## Sharing-and-Visibility-Architect トレーニング資料 & Sharing-and-Visibility-Architect 試験勉強書

形式に固執することなく、Sharing-and-Visibility-Architect 学習クイズは5分以内に取得できます。練習資料を入手するために並んだり並んだりする必要はありません。アスペクトをダウンロードするのに効率的であるだけでなく、レビューのプロセスを促進できます。Sharing-and-Visibility-Architect トレーニング資料にはハラーン語は含まれておらず、すべてのページは献身的な熟練した専門家によって書かれています。当社のウェブサイトの専門家は、複雑な概念を簡素化し、例、シミュレーション、および図を追加して、理解しにくいかもしれないことを説明します。したがって、普通の試験官でも難なくすべての学習問題を習得できます。さらに、Sharing-and-Visibility-Architect の候補者は、テストエンジンを使用することで自分自身に利益をもたらす、演習や回答などの多くのテスト問題を取得できます。シラバス全体を短時間で修正するのに役立ちます。

## Salesforce Certified Sharing and Visibility Architect 認定 Sharing-and-Visibility-Architect 試験問題 (Q42-Q47):

### 質問 # 42

Universal Containers has selected a small and diverse group of users to review inactive accounts. Given the Private sharing model, a public group was created and made available to this group of users. A sharing rule was created to make inactive accounts visible to the public group. However, some of these users are reporting they do not see any of the accounts that were shared with the public

group.

What is the underlying issue for these users?

- A. The accounts are owned by users higher in the Role Hierarchy.
- B. The page layout assigned to these users is different than the Account owner.
- **C. The users are in profiles that have no access to the Account object.**

**正解: C**

#### 質問 # 43

Universal Containers has enabled External Default Sharing and wants to allow for external users to have the External Sharing Default set to Public Read-Only for a custom object. Which two options are valid Internal Default sharing settings for the custom object?

- A. Controlled by Parent
- **B. Public Read/Write**
- C. Private
- **D. Public Read Only**

**正解: B、D**

解説:

Explanation

The Internal Default sharing settings for a custom object can be either Public Read/Write or Public Read Only if the External Default sharing setting is set to Public Read Only<sup>1</sup>. Controlled by Parent and Private are not valid options because they would not allow external users to access the custom object records.

#### 質問 # 44

Universal Containers (UC) has a partner community for its 200 distributors. UC customer accounts are .. organization-wide default setting for the custom Delivery object is private.

How can an architect advise UC to grant all users at a distributor access to delivery records for all customer distributor?

- A. Give ownership of the delivery record to a distributor user.
- **B. Create a Sharing set for the Distributor profile to grant access to the Delivery object.**
- C. Create a criteria-based sharing rule that shares delivery records matching the Distributor to user distributor.
- D. Create a criterion- based sharing rule that shares delivery records matching the Distributor to users of a Public Group created for the distributor.

**正解: B**

解説:

Explanation

Creating a Sharing set for the Distributor profile to grant access to the Delivery object is the correct way to share records with users in a partner community. Sharing sets allow you to share records based on a common account or contact<sup>2</sup>. Criteria-based sharing rules are not available for partner communities<sup>3</sup>.

#### 質問 # 45

Universal Containers has implemented Customer Community with Customer Community Plus licenses for its distributors. Some distributors requested granting specific community users (agents) to view cases submitted by other agents of the same distributor. Which feature only supports these requirements?

- A. Delegate external user
- **B. Partner super user**
- C. Permission set to grant community admin permission

**正解: B**

解説:

The Partner Super User feature allows certain community users to access records owned by other users within the same account.

This feature is ideal for distributors needing some agents to view cases submitted by others within their organization. It provides broader access to records that are normally restricted by default sharing rules while ensuring the access scope remains confined to users linked by the same account.

\* Option A: Granting community admin permission through permission sets is not supported for community users; this is an admin-level feature.

\* Option B: Delegating external users allows managing other users, but it doesn't meet the requirement to share case visibility among users of the same account.

\* Option C (Correct): Partner Super User enables the required sharing while adhering to the community's sharing model.

:

Partner Super User Access

#### 質問 # 46

Which two reasons should the Architect consider regarding the use of Apex Sharing Reasons?

Choose 2 answers

- **A. Ensuring the Share record is not deleted upon ownership change.**
- **B. Ensuring the developer can more easily troubleshoot programmatic sharing**
- C. Ensuring there is additional criteria available for Criteria-Based Sharing.
- D. Ensuring the Share record is deleted upon ownership change.

正解: A、B

解説:

Explanation

The two reasons that the architect should consider regarding the use of Apex sharing reasons are A and B.

Option A allows the developer to more easily troubleshoot programmatic sharing, as they can identify which sharing records are created by which Apex code. Option B prevents the share record from being deleted upon ownership change, as Apex sharing reasons are not subject to recalculation by Salesforce. The other options are either incorrect or irrelevant.

#### 質問 # 47

.....

Sharing-and-Visibility-Architect試験は難しいです。だから、Sharing-and-Visibility-Architect復習教材を買いました。本当に助かりました。先月、Sharing-and-Visibility-Architect試験に参加しました。今日は、試験の結果をチェックし、嬉しいことに、Sharing-and-Visibility-Architect試験に合格しました。Sharing-and-Visibility-Architect復習教材は有効的な資料です。
