

Get High Hit Rate PDD Dumps Collection and Pass Exam in First Attempt

1. A backup administrator is tasked with monitoring PowerProtect DD capacity metrics. The administrator is backing up 4 TB of data daily with a reduction rate at 5x. After data reduction, subsequent full backups compress down to 200 GB. The initial backup requires 800 GB with a 10 percent increase in the data each day. Incremental backups are 400 GB. After data reduction, each incremental backup is 40 GB.

What is the weekly burn rate (GB) after four daily incremental backups and one weekly backup?

- A. 220
- B. 260
- C. 400
- D. 440

Answer: B

2. A backup administrator is tasked with monitoring changes in space availability and compression in relation to the cleaning process on the PowerProtect DD system. Which chart in DDSM is used specifically to identify these trends?

- A. Pre-Comp Used
- B. Consumption
- C. Space Usage
- D. Daily Written

Answer: D

3. What is a characteristic of PowerProtect DD remote logging?

- A. CLI command for remote logging is log watch
- B. The basic CLI command for remote logging is log host
- C. Must be enabled and verified through System Manager
- D. Communicates only through TCP ports

Answer: B

4. Which of the following protocols are supported by PowerProtect DD for data movement to a cloud provider?

- A. FTP and FTPS
- B. VTL and DD Boost
- C. CIFS and NFS
- D. HTTP and HTTPS

Answer: D

5. An administrator is migrating their old cloud tier-enabled Data Domain to a new

TroytecDumps is the best catalyst to help IT personage be successful. Many people who have passed some IT related certification exams used our TroytecDumps's training tool. Our TroytecDumps expert team use their experience for many people participating in NCARB certification PDD exam to develop the latest effective training tools, which includes NCARB PDD Certification simulation test, the current exam and answers. Our TroytecDumps's test questions and answers have 95% similarity with the real exam. With TroytecDumps's training tool your NCARB certification PDD exams can be easy passed.

NCARB PDD Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Integration of Building Materials & Systems: This section of the exam measures the skills of Architectural Designers and focuses on the ability to resolve and integrate various building systems into cohesive project goals. It covers analyzing architectural systems and technologies, determining the size of structural, mechanical, electrical, and plumbing systems, and incorporating specialty systems such as acoustics, lighting, security, and communications. It also evaluates the ability to detail how multiple building systems work together and to coordinate across disciplines to achieve a unified design.

Topic 2	<ul style="list-style-type: none"> • Project Manual & Specifications: This section of the exam measures the skills of Specifications Writers and emphasizes the importance of developing documentation that goes beyond drawings. Candidates must understand how to identify and prioritize elements needed to prepare, maintain, and refine both the project manual and project specifications. It also assesses the ability to align and coordinate these specifications with the construction documents to ensure consistency and accuracy.
Topic 3	<ul style="list-style-type: none"> • Construction Documentation: This section of the exam measures skills of Project Architects and addresses the creation and management of project documentation. Candidates are expected to demonstrate knowledge of documenting building design and site features, preparing detailed architectural drawings, and applying industry standards to produce a coordinated set of construction documents. The section also includes understanding how project changes impact documentation and how to communicate these updates effectively to both the design team and the client.
Topic 4	<ul style="list-style-type: none"> • Construction Cost: This section of the exam measures the skills of Construction Managers and focuses on the financial side of project execution. It evaluates the ability to analyze construction cost estimates to confirm that they align with project design intent and budgetary constraints. Although this is the smallest section, it is critical for ensuring projects remain feasible and economically viable.
Topic 5	<ul style="list-style-type: none"> • Codes & Regulations: This section of the exam measures skills of Building Code Specialists and examines how codes and regulations apply at a detailed level during documentation. Candidates are expected to demonstrate knowledge of compliance with the International Building Code (IBC) as well as other specialty regulations, as well as how to interpret and apply these standards to ensure design and documentation meet legal and safety requirements.

Interactive NCARB PDD Questions, Valid Braindumps PDD Free

From the view of specialized examination point, it is necessary to teach you tips about the exam. You need to outsmart, and do not give your future the chance of failure. TroytecDumps is a great resource site. It includes NCARB PDD Exam Materials, study materials and technical materials, as well as exam training and detailed explanation and answers. The website which provide exam information are surged in recent years. This may cause you clueless when you prepare the NCARB PDD Exam. TroytecDumps's NCARB PDD exam training materials are effective training materials that proven by professionals and the candidates who passed the exam. It can help you to pass the exam certification easily.

