

Useful FCSS_SASE_AD-25 Dumps, FCSS_SASE_AD-25 Exam Outline

BONUS!!! Download part of TorrentExam FCSS_SASE_AD-25 dumps for free: <https://drive.google.com/open?id=1F3ZHnQuouPHGzd4YgLLB4OzMBKv5vORr>

Not only Fortinet FCSS_SASE_AD-25 study guide has the advantage of high-quality, but also has reasonable prices that are accessible for every one of you. So it is incumbent upon us to support you. On the other side, we know the consumers are vulnerable for many exam candidates are susceptible to ads that boost about Fortinet FCSS_SASE_AD-25 skills their practice with low quality which may confuse exam candidates like you, so we are trying hard to promote our high quality Fortinet FCSS_SASE_AD-25 study guide to more people.

If you are searching for an easy and rewarding study content to get through the FCSS_SASE_AD-25 Exam, you are at the right place to get success. Our FCSS_SASE_AD-25 exam questions can help you pass the exam and achieve the according certification with ease. If you study with our FCSS_SASE_AD-25 Practice Guide for 20 to 30 hours, then you will be bound to pass the exam with confidence. And the price for our FCSS_SASE_AD-25 training engine is quite favourable. What are you waiting for? Just come and buy it!

FCSS_SASE_AD-25 Exam Outline - FCSS_SASE_AD-25 Exam Preview

Our company has successfully launched the new version of the FCSS_SASE_AD-25 study materials. Perhaps you are deeply bothered by preparing the FCSS_SASE_AD-25 exam. Now, you can totally feel relaxed with the assistance of our FCSS_SASE_AD-25 study materials. Our products are reliable and excellent. What is more, the passing rate of our FCSS_SASE_AD-25 Study Materials is the highest in the market. Purchasing our FCSS_SASE_AD-25 study materials means you have been half success. Good decision is of great significance if you want to pass the FCSS_SASE_AD-25 exam for the first time.

Fortinet FCSS_SASE_AD-25 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> • Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.
Topic 2	<ul style="list-style-type: none"> • Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.
Topic 3	<ul style="list-style-type: none"> • SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.
Topic 4	<ul style="list-style-type: none"> • SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which secure internet access (SIA) use case minimizes individual workstation or device setup, because you do not need to install FortiClient on endpoints or configure explicit web proxy settings on web browser-based endpoints?

- A. SIA for SSLVPN remote users
- **B. SIA for agentless remote users**
- C. SIA for inline-CASB users
- D. SIA for site-based remote users

Answer: B

Explanation:

The Secure Internet Access (SIA) use case that minimizes individual workstation or device setup is SIA for agentless remote users. This use case does not require installing FortiClient on endpoints or configuring explicit web proxy settings on web browser-based endpoints, making it the simplest and most efficient deployment.

SIA for Agentless Remote Users:

Agentless deployment allows remote users to connect to the SIA service without needing to install any client software or configure browser settings.

This approach reduces the setup and maintenance overhead for both users and administrators.

Minimized Setup:

Without the need for FortiClient installation or explicit proxy configuration, the deployment is straightforward and quick.

Users can securely access the internet with minimal disruption and administrative effort.

FortiOS 7.2 Administration Guide: Details on different SIA deployment use cases and configurations.

FortiSASE 23.2 Documentation: Explains how SIA for agentless remote users is implemented and the benefits it provides.

NEW QUESTION # 17

When viewing the daily summary report generated by FortiSASE, the administrator notices that the report contains very little data. What is a possible explanation for this almost empty report?

- A. There are no security profile groups applied to all policies.
- B. Digital experience monitoring is not configured.
- C. Log allowed traffic is set to Security Events for all policies.
- D. The web filter security profile is not set to Monitor.

