IIBA-AAC exam covers various topics related to agile analysis, including agile methodologies, principles and practices, agile frameworks, value-driven delivery, stakeholder engagement, and adaptive planning. IIBA-AAC exam is designed to test the candidate's ability to apply agile principles and practices to business analysis activities, such as eliciting requirements, analyzing data, and facilitating communication between stakeholders. IIBA-AAC Exam is also intended to assess the candidate's knowledge of agile tools and techniques, such as user stories, backlog grooming, and sprint planning.

## IIBA Agile Analysis Certification Sample Questions (Q140-Q145):

### NEW QUESTION # 140

The team is identifying people who can provide in-depth and detailed feedback regarding the solution and who will have direct

interaction with the solution. This is considered part of the following BA Task:

- A. Plan Iteration Delivery
- B. Plan Business Analysis Governance
- **C. Plan Stakeholder Engagement**
- D. Plan Business Analysis Approach

**Answer: C**

Explanation:

Planning Stakeholder Engagement is a critical task that involves identifying the right individuals to participate in the agile process. The goal is to find stakeholders who can provide specific, detailed feedback and who will be the primary users of the final solution. In an agile environment, direct interaction between the delivery team and these stakeholders is essential for validating assumptions and refining the product backlog.

By planning how and when to engage these individuals, the practitioner ensures that the feedback loop is efficient and that user needs are captured accurately. Effective engagement planning fosters collaboration, builds trust, and ensures that the solution being developed is human-centric. This proactive involvement of the right people reduces the risk of rework and ensures that the delivered increments truly meet customer expectations.

#### **NEW QUESTION # 141**

A team discussion focuses on six key terms. These six terms have a common meaning and are used to discuss both business analysis and its relationship with common terminology. These terms are described in the:

- A. Stakeholder Map
- B. Strategic Plan
- **C. Business Analysis Core Concept Model**
- D. Business Analysis Scope Model

**Answer: C**

Explanation:

Explanation/Reference: [https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension\\_V2-Member-Copy.pdf](https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member-Copy.pdf) (18)

#### **NEW QUESTION # 142**

During a project to improve efficiency at a customer service center, the product owner has established that a 15% improvement from the start on each of a specific set of 5 measures is the target for a particular initiative. They meet this goal and move on to a new initiative. Having a metric and a target helped them do what activity?

- A. Prioritize the next initiative
- B. Determine if the need is satisfied
- C. Assess stakeholder compliance
- **D. Analyze to determine what is valuable**

**Answer: D**

Explanation:

Explanation

#### **NEW QUESTION # 143**

While discussing the initiative, the team considers cancelling the remaining work. This is an example of the following agile business analysis principle:

- **A. See the whole**
- B. Get real using examples
- C. Understand what is doable
- D. Stimulate collaboration and continuous improvement

**Answer: A**

Explanation:

===== The decision to cancel remaining work on an initiative is a direct application of the "See the Whole" principle. This principle encourages the team to look beyond local tasks and consider the entire system and the overarching goals of the organization. If the team determines that the desired value has already been achieved or that the remaining components will not provide sufficient additional benefit to justify the cost, they must have the courage to stop. "Seeing the Whole" allows the team to recognize that continuing a low-value initiative is a waste of organizational resources that could be better utilized elsewhere. This holistic view ensures that the enterprise portfolio remains optimized for value delivery and that the team's efforts are always aligned with the most significant needs of the business.

#### NEW QUESTION # 144

In the past, a team has been unable to deliver solutions in a timely manner and they feel this is due to the customer being unable to decide what they want. The team has decided to ask the customer to "sign-off" on their requirements. This violates the following value statement:

- A. Individuals and interactions over process and tools
- **B. Prioritizing outputs over outcomes**
- C. Working solutions over comprehensive documentation
- D. Customer collaboration over contract negotiation

**Answer: B**