NCARB ARE 5.0 Project Development and Documentation Exam Sample Questions (Q94-Q99):

NEW QUESTION # 94

Refer to the exhibit.

What is the horizontal member indicated by the arrow in the wall-floor assembly?

- A. Ledger
- B. Lateral shear plate
- C. Girt
- D. Fire block

Answer: A

Explanation:

The arrow in the wall-floor assembly indicates a horizontal structural member attached to a wall, used to support the end of a floor joist. This is called a ledger.

Ledger: Typically a dimensional lumber or engineered wood member fastened to a wall that supports floor framing members (joists).

Fire block: Installed to limit fire spread in concealed spaces—often mid-wall or mid-stud cavity, not in this floor-to-wall position.

Girt: A horizontal framing member in a wall, usually in steel-frame or post-frame construction, not in conventional wood framing for floors.

Lateral shear plate: A metal plate for shear transfer, not applicable here.

NEW QUESTION # 95

In which of the following locations in concrete masonry should a control joint be placed?

- A. At changes in wall height
- B. At each corner of the foundation wall
- C. In the center of window openings
- D. At the first course of masonry walls

Answer: A

Explanation:

Control joints in concrete masonry walls are designed to accommodate movement caused by thermal expansion, moisture changes, and settlement.

Control joints should be placed at locations of stress concentration, such as changes in wall height, changes in wall thickness, or at large wall expanses.

They are not placed at the first course of masonry (which is typically reinforced and anchored to the foundation).

They are generally not placed at window corners or in the center of window openings but rather at planned intervals or changes in geometry.

Placing a control joint at changes in wall height allows movement without cracking.

NEW QUESTION # 96

Which of the following documents would the architect need in order to prepare the specifications?

- A. Architectural floor plans, room finish schedule, and traffic management plan
- B. Legal survey, geotechnical report, and traffic management plan
- C. Geotechnical report, building sections, and room finish schedule
- D. Legal survey, engineering drawings, and door schedule

Answer: C

Explanation:

To prepare project specifications, the architect requires documents that inform about site conditions, building construction, and interior finishes:

Geotechnical report provides soil conditions, foundation recommendations, and site constraints.

Building sections provide detailed information on assemblies, materials, and vertical relationships.

Room finish schedule identifies finishes, materials, and related specifications for interior spaces.

Legal surveys, traffic management plans, and door schedules are important for planning and design coordination but less directly informative for writing specifications.

NEW QUESTION # 97

Which of the following methods of mortar joint finishing has the greatest weatherability?

- A. Extruded
- B. Concave
- C. Raked

- D. Weathered

Answer: B

Explanation:

Mortar joint finishes impact water resistance and weatherability:

Concave joint is the most weather-resistant. The joint is compressed and curved inward, forming a dense, compact surface that sheds water effectively.

Weathered joint slopes outward but is less compact than concave.

Raked joint is recessed and can hold water, less weather-resistant.

Extruded joint protrudes and tends to trap water and dirt.

Therefore, concave joints provide the best weather protection.

NEW QUESTION # 98

Where is the proper place to put a vapor barrier in a cold climate?

- A. On the interior between the gypsum wallboard and the framing
- B. On the exterior between the metal siding and the sheathing
- C. In the cavity of the framing space
- D. On the exterior between the framing and the sheathing

Answer: A

Explanation:

In cold climates, the vapor drive is from the warm interior to the cold exterior during winter. The vapor retarder/barrier belongs on the warm-in-winter side of the assembly-i.e., behind the interior gypsum, before the framing/insulation-to prevent interior moisture from reaching cold layers where it could condense.

PDD references: Psychrometrics & vapor drive; vapor retarder placement (ASHRAE; IBC/IECC guidance; ARE 5.0 PDD-Thermal & Moisture Protection).

NEW QUESTION # 99

.....

The desktop-based practice exam is customizable, tracks your progress, and creates a real ARE 5.0 Project Development and Documentation Exam (PDD) exam environment. This software works offline on Windows computers. The web-based practice exam is similar to the desktop-based practice exam and can be taken on any browser without needing to install separate software. Moreover, the web-based ARE 5.0 Project Development and Documentation Exam (PDD) practice exam is also compatible with all operating systems.
