So don't be hesitated to buy our Fundamentals-of-Crew-Leadership exam materials and take action immediately.

NCCER Module 46101 Fundamentals of Crew Leadership Sample Questions (Q20-Q25):

NEW QUESTION # 20

What is a potentially important use of the daily diary that is NOT related to the crew leader's efficient management of work?

- A. recording an OSHA inspection visit
- B. documenting work completed
- **C. a source of information during litigation with the client**
- D. scheduling a new-worker orientation session

Answer: C

Explanation:

While the daily diary is crucial for documenting work progress (A), recording important events like OSHA inspections (B), and potentially noting training activities, a potentially important use not directly related to efficient daily management is that it can serve as a source of information during litigation with the client (C) by providing a detailed record of site conditions, work performed, and any relevant incidents. Scheduling a new-worker orientation (D) is more of a planning task than a daily record. (Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 2.2.3 Maintaining a Daily Log)

NEW QUESTION # 21

When writing or creating a visual message in a professional setting, you should

- **A. proofread your work and make sure the document is legible**
- B. always give your opinion.
- C. state the purpose of the message last to make it more impactful.
- D. use technical language so that only your peers will be able to understand.

Answer: A

Explanation:

Effective communication in a professional setting requires clarity and accuracy. Therefore, you should proofread your work and make sure the document is legible (B) to ensure the message is understood as intended. Giving your opinion (A) is not always necessary or appropriate, stating the purpose last (C) can lead to confusion, and using overly technical language (D) can hinder understanding for those outside your immediate peer group. (Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 6.1.2 Principles of Effective Communication)

NEW QUESTION # 22

In a firm-fixed-price contract, the contractor's profit is

- A. negotiated separately from labor and material costs.
- B. tied to project schedule performance.
- C. incorporated into the bid.
- D. subject to penalties and incentives

Answer: C

Explanation:

In a firm-fixed-price contract, the contractor agrees to complete the project for a set price. The contractor's profit is incorporated into the bid (A) by estimating costs (labor, materials, overhead) and adding a desired profit margin. Penalties and incentives (B) are more common in other contract types. Profit is not directly tied to the schedule in this contract type (C), and it is not negotiated separately (D). (Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 4.1.3 Understanding Contract Types)

NEW QUESTION # 23

Which of the following is an uninsured cost of an accident?

- A. medical bills
- B. employee benefits
- C. compensation
- D. production delays

Answer: D

Explanation:

Uninsured costs or indirect costs of accidents are those not typically covered by insurance. Production delays (C) resulting from an accident, such as work stoppage and rescheduling, are a significant uninsured cost.

Medical bills (A), compensation (B), and some employee benefits might be covered under insurance policies.

(Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 3.1.1 Understanding the Costs of Accidents)

NEW QUESTION # 24

Productivity is defined as the

- A. total amount of material a crew places for a given job.
- B. amount of material scheduled to be used in a given time.
- C. total amount of material an individual or crew places in a given time.
- D. amount of material an individual worker places to complete a job.

Answer: C

Explanation:

Productivity is most accurately defined as the total amount of material an individual or crew places in a given time (D). It measures the efficiency of work by relating output (e.g., quantity of material installed) to input (e.g., labor hours).

Option A describes the total output for a job, not the rate. Option B refers to planned material usage. Option C focuses on an individual's total output for a job, not necessarily within a specific timeframe.

(Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 5.1.1 Defining Productivity)

NEW QUESTION # 25

.....
