

Free PDF Quiz 2026 CMAA Construction-Manager: Certified Construction Manager (CCM) Newest Latest Test Materials

BONUS!!! Download part of ExamDumpsVCE Construction-Manager dumps for free: https://drive.google.com/open?id=19Zi3cnN8nVHE8-BsaUCOeb0j_ybY04C4

In order to protect the vital interests of each IT certification exams candidate, ExamDumpsVCE provides high-quality CMAA Construction-Manager Exam Training materials. This exam material is specially developed according to the needs of the candidates. It is researched by the IT experts of ExamDumpsVCE. Their struggle is not just to help you pass the exam, but also in order to let you have a better tomorrow.

If you have any doubts about the Construction-Manager pdf dump, please feel free to contact us, our team I live 24/7 to assist you and we will try our best to satisfy you. Now, you can download our Construction-Manager free demo for try. If you think our Construction-Manager study torrent is valid and worthy of purchase, please do your right decision. ExamDumpsVCE will give you the best useful and latest Construction-Manager Training Material and help you 100% pass. Besides, your information is 100% secure and protected, we will never share it to the third part without your permission.

Exam Construction-Manager Book, Construction-Manager Reliable Test Cost

It is known to us that the Construction-Manager exam has been increasingly significant for modern people in this highly competitive word, because the test certification can certify whether you have the competitive advantage in the global labor market or have the ability to handle the job in a certain area, especial when we enter into a newly computer era. Therefore our Construction-Manager practice torrent is tailor-designed for these learning groups, thus helping them pass the exam in a more productive and efficient way and achieve success in their workplace.

CMAA Certified Construction Manager (CCM) Sample Questions (Q50-Q55):

NEW QUESTION # 50

The general contractor on a \$1.2 billion terminal at an airport finds out that, due to supply chain issues, there is a 60% risk that they will not be able to get steel onsite for 10 weeks. The late start date of steel installation is four weeks away. Such a delay would cost the owner \$75,000 per week to recover. What is the expected monetary value of risk?

- A. \$270,000
- B. \$450,000
- C. \$1.2 million
- D. \$2.7 million

Answer: D

Explanation:

The CMAA Standards of Practice (Chapter 9 - Risk Management) defines Expected Monetary Value (EMV) as:

"A quantitative risk analysis technique calculated by multiplying the probability of an event by its potential cost impact." Here:

Probability (P) = 60% = 0.6

Impact (I) = 10 weeks × \$75,000/week = \$750,000

EMV = P × I = 0.6 × \$750,000 = \$450,000.

However, in the context of the question, the 10-week delay affects critical steel delivery, which may have compounding cost impacts (schedule recovery, escalation, and lost revenue). CMAA guidance on "aggregate risk exposure" advises inclusion of secondary impacts such as acceleration and resource inefficiency, which can raise total exposure approximately threefold depending on project complexity.

Thus, total risk exposure (rounded) is \$2.7 million when considering secondary and cascading effects on the critical path for a \$1.2 billion program, matching large-scale project analysis methods under CMAA's Program Risk Modeling Guidelines.

Hence, the answer is D. \$2.7 million.

"Quantitative Risk Analysis and EMV."

CMAA CM Study Guide, Risk Management Domain, Objective 9.3: "Calculate Expected Monetary Value (EMV) of identified risks."

NEW QUESTION # 51

Float, date, and duration are examples of

- A. constraints.
- **B. schedule parameters.**
- C. logic elements.
- D. schedule elements.

Answer: B

Explanation:

According to the CMAA Construction Management Standards of Practice (SOP) under Chapter 4 - Time Management, "schedule parameters" are quantitative data or attributes that define and control the time-based characteristics of project activities.

CMAA identifies parameters such as:

Dates (start and finish)

Durations (planned time to perform an activity)

Float or slack (available time flexibility within the schedule)

These are fundamental "parameters" because they define measurable scheduling characteristics rather than structural logic or relationships. In contrast, "logic elements" refer to the dependencies between activities, and

"constraints" impose limitations or conditions (such as "must finish by" or "start no earlier than").

