlling which third-party & internal apps can access Google Workspace data: This section in the Admin console specifically allows administrators to review "Configured apps" and check their "OAuth API access." This is where you would see the scopes granted to the email marketing platform.

NEW QUESTION # 95

Your organization is increasingly concerned about its environmental impact. You want to assess the environmental impact of using Google Workspace services. Which report should you use?

- A. Carbon footprint report
- **B. Google Environmental Report**
- C. Apps Monthly Uptime report
- D. Accounts report

Answer: B

Explanation:

To assess the environmental impact of using Google Workspace services, you should refer to the Google Environmental Report. Google publishes comprehensive reports detailing its environmental efforts, including the energy efficiency of its data centers, its use of renewable energy, and its overall carbon footprint, which includes the impact of services like Google Workspace. Here's why option B is the correct choice and why the others are not relevant to assessing the overall environmental impact of using Google Workspace:

B . Google Environmental Report

Google regularly publishes detailed environmental reports that cover various aspects of its sustainability initiatives, including its progress towards using renewable energy, its efforts to improve energy efficiency in its operations (which power Google Workspace), and its overall carbon footprint. These reports provide insights into the environmental impact associated with using Google services.

Associate Google Workspace Administrator topics guides or documents reference: While there might not be a specific "Google Workspace Environmental Impact Report" as a standalone document within the Admin console, Google's overarching "Environmental Report" (often found on Google's sustainability or environmental responsibility websites) encompasses the infrastructure and practices that support all Google services, including Google Workspace. Administrators looking for this information would be directed to these publicly available Google reports.

A . Carbon footprint report

While the concept of a "carbon footprint report" is relevant to environmental impact, Google typically includes this information within its broader "Environmental Report" rather than providing a separate report specifically for Google Workspace usage within an organization's Admin console. You would likely find data related to the carbon efficiency of Google's infrastructure in their main environmental disclosures.

Associate Google Workspace Administrator topics guides or documents reference: Google's communication about its carbon footprint and environmental efforts is usually consolidated in their public sustainability reports.

C . Apps Monthly Uptime report

The Apps Monthly Uptime report provides information about the reliability and availability of Google Workspace services. It focuses on service performance and uptime metrics, not on environmental impact or sustainability.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on service-level agreements (SLAs) and service status provides information about uptime guarantees and how to monitor service availability, which is the focus of the Apps Monthly Uptime report.

D . Accounts report

The Accounts report in the Google Admin console provides details about user accounts within your organization, such as the number of active users, account status, and other user-related information. It does not contain any data or analysis related to the environmental impact of using Google Workspace services.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on reporting and user accounts describes the information available in the Accounts report, which is focused on user management and activity metrics.

Therefore, to assess the environmental impact of using Google Workspace services, your organization should refer to the publicly available Google Environmental Report, which details Google's sustainability efforts and overall environmental performance.

NEW QUESTION # 96

Your organization allows employees to use their personal mobile devices to check their work emails. You need to remove the employee's work email data from their phone when they leave the organization. What should you do?

- **A. Set up advanced mobile management on the devices.**
- B. Set up 2SV authentication on the devices.
- C. Set up data protection rules to prevent data sharing externally.
- D. Set up basic mobile management on the devices.

Answer: A

Explanation:

With advanced mobile management, you can remotely manage and wipe work-related data from personal devices when an employee leaves the organization. This includes the ability to enforce policies such as requiring a password to access the device,

remotely wiping corporate data, and managing access to work resources without affecting the personal data on the device. This solution provides the necessary tools to ensure data security and compliance.

NEW QUESTION # 97

You are applying device and user policies for employees in your organization who are in different departments. You need each department to have a different set of policies. You want to follow Google-recommended practices. What should you do?

- **A. Create a child organizational unit for each department.**
- B. Create an Access group for each department. Configure the applicable policies.
- C. Create separate top-level organizational units for each department.
- D. Add all managed users and devices in the top-level organizational unit.

Answer: A

Explanation:

Google recommends using the organizational unit (OU) structure for applying different settings and policies to different groups of users and devices within your Google Workspace domain. To apply a unique set of policies to each department, you should create a child organizational unit for each department under your main domain structure.

