## Free PDF Professional SAP - New C\_S4TM\_2023 Test Price

With the unemployment rising, large numbers of people are forced to live their job. It is hard to find a high salary job than before. Many people are immersed in updating their knowledge. So people are keen on taking part in the C\_S4TM\_2023 exam. As you know, the competition between candidates is fierce. If you want to win out, you must master the knowledge excellently. Now our C\_S4TM\_2023 Study Materials are your best choice. With the assistance of our study materials, you will advance quickly.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q49-Q54):

#### NEW QUESTION # 49

To which of the following can you assign a dimensional weight profile?

- **A. Calculation profile**
- B. Calculation base
- C. Charge type
- D. Charges profile

**Answer: A**

Explanation:

In SAP S/4HANA Transportation Management, a dimensional weight profile is used to calculate the dimensional weight of goods, which is often used for charge calculations in scenarios where volume impacts costs (e.g., air freight). According to the SAP documentation, the dimensional weight profile is assigned to the calculation profile, which defines the rules and settings for charge calculation, including how dimensional weight is factored into the cost. This allows the system to apply the dimensional weight logic consistently across relevant freight orders or agreements.

The other options are incorrect:

\* Charge type (A) defines specific charge categories (e.g., base freight, fuel surcharge) but does not directly support dimensional weight profiles.

\* Charges profile (B) structures the charges but is not used for dimensional weight assignments.

\* Calculation base (D) refers to the basis for charge calculations (e.g., weight, distance) but does not hold dimensional weight profiles.

#### NEW QUESTION # 50

You are implementing a side-by-side scenario integrating sales orders and outbound deliveries to transportation management. Sales order integration has created 30 freight units for 1 sales order (1 freight unit per sales order item). During planning, the freight units were assigned to 3 trucks (10 freight units per truck).

Based on this planning result, delivery creation is triggered. During packaging, up to 3 items can be packed into 1 case. What is the minimum number of freight units that exist in transportation management at the end of this process?

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

In a side-by-side scenario integrating SAP S/4HANA Transportation Management with sales orders and outbound deliveries, the process is as follows:

\* Initially, 30 freight units are created from one sales order (1 freight unit per item).

\* During planning, these are assigned to 3 trucks (10 freight units per truck).

\* Delivery creation is triggered based on the planning result, and during packaging, up to 3 items can be packed into 1 case. Since each freight unit corresponds to one sales order item, 3 items per case means 3 freight units can be consolidated into 1 freight unit (representing the case).

With 30 freight units, consolidating 3 freight units per case results in:

\*  $30 / 3 = 10$  freight units (each representing one case).

Thus, the minimum number of freight units in transportation management after packaging is 10. According to the SAP documentation, freight units can be consolidated during the packaging process in integration scenarios, reducing the number of freight units while maintaining the planning result (assignment to trucks).

The other options are incorrect:

\* A (0) and D (3) do not align with the consolidation math ( $30 / 3 = 10$ ).

\* C (2) assumes one freight unit per truck, which ignores the packaging consolidation.

#### NEW QUESTION # 51

Which documents are created in SAP ERP when you transfer a freight settlement document from SAP TM to SAP ERP when cost distribution is NOT enabled?

There are 2 correct answers to this question.

- A. Agency billing document
- **B. Purchase order**
- C. Carrier invoice
- **D. Service entry sheet**

**Answer: B,D**

#### NEW QUESTION # 52

You perform sales order scheduling for a material with enough stock on hand. Which dates on the sales order are updated by SAP TM? Note: There are 2 correct answers to this question.

- **A. Delivery date**
- **B. Loading date**
- C. Material availability date
- D. Transportation planning date

**Answer: A,B**

#### NEW QUESTION # 53

Which of the following statements apply to packaging units?

Note: There are 2 correct answers to this question.

- **A. A packaging unit is one or more packages transported together**
- **B. Packaging units can have a packaging hierarchy**
- C. Packaging units cannot be assigned to transportation units
- D. A packaging unit is needed for each stage

**Answer: A,B**

#### NEW QUESTION # 54

.....

These SAP C\_S4TM\_2023 exam questions are modeled after the C\_S4TM\_2023 test. They will assist you in learning how to manage your time during the examination. FreeDumps enabled all users to regulate time during their SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management C\_S4TM\_2023 test. And it can be accomplished via practice, as practice makes perfect. Therefore, you must practice passing the C\_S4TM\_2023 exam.
