# Free PDF SAP-C02 - AWS Certified Solutions Architect - Professional (SAP-C02)–Trustable Exam Bible

P.S. Free 2025 Amazon SAP-C02 dumps are available on Google Drive shared by BootcampPDF: https://drive.google.com/open?id=1bAR46jLRHBw-JOWSN45O1UK5zhzxh0L1

BootcampPDF offers up-to-date AWS Certified Solutions Architect - Professional (SAP-C02) (SAP-C02) practice material consisting of three formats that will prove to be vital for you. You can easily ace the AWS Certified Solutions Architect - Professional (SAP-C02) (SAP-C02) exam on the first attempt if you prepare with this material. The Amazon SAP-C02 Exam Dumps have been made under the expert advice of 90,000 highly experienced Amazon professionals from around the globe. They assure that anyone who prepares from it will get AWS Certified Solutions Architect - Professional (SAP-C02) (SAP-C02) certified on the first attempt.

Amazon SAP-C02 Exam Syllabus Topics:

Topic	Details
Topic 1	• Design Solutions for Organizational Complexity: In this topic, AWS solutions architects learn to architect network connectivity strategies tailored to complex organizational needs. Moreover, the topic emphasizes prescribing security controls and crafting reliable and resilient architectures. Additionally, the topic covers designing multi-account AWS environments and determining cost optimization and visibility strategies to balance functionality and efficiency within a large-scale organizational framework.
Topic 2	• Design for New Solutions: This topic equips AWS solutions architects to design deployment strategies that align with business goals while ensuring continuity through robust planning. It addresses determining security controls based on varying requirements.
Topic 3	• Continuous Improvement for Existing Solutions: Through this topic, AWS solutions architects gain insights into strategies for enhancing operational excellence across deployed solutions. It emphasizes improving security, performance, and reliability through iterative refinement.
Topic 4	• Accelerate Workload Migration and Modernization: This topic focuses on enabling AWS solutions architects to identify workloads and processes suitable for migration. It includes determining optimal migration approaches, redefining architectures for existing workloads, and discovering opportunities for modernization and enhancements.

Amazon SAP-C02 (AWS Certified Solutions Architect - Professional (SAP-C02)) certification exam is a highly sought-after certification for IT professionals who want to validate their advanced technical skills and expertise in designing and deploying scalable, fault-tolerant systems on AWS. AWS Certified Solutions Architect - Professional (SAP-C02) certification is intended for individuals who have already obtained the AWS Certified Solutions Architect - Associate certification and have at least two years of hands-on experience in designing and deploying cloud-based solutions using AWS.

Excellent Exam SAP-C02 Bible & The Best Reliable Dumps Pdf to Help you Pass SAP-C02: AWS Certified Solutions Architect - Professional (SAP-C02)

When you know you will enjoy one year free update after purchase, you may consider how to get the latest Amazon SAP-C02 exam torrent. Here, we will tell you, the BootcampPDF system will send the update SAP-C02 exam dumps to you automatically. You can pay attention to your payment email. If you find there is update and do not find any update email, do not worry, you can check your spam. If there is still not, please contact us by email or online chat. Besides, if you have any questions about Amazon SAP-C02, please contact us at any time. Our 7/24 customer service will be always at your side and solve your problem at once.

Amazon AWS Certified Solutions Architect - Professional (SAP-C02) Sample Questions (Q515-Q520):

NEW QUESTION # 515
A company is in the process of implementing AWS Organizations to constrain its developers to use only Amazon EC2. Amazon S3 and Amazon DynamoDB. The developers account resides In a dedicated organizational unit (OU). The solutions architect has implemented the following SCP on the developers account:

```
{
    "Version": "2012-10-17",
    "Statement": [
        {
            "Sid": "AllowEC2",
            "Effect": "Allow",
            "Action": "ec2:*",
            "Resource": "*"
        },
        {
            "Sid": "AllowDynamoDB",
            "Effect": "Allow",
            "Action": "dynamodb:*",
            "Resource": "*"
        },
        {
            "Sid": "AllowS3",
            "Effect": "Allow",
            "Action": "s3:*",
            "Resource": "*"
        }
    ]
}
```

When this policy is deployed, IAM users in the developers account are still able to use AWS services that are not listed in the policy. What should the solutions architect do to eliminate the developers' ability to use services outside the scope of this policy?

- A. Remove the Full AWS Access SCP from the developer account's OU
- B. Create an explicit deny statement for each AWS service that should be constrained
- C. Add an explicit deny statement using a wildcard to the end of the SCP
- D. Modify the Full AWS Access SCP to explicitly deny all services

Answer: A

Explanation:
https://docs.aws.amazon.com/organizations/latest/userguide/orgs_manage_policies_inheritance_auth.html

NEW QUESTION # 516
A company uses AWS Transit Gateway for a hub-and-spoke model to manage network traffic between many VPCs. The company is developing a new service that must be able to send data at 100 Gbps. The company needs a faster connection to other VPCs in the same AWS Region.
Which solution will meet these requirements?

- A. Establish VPC peering between the necessary VPCs. Ensure that all route tables are updated as required.

- B. Create an additional attachment from the necessary VPCs to the existing transit gateway.
- C. Attach an additional transit gateway to the VPCs. Update the route tables accordingly.
- D. Create AWS Site-to-Site VPN connections that use equal-cost multi-path (ECMP) routing between the necessary VPCs.

