## APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q23-Q28):

### NEW QUESTION # 23

Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO /IEC 27001?

- A. To evaluate information security performance
- B. To monitor the use of information assets
- C. To track the use of outsourced processes
- D. To ensure that employees and contractors are competent

**Answer: A**

Explanation:

Clause 9.1 requires:

"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.

Thus, the verified purpose is A: To evaluate information security performance.

### NEW QUESTION # 24

Identify the missing word(s) in the following control relating to the Policies for information security control.

"Information security policy and topic-specific policies should be defined, approved by management, [ ? ] and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur."

- A. published
- B. published, communicated to

- C. established and maintained
- D. communicated to

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) states:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This confirms that the missing words are "published, communicated to." The control emphasizes not just defining and approving policies but ensuring they are actively distributed and communicated so that relevant stakeholders are aware of and acknowledge them. Options A, B, and D are partial but incomplete.

Thus, the correct answer is C.

## NEW QUESTION # 25

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [ ? ] these actions.

- A. evaluate the effectiveness of
- B. communicate
- C. improve the effectiveness of
- D. apply competent resources to

**Answer: A**

Explanation:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

\* integrate and implement the actions into its ISMS processes; and

\* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

## NEW QUESTION # 26

Which statement about the conduct of audits is true?

- A. During Stage 1 of a certification audit, evidence is collected by observing activities
- B. Third party audits are conducted by a customer of the organization
- C. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- D. One of the focus areas for a surveillance audit is the output from internal audits and management reviews

**Answer: D**

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

### NEW QUESTION # 27

Who determines the number of days required for a certification audit?

- A. The external auditor from the Certification Body who will undertake the audit
- B. Both the management representative and the external auditor together
- C. The lead internal auditor from the organization to be audited
- D. The management representative from the organization to be audited

**Answer: A**

Explanation:

Certification audits are carried out by Certification Bodies (CBs), not the organization itself. ISO/IEC 27001 requires external certification audits to be independent, impartial, and objective. According to ISO/IEC 27006 (Requirements for bodies providing audit and certification of ISMS), the Certification Body determines the audit duration and number of audit days based on factors such as organizational size, complexity, scope, and risk environment. This ensures consistency across organizations and prevents manipulation by the auditee. ISO/IEC 27001 Clause 9.2 and 9.3 address internal audit and management review, but the determination of certification audit days is outside the organization's control; it rests solely with the accredited Certification Body auditors. Thus, answer: A is correct, as the CB's external auditor formally calculates and assigns the audit time.

### NEW QUESTION # 28

.....

Preparation from reliable material is essential to get success in the real ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam. One of the most crucial aspects of test preparation is relying on APMG-International ISO-IEC-27001-Foundation exam dumps. The authenticity of ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam questions material plays a huge role in achieving a passing score. In the case of choosing ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam dumps outdated material, and one fails and loses resources. TorrentValid is committed to providing real ISO-IEC-27001-Foundation Questions, ensuring that applicants get success in a short time.
