## The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q12-Q17):

### NEW QUESTION # 12

Which of the following describes how business models are used within the TOGAF standard?

- A. To tailor the enterprise architecture for the business.
- B. To identify, classify, and mitigate risks to the business.
- C. To help formulate architecture and business principles.**
- D. To document the factors impacting the business migration plan.

**Answer: C**

Explanation:

Business models play a significant role in shaping the principles that guide both architecture development and business operations within the TOGAF framework. Here's how:

- \* Understanding value creation: Business models articulate how an organization creates, delivers, and captures value. This understanding informs the development of architecture principles that support and enable value creation.
- \* Aligning architecture with business goals: By analyzing the business model, architects can identify the key drivers and priorities of the business. This helps to formulate architecture principles that ensure the architecture aligns with the business goals and strategy.
- \* Defining desired behaviors: Business models often implicitly or explicitly define desired behaviors and ways of working within an organization. These behaviors can be codified into business principles that guide decision-making and actions across the enterprise.
- \* Promoting consistency: Using the business model as a foundation for principles ensures consistency between the architecture and the business strategy. This helps to avoid conflicts and ensures that the architecture supports the overall direction of the organization.

### NEW QUESTION # 13

In which phase of the ADM cycle do building blocks become Implementation-specific?

- A. Phase D
- B. Phase E**
- C. Phase C
- D. Phase B

**Answer: B**

### NEW QUESTION # 14

Which of the following best describes a business capability?

- A. It is an articulation of the relationships between business entities that make up the enterprise.
- B. It is a qualitative statement of intent that should be met by the enterprise architecture capability developing the business architecture.
- C. It is a detailed description of the architectural approach to realize a particular solution.
- D. It delineates what a business does without an explanation of how, why, or where the capability is used.**

**Answer: D**

Explanation:

According to the TOGAF Series Guide to Business Capabilities (Version 2), a business capability is defined as "a particular ability or capacity that a business may possess or exchange to achieve a specific purpose or outcome" 4. A business

capability delineates what a business does without an explanation of how, why, or where the capability is used4. A business capability can be expressed as a verb phrase that indicates what function or service the capability provides4. For example, some possible business capabilities are "Manage Customer Relationships", "Deliver Products", or "Perform Financial Analysis".

### NEW QUESTION # 15

Which of the following best describes a business capability map?

- A. The highest-level description of an organization, covering all missions and functions of the business.
- B. A reference model that provides a conceptual definition of all the key building blocks within a business architecture
- C. A self-contained view of the business that is independent of organizational structure, business processes, systems and applications.
- D. A holistic representation of capabilities, including end-to-end delivery value, and the relationships between these capabilities.

**Answer: D**

Explanation:

A business capability map is a comprehensive representation that showcases an organization's abilities in a structured manner. It identifies and illustrates the various business capabilities that allow the enterprise to function and deliver value. These capabilities are often defined independently of the organizational structure, processes, or technology, focusing instead on what the business does and can do. This map encompasses the end-to-end value delivery and how different capabilities interrelate and support one another, thus providing a holistic view of the business's functional abilities.

### NEW QUESTION # 16

Which of the following can be used to help define information concepts in an information map?

- A. Organization Map
- B. Statement of business goals and drivers
- C. Value streams
- D. Stakeholder Map

**Answer: C**

Explanation:

Value streams can be used to help define information concepts in an information map5. A value stream is a representation of a sequence of activities that create an overall result for a customer, stakeholder, or end user5. A value stream can help to identify the information that is required, produced, consumed, or exchanged by each activity in the value stream. An information map can then document and visualize the information concepts and their relationships.

### NEW QUESTION # 17

.....