Answer: A

Explanation:
Using Transit Gateway, Maximum bandwidth per VPC, AWS Direct Connect gateway, or peered transit gateway connection is Up to 50 Gbps.
https://docs.aws.amazon.com/vpc/latest/tgw/transit-gateway-quotas.html
https://docs.aws.amazon.com/whitepapers/latest/building-scalable-secure-multi-vpc-network- infrastructure/transit-gateway-vs-vpc-peering.html

NEW QUESTION # 517
A company is hosting an image-processing service on AWS in a VPC. The VPC extends across two Availability Zones. Each Availability Zone contains one public subnet and one private subnet.
The service runs on Amazon EC2 instances in the private subnets.
An Application Load Balancer in the public subnets is in front of the service.
The service needs to communicate with the internet and does so through two NAT gateways.
The service uses Amazon S3 for image storage.
The EC2 instances retrieve approximately of data from an S3 bucket each day.
The company has promoted the service as highly secure. A solutions architect must reduce cloud expenditures as much as possible without compromising the service's security posture or increasing the time spent on ongoing operations.
Which solution will meet these requirements?

- A. Set up an S3 gateway VPC endpoint in the VPC. Attach an endpoint policy to the endpoint to allow the required actions on the S3 bucket.
- B. Replace the NAT gateways with NAT instances. In the VPC route table, create a route from the private subnets to the NAT instances.
- C. Move the EC2 instances to the public subnets. Remove the NAT gateways.
- D. Attach an Amazon Elastic File System (Amazon EFS) volume to the EC2 instances. Host the image on the EFS volume.

Answer: A

Explanation:
Explanation
Create Amazon S3 gateway endpoint in the VPC and add a VPC endpoint policy. This VPC endpoint policy will have a statement that allows S3 access only via access points owned by the organization.

NEW QUESTION # 518
A company has introduced a new policy that allows employees to work remotely from their homes if they connect by using a VPN The company Is hosting Internal applications with VPCs in multiple AWS accounts Currently the applications are accessible from the company's on-premises office network through an AWS Site-to-Site VPN connection The VPC in the company's main AWS account has peering connections established with VPCs in other AWS accounts.
A solutions architect must design a scalable AWS Client VPN solution for employees to use while they work from home What is the MOST cost-effective solution that meets these requirements?

- A. Create a Client VPN endpoint in the mam AWS account Establish connectivity between the Client VPN endpoint and the AWS Site-to-Site VPN
- B. Create a Client VPN endpoint in the main AWS account Provision a transit gateway that is connected to each AWS account Configure required routing that allows access to internal applications
- C. Create a Client VPN endpoint in each AWS account Configure required routing that allows access to internal applications
- D. Create a Client VPN endpoint in the mam AWS account Configure required routing that allows access to internal applications

Answer: B

NEW QUESTION # 519

An enterprise company wants to allow its developers to purchase third-party software through AWS Marketplace. The company uses an AWS Organizations account structure with full features enabled, and has a shared services account in each organizational unit (OU) that will be used by procurement managers. The procurement team's policy indicates that developers should be able to obtain third-party software from an approved list only and use Private Marketplace in AWS Marketplace to achieve this requirement. The procurement team wants administration of Private Marketplace to be restricted to a role named procurement-manager-role, which could be assumed by procurement managers. Other IAM users, groups, roles, and account administrators in the company should be denied Private Marketplace administrative access.

What is the MOST efficient way to design an architecture to meet these requirements?

- A. Create an IAM role named procurement-manager-role in all AWS accounts in the organization.
  Add the PowerUserAccess managed policy to the role.
  Apply an inline policy to all IAM users and roles in every AWS account to deny permissions on the AWSPrivateMarketplaceAdminFullAccess managed policy.
- B. Create an IAM role named procurement-manager-role in all AWS accounts that will be used by developers.
  Add the AWSPrivateMarketplaceAdminFullAccess managed policy to the role.
  Create an SCP in Organizations to deny permissions to administer Private Marketplace to everyone except the role named procurement-manager-role.
  Apply the SCP to all the shared services accounts in the organization.
- C. Create an IAM role named procurement-manager-role in all AWS accounts in the organization.
  Add the AdministratorAccess managed policy to the role.
  Define a permissions boundary with the AWSPrivateMarketplaceAdminFullAccess managed policy and attach it to all the developer roles.
- D. Create an IAM role named procurement-manager-role in all the shared services accounts in the organization.
  Add the AWSPrivateMarketplaceAdminFullAccess managed policy to the role.
  Create an organization root-level SCP to deny permissions to administer Private Marketplace to everyone except the role named procurement-manager-role.
  Create another organization root-level SCP to deny permissions to create an IAM role named procurement-manager-role to everyone in the organization.

Answer: D

Explanation:
SCP to deny permissions to administer Private Marketplace to everyone except the role named procurement-manager-role.
https://aws.amazon.com/blogs/awsmarketplace/controlling-access-to-a-well-architected-private- marketplace-using-iam-and-aws-organizations/

NEW QUESTION # 520

......

Additionally, all operating systems also support this format. The third format is the desktop SAP-C02 Practice Exam software. It is ideal for users who prefer offline AWS Certified Solutions Architect - Professional (SAP-C02) (SAP-C02) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.
