## C-SIGVT-2506 VCE Torrent & C-SIGVT-2506 Exam Dumps & C-SIGVT-2506 Study Materials

You won't need anything else if you prepare for the exam with our SAP C-SIGVT-2506 Exam Questions. Our experts have prepared SAP C-SIGVT-2506 dumps questions that will eliminate your chances of failing the exam. We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the SAP C-SIGVT-2506 Exam Preparation.

### SAP Certified Associate - Validating Business Transformation Sample Questions (Q14-Q19):

#### NEW QUESTION # 14

What benefit does SAP LeanIX insights provide to stakeholders?

- A. Enhanced survey management
- B. Visibility into current and target architecture alignment
- C. Lifecycle tag duration tracking
- D. Cost allocation mapping

**Answer: B**

#### NEW QUESTION # 15

What ensures that architecture documentation is aligned with business capability goals?

- A. RACI Grid Builder
- B. Capability Mapping
- C. Lifecycle Milestones
- D. Fact Sheet Owners

**Answer: B**

#### NEW QUESTION # 16

What component enables application development and integration in the toolchain?

- A. SAP S/4HANA

- B. SAP GUI
- **C. SAP Business Technology Platform and SAP Build**
- D. SAP HANA Studio

**Answer: C**

Explanation:

SAP Business Technology Platform (BTP), together with SAP Build, provides the infrastructure for creating extensions, integrations, and custom applications while preserving a clean core. BTP includes integration services, event-driven architecture, workflow automation, and low-code/no-code tools. This enables customers to extend SAP S/4HANA without modifying the core system. The other tools do not serve as the primary integration or extension platform in modern cloud transformation.

#### NEW QUESTION # 17

What tool is used for test automation within SAP Cloud ALM projects?

- A. SAP Enable Now
- **B. Tricentis**
- C. SAP WalkMe
- D. SAP Business Data Cloud

**Answer: B**

Explanation:

Tricentis Test Automation is directly integrated with SAP Cloud ALM to support automated testing. It provides codeless test creation, execution, and reporting for SAP and non-SAP processes. Within Cloud ALM, Tricentis handles automated regression scenarios, ensuring system stability during configuration changes and release cycles. Other tools listed focus on data management or end-user enablement, not automated testing.

#### NEW QUESTION # 18

Which of the following are strategies used in the Design phase to enable effective business process transformation with SAP Signavio?

(3 correct answers)

- A. Using best practice content
- **B. Value discovery**
- **C. Involving the stakeholders**
- D. Collaborating with IT
- **E. Process performance benchmarking**

**Answer: B,C,E**

Explanation:

In the Design phase of a transformation project, SAP Signavio plays a central role in shaping how business processes are evaluated, redesigned, and aligned to organizational objectives. Value discovery is one of the fundamental strategies used during this phase. It involves identifying improvement opportunities by analyzing existing processes, determining where inefficiencies occur, and uncovering areas where automation, optimization, or standardization can bring measurable business benefits. SAP Signavio provides process insights and performance indicators that support this discovery work.

Another essential strategy is involving stakeholders. Effective process transformation requires input from business users, process owners, managers, and IT teams to ensure that redesigned processes reflect operational realities and strategic priorities. Signavio's collaboration features—such as commenting, sharing models, and approving workflows—facilitate this engagement. Stakeholder involvement helps ensure alignment and increases adoption success after deployment.

Process performance benchmarking is also a critical strategy. SAP Signavio allows organizations to compare their internal process performance with industry standards or peer benchmarks. This evaluation highlights underperforming areas and guides prioritization in the design phase. While collaborating with IT and best practice use are helpful activities, they are not formalized as the three primary strategies emphasized in the Signavio design methodology.

#### NEW QUESTION # 19