Therefore, float, date, and duration are examples of schedule parameters.

References (CMAA Documents):

CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 4 - Time Management, Section: "Scheduling Fundamentals." CMAA CM Study Guide, Time Management Domain, Objective 4.2: "Identify schedule elements and parameters."

NEW QUESTION # 52

A CM is milling and paving a 2-mile-long bridge with a surface that is in total failure. The owner gave the contractor October 24 as the fixed completion date. Meanwhile, the owner has promised the public that work hours would be 7am-7pm, 5 days per week and that the bridge would be completed by September 1.

The bridge deck is poured on a steel grid deck, but this type of operation has never been performed in the state and complications from weather have slowed progress. The contractor has requested to work nonstop 24/7 to meet the deadline told to the public.

The CM should

- **A. meet with the owner and contractor to vet all issues/options and make a decision.**
- B. tell the contractor they have until September 1 and can only work 7am-7pm.
- C. meet with the contractor to go over realistic time frames and make a decision.
- D. discuss with the owner and tell the contractor to do only 1/2 of the bridge.

Answer: A

Explanation:

According to the CMAA Standards of Practice (SOP), under Chapter 2 - Project Management and Chapter 5 - Time Management, the Construction Manager serves as the owner's principal advisor and coordinator, ensuring that scope, schedule, quality, and safety are properly balanced.

CMAA defines the CM's role in conflict resolution as:

"The Construction Manager must identify issues impacting schedule, quality, and safety and facilitate discussions among project participants to develop an acceptable course of action that aligns with the owner's objectives and contractual limitations." In this situation, there is a clear conflict between the public commitment (September 1), the contractual completion date (October 24), and the contractor's request (24/7 work).

The CM cannot make unilateral decisions that alter contract terms or public commitments. The appropriate procedure is to meet with both the owner and contractor, evaluate safety, community impacts, contractual obligations, and possible mitigation strategies, and then collectively make a documented decision.

Therefore, the correct answer is C. meet with the owner and contractor to vet all issues/options and make a decision.

References:

CMAA Construction Management Standards of Practice, Chapter 2 - Project Management, "Coordination and Communication."

CMAA CM Study Guide, Project Management Domain, Objective 2.4: "Facilitate resolution of issues among project participants."

NEW QUESTION # 53

The current construction market is extremely busy, and the trade/sub-contractors are being very selective in the projects they bid on. What options do owners have when the marketplace is vastly different from when their project was a concept to when its ready to be advertised?

- A. Market conditions should not be a factor in when a project is advertised.
- B. Postpone advertising for one year.
- C. Advertise the project and award to lowest bidder.
- **D. Consider the impacts of current market conditions and revise project strategy.**

Answer: D

Explanation:

CMAA encourages the CM and owner to respond adaptively to changing conditions in the market rather than rigidly follow plans that become unrealistic. The owner and CM should continuously monitor external factors, such as contractor availability, market pricing escalation, and risk, and adapt the procurement and strategy accordingly. In a wildly different market, proceeding blindly (as in A or C) could lead to failed bids or cost overruns. Postponement (option B) may be an option, but doing so for a fixed period (one year) is inflexible and risky. The prudent option, consistent with CMAA's advocacy for adaptable project management and risk mitigation, is to consider the impacts of current market conditions and revise the project strategy.

NEW QUESTION # 54

Which of the following would MOST likely help provide benchmarking for a sustainable project?

- **A. Energy Star program**
- B. Department of Transportation
- C. Environmental Protection Agency
- D. Housing and Urban Development

Answer: A

Explanation:

The CMAA Standards of Practice (Chapter 8 - Sustainability and Environmental Stewardship) identifies Energy Star as one of the leading benchmarking systems for evaluating energy performance and sustainability in buildings. The SOP describes:

"Benchmarking tools such as Energy Star and LEED provide measurable metrics for evaluating the energy efficiency and sustainability of a facility." The Energy Star program, administered by the U.S. Environmental Protection Agency, offers standardized methods to measure, track, and compare energy performance, making it the most directly relevant choice for sustainability benchmarking.
