

# High DEP-2025 Passing Score - DEP-2025 Latest Dumps Files

BTW, DOWNLOAD part of CramPDF DEP-2025 dumps from Cloud Storage: <https://drive.google.com/open?id=1Q25qbmAEWtQlfrQaOGWCPwZkPQeJCSmE>

DEP-2025 study material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction. During your installation, DEP-2025 exam questions hired dedicated experts to provide you with free remote online guidance. During your studies, DEP-2025 Exam Torrent also provides you with free online services for 24 hours, regardless of where and when you are, as long as an email, we will solve all the problems for you. At the same time, if you fail to pass the exam after you have purchased DEP-2025 training materials, you just need to submit your transcript to our customer service staff and you will receive a full refund.

## Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Device Enrollment:</b> This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Plan a Deployment:</b> This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Apple Configurator:</b> This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Apple Business Manager and Apple School Manager:</b> This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Device Setup:</b> This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.</li> </ul>

## CramPDF Offer The Apple DEP-2025 Exam Questions In Three Versions

Apple Deployment and Management Exam DEP-2025 exam dumps are available in an eBook and software format. Many people get burdened when they hear of preparing for a Apple Deployment and Management Exam DEP-2025 examination with software. Apple DEP-2025 Practice Exam software is easy to use. You don't need to have prior knowledge or training using our DEP-2025 exam questions. Apple DEP-2025 exam dumps are user-friendly interfaces.

## Apple Deployment and Management Exam Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Which type of enrollment requires a Managed Apple ID?

- A. Automated Device Enrollment
- **B. User Enrollment**
- C. Device Enrollment

**Answer: B**

Explanation:

User Enrollment, designed for BYOD, requires a Managed Apple ID to separate personal and managed data on the device. The Managed Apple ID authenticates the user for organizational policies while preserving personal privacy. Automated Device Enrollment (option A) and Device Enrollment (option B) are for organization-owned devices and don't inherently require Managed Apple IDs, though they can use them optionally. The Apple Platform Deployment Guide specifies that User Enrollment relies on Managed Apple IDs for its functionality.

Reference: Apple Platform Deployment Guide (Chapter: User Enrollment).

### NEW QUESTION # 15

What's the most commonly deployed authentication technology that both AD and SSO use?

- A. MSCHAPv2
- B. SAML
- **C. Kerberos**
- D. OAuth

**Answer: C**

Explanation:

Kerberos is the most widely deployed authentication technology used by both Active Directory (AD) and single sign-on (SSO) systems in enterprise environments. It provides secure, ticket-based authentication, allowing users to access multiple services with a single set of credentials. AD relies on Kerberos as its default protocol, and Apple's SSO integration with AD leverages Kerberos for seamless authentication on macOS and iOS. MSCHAPv2 (option B) is used in VPNs, not broadly in AD or SSO. OAuth (option C) and SAML (option D) are modern web-based standards, less common in traditional AD-SSO integration. The Apple Platform Security Guide confirms Kerberos' prevalence.

#### NEW QUESTION # 16

You're planning an Apple content caching infrastructure, and you want to optimize the local network traffic. Which is the best strategy?

- A. Use AssetCacheManagerUtil loadcache to preload commonly downloaded apps every night.
- B. Use the Content Caching payload to enable authenticated content caching.
- **C. Use an MDM restriction to prevent content caching from being turned on for every user's managed Mac.**
- D. Use an MDM restriction to prevent content caching from being turned off for every user's managed Mac.

**Answer: C**

Explanation:

Apple's Content Caching service is powerful for bandwidth optimization, but unmanaged deployments can cause inefficiencies if every user enables caching on their Mac. Apple Learning recommends controlling this centrally. The best strategy is to use an MDM restriction to prevent content caching from being turned on for every user's managed Mac, ensuring only designated caching servers (such as Mac mini or lab servers) perform this role. This prevents network fragmentation where multiple unmanaged caches might compete or misdirect traffic. AssetCacheManagerUtil can preload content but does not scale efficiently. Authenticated content caching is for restricting access, not optimizing traffic. Preventing user-enabled caching maintains centralized control, ensuring caching infrastructure is efficient, secure, and optimized across the organization's subnets.

#### NEW QUESTION # 17

What must be installed on a device so you can manage it with MDM?

- A. A supervision identity
- **B. An enrollment profile**
- C. Apple Configurator
- D. A provisioning profile

**Answer: B**

Explanation:

An enrollment profile establishes MDM control. The Mobile Device Management Protocol Reference states, "An enrollment profile must be installed on a device to establish a connection with the MDM solution, enabling management." Options A, B, and D are unrelated to basic MDM enrollment.

Reference:

Mobile Device Management Protocol Reference, "Enrollment" section.

Apple Platform Deployment Guide, "MDM Basics" section.

#### NEW QUESTION # 18

What must you download from Apple Business Manager and then upload to MDM to configure Managed Distribution of apps?

- A. A device token
- B. A public key certificate
- **C. A content token**
- D. A private key certificate

**Answer: C**
