Examine the RADIUS policy configuration shown in the exhibit. A user attempts to authenticate by entering the usernamejdoe@example.comand their password. Which realm will the user be authenticated against?

- Answer: A**

Since the username includes the realm `@example.com` but does not match any configured realm exactly, and the option `Use default realm when user-provided realm is different from all configured realms` is enabled, the default realm is used - in this case, `corporate`.
