If you study with our GH-100 exam questions, then you will be surprised to find that our GH-100 training material is well-written and excellently-organised. That is because our experts fully considered the differences in learning methods and GH-100 examination models between different majors and eventually formed a complete review system. It will help you to Pass GH-100 Exam successfully after a series of exercises, correction of errors, and self-improvement. Our GH-100 exam questions contain everything you need to pass the exam

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.
Topic 2	<ul style="list-style-type: none">• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 3	<ul style="list-style-type: none">• Manage GitHub Actions: This section of the exam measures skills of DevOps Engineers and emphasizes managing workflows, reusable actions, and distribution strategies within the enterprise. It explains configuring organization-level policies, managing self-hosted and GitHub-hosted runners, controlling access through IP allow lists, handling encrypted secrets, and integrating third-party vaults for workflow security.

Free Sample Microsoft GH-100 Questions, Reliable GH-100 Exam Price

It is very necessary for candidates to get valid GH-100 dumps collection because it can save your time and help you get succeed in

IT filed by clearing GH-100 actual test. Passing real exam is not easy task so many people need to take professional suggestions to prepare GH-100 Practice Exam. The reason that we get good reputation among dump vendors is the most reliable GH-100 pdf vce and the best-quality service.

Microsoft GitHub Administration Sample Questions (Q13-Q18):

NEW QUESTION # 13

Why would a GitHub App be favored over a machine account for automation tasks?

- A. GitHub Apps provide a higher rate limit ceiling than using a personal access token on a machine account, when they use an install token and are owned by a GitHub Enterprise Cloud licensed enterprise.
- B. GitHub Apps are limited to a single repository.
- C. Machine accounts are required for webhook delivery.
- D. Machine accounts are easier to audit than GitHub Apps.

Answer: A

Explanation:

GitHub Apps authenticate with short-lived installation tokens scoped to fine-grained permissions and, when owned by a GitHub Enterprise Cloud organization, enjoy a higher rate limit (15,000 requests/hour) compared to a machine account's personal access token.

NEW QUESTION # 14

Why would someone choose to configure a security policy?

- A. To define which open source packages are permitted for use as part of that repository.
- B. To prevent anyone from pushing to the repository without approval.
- C. To provide information on an open source repository for open source collaborators and researchers that may need to report and disclose sensitive security findings to maintainers securely.
- D. To communicate corporate security and compliance policies for end users on a private repository.

Answer: C

Explanation:

A security policy (the SECURITY.md file) lets maintainers of an open source repository provide clear, private instructions for collaborators and external researchers on how to report and disclose security vulnerabilities responsibly.

NEW QUESTION # 15

Why is a GitHub App preferred over a PAT for machine authentication?

- A. GitHub Apps are required to pass SAML assertions
- B. PATs cannot be used in GitHub Actions
- C. GitHub Apps have time-limited installation tokens with scoped access
- D. PATs support fewer GitHub APIs than Apps

Answer: C

Explanation:

GitHub Apps issue short-lived installation tokens that you scope to only the permissions and repositories your automation needs, reducing blast radius and automatically rotating credentials.

NEW QUESTION # 16

What do you need to successfully generate a support bundle on a GitHub Enterprise Server?

- A. A GitHub App with read:org permissions
- B. A custom GitHub Action in the root repo
- C. Administrator SSH access to the appliance
- D. Approval from GitHub Support

Answer: C

Explanation:

You must have administrator-level SSH access to the GitHub Enterprise Server appliance so you can run the `ghe-support-bundle` command over SSH and capture the bundle locally.

NEW QUESTION # 17

Which of the following accurately contrasts a GitHub App and a GitHub Action?

- A. GitHub Actions are limited to reading repository content only
- B. GitHub Apps can only be used inside `.github/workflows`
- C. GitHub Actions can only be used to respond to events within a single repository while GitHub Apps can respond to events from multiple repositories
- D. GitHub Apps run only on GitHub-provided virtual machines, while GitHub Actions run only on customer-hosted machines

Answer: C

Explanation:

GitHub Actions workflows are defined and triggered within a single repository's context, whereas GitHub Apps are installed at the organization or user level and can subscribe to events across multiple repositories.

NEW QUESTION # 18