Here's why option D aligns with Google's best practices and why the others are less suitable:

D . Create a child organizational unit for each department.

Organizational units provide a hierarchical structure for managing users and devices. By creating a child OU for each department, you can then apply specific device and user policies to that OU. Users and devices within a child OU inherit policies from parent OUs but can also have OU-specific policies that override or supplement the inherited ones. This allows for granular control and ensures that each department can have the policies tailored to its needs. This is the recommended method by Google for managing policies based on departments or other logical groupings within an organization.

Associate Google Workspace Administrator topics guides or documents reference: The official Google Workspace Admin Help documentation on "How the organizational structure works" and "Apply settings for specific groups of users or devices" (or similar titles) clearly explains the purpose and benefits of using OUs for policy management. It emphasizes the hierarchical nature and how policies are applied and inherited through the OU structure. Creating child OUs for departments is a direct application of this recommended practice.

A . Create separate top-level organizational units for each department.

Creating separate top-level OUs for each department is generally not recommended for managing policies within the same organization. Top-level OUs are meant to represent distinct functional or administrative units that might have their own domain settings and administrators. Managing all departments under a single domain but in separate top-level OUs can complicate overall administration, sharing, and user management across the organization. Child OUs within a single domain provide the necessary separation for policy application while maintaining a unified organizational structure.

Associate Google Workspace Administrator topics guides or documents reference: Google's documentation on organizational structure usually advises on creating a logical hierarchy of child OUs under a single top-level OU representing the organization. Separating departments into top-level OUs is not a standard or recommended practice for policy management within a single domain.

B . Create an Access group for each department. Configure the applicable policies.

Access groups are primarily used for controlling access to specific resources or services. While you can manage group membership based on departments, policies for users and devices are typically applied at the organizational unit level, not directly to access groups. While some settings might be influenced by group membership, OUs are the primary mechanism for policy enforcement. Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help distinguishes between organizational units and groups (including access groups). Policies are consistently described as being applied to OUs. Groups are for managing access and collaboration.

C . Add all managed users and devices in the top-level organizational unit.

Applying all policies at the top-level OU would mean that all users and devices inherit the same set of policies. This contradicts the requirement of having different policies for each department. To achieve department-specific policies, you need to organize users and devices into separate OUs.

Associate Google Workspace Administrator topics guides or documents reference: Google's documentation emphasizes the flexibility of the OU structure to apply different policies to different subsets of users and devices. Placing everyone in the top-level OU negates this flexibility.

Therefore, the Google-recommended practice for applying different device and user policies to employees in different departments is to create a child organizational unit for each department. This allows for targeted policy application and management within the overall organizational structure.

NEW QUESTION # 98

.....

There are three different versions provided by our company. Every version is very convenient and practical. The three different versions of our Associate-Google-Workspace-Administrator study torrent have different function. Now I am willing to show you the special function of the PDF version of Associate-Google-Workspace-Administrator test torrent. If you prefer to read paper materials rather than learning on computers, the PDF version of our Associate-Google-Workspace-Administrator Guide Torrent must be the best choice for you. Because the study materials on the PDF version are printable, you can download our Associate-Google-Workspace-Administrator study torrent by the PDF version and print it on papers.

Associate-Google-Workspace-Administrator Latest Test Cost: <https://www.newpassleader.com/Google/Associate-Google-Workspace-Administrator-exam-preparation-materials.html>

Google Valid Associate-Google-Workspace-Administrator Exam Forum They never give up learning new things, But you don't need to worry about it at all when buying our Associate-Google-Workspace-Administrator study materials, You can have your money back if our Google Associate-Google-Workspace-Administrator exam dumps could not be able to entertain you, The Associate-Google-Workspace-Administrator exam prepare materials of NewPassLeader is high quality and high pass rate, it is completed by our experts who have a good understanding of real Associate-Google-Workspace-Administrator exams and have many years of experience writing Associate-Google-Workspace-Administrator study materials, There is no doubt that the Associate-Google-Workspace-Administrator exams can be tough and challenging without valid Associate-Google-Workspace-Administrator brain dumps.

They won't see elaborated theories or names of major researchers but they will Associate-Google-Workspace-Administrator find accurate translations of research findings, It takes more money to offer such exams, and therefore generally costs more money to take them.