Answer: C

Explanation:

The issue of an almost empty daily summary report in FortiSASE can often be traced back to how logging is configured within the system. Specifically, if "Log Allowed Traffic" is set to "Security Events" for all policies, it means that only security-related events (such as threats or anomalies) are being logged, while normal, allowed traffic is not being recorded. Since most traffic in a typical network environment is allowed, this configuration would result in very little data being captured and subsequently reported in the daily summary.

Here's a breakdown of why the other options are less likely to be the cause:

B. There are no security profile groups applied to all policies: While applying security profiles is important for comprehensive protection, their absence does not directly affect the volume of data in reports unless specific logging settings are also misconfigured.

C. The web filter security profile is not set to Monitor: This option pertains specifically to web filtering activities. Even if web filtering is not set to monitor mode, other types of traffic and logs should still populate the report.

D. Digital experience monitoring is not configured: Digital Experience Monitoring (DEM) focuses on user experience metrics rather than general traffic logging. Its absence would not lead to an almost empty report.

To resolve this issue, administrators should review the logging settings across all policies and ensure that "Log Allowed Traffic" is appropriately configured to capture the necessary data for reporting purposes.

Fortinet FCSS FortiSASE Documentation - Reporting and Logging Best Practices FortiSASE Administration Guide - Configuring Logging Settings

NEW QUESTION # 18

Refer to the exhibit.

daily reports for application usage

The daily report for application usage for internet traffic shows an unusually high number of unknown applications by category. What are two possible explanations for this? (Choose two.)

- A. The inline-CASB application control profile does not have application categories set to Monitor.
- B. The private access policy must be set to log Security Events.
- C. Certificate inspection is not being used to scan application traffic.
- D. Deep inspection is not being used to scan traffic.

Answer: A,D

NEW QUESTION # 19

Which service is included in a secure access service edge (SASE) solution, but not in a security service edge (SSE) solution?

- **A. SD-WAN**
- B. CASB
- C. SWG
- D. ZTNA

Answer: A

Explanation:

SD-WAN is a networking component included in a SASE solution but not in an SSE solution. SSE focuses solely on security services (like ZTNA, SWG, and CASB), while SASE combines both networking (e.g., SD-WAN) and security into a unified cloud-delivered service.

NEW QUESTION # 20

Refer to the exhibit.

ENDPOINT PROFILE **FORTINET**

Name *Default*

Profile Configuration

Connection Protection **Sandbox** ZTNA FSSO Settings

Sandbox Mode Disabled **FortiSASE** Standalone FortiSandbox

Region Global

Time Offset UTC+00:00

Wait for FortiSandbox Results before Allowing File Access

Timeout in seconds ⓘ 300

File Submission Options

All Files Executed from Removable Media

All Files Executed from Mapped Network Drives

All Web Downloads

All Email Downloads

Remediation Actions

Action Quarantine Alert & Notify

Sandbox Detection Verdict Level Clear Low **Medium** High Malicious

Based on the configuration shown, in which two ways will FortiSASE process sessions that require FortiSandbox inspection? (Choose two.)

- A. All files executed on a USB drive will be sent to FortiSandbox for analysis.
- B. All files will be sent to a on-premises FortiSandbox for inspection.
- C. FortiClient quarantines only infected files that FortiSandbox detects as medium level.
- D. Only endpoints assigned a profile for sandbox detection will be processed by the sandbox feature.

Answer: A,D

Explanation:

The sandbox feature applies only to endpoints assigned this profile, and the configuration explicitly enables the submission of all files executed from removable media (like USB drives) to FortiSandbox for analysis.

NEW QUESTION # 21

.....

Getting a certification is not only a certainty of your ability but also can improve your competitive force in the job market. FCSS_SASE_AD-25 training materials are high-quality, and you can pass the exam by using them. In addition, we offer you free demo for you to have a try, so that you can have a deeper understanding of what you are going to buy. We are pass guarantee and money back guarantee, and if you fail to pass the exam by using FCSS_SASE_AD-25 test materials of us, we will give you full refund. We have online and offline service, and if you have any questions for FCSS_SASE_AD-25 exam dumps, you can contact us.
