## EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q87-Q92):

### NEW QUESTION # 87

If the result of an NPV is positive, then the project should be selected. The net present value shows the present value of the project, based on the decisions taken for its selection. What is the net present value equal to?

- A. Initial investment - Future value
- B. Total investment - Discounted cash
- C. **Average profit - Annual investment**
- D. Net profit - per capita income

**Answer: C**

Explanation:

Understanding NPV

\* Net Present Value (NPV) is the difference between the present value of cash inflows and the present value of cash outflows over a period. It is used to determine the profitability of an investment or project.

\* The formula involves annual profit and annual investment and indicates whether the project is financially viable.

Why Not Other Options?

- \* A. Net profit - per capita income: Not related to NPV calculations.
- \* B. Total investment - Discounted cash: Misleading and not reflective of NPV.
- \* D. Initial investment - Future value: Incorrect; future value is not part of NPV.

EC-Council References

\* NPV is a key metric in project selection processes and is highlighted in financial decision-making frameworks for CISOs.

### NEW QUESTION # 88

Scenario: As you begin to develop the program for your organization, you assess the corporate culture and determine that there is a pervasive opinion that the security program only slows things down and limits the performance of the "real workers." Which group of people should be consulted when developing your security program?

- A. Peers
- B. End Users
- **C. All of the above**
- D. Executive Management

**Answer: C**

### NEW QUESTION # 89

The process to evaluate the technical and non-technical security controls of an IT system to validate that a given design and implementation meet a specific set of security requirements is called \_\_\_\_\_.

- A. Alignment with business practices and goals.
- B. Security system analysis
- **C. Security certification**
- D. Security accreditation

**Answer: C**

### NEW QUESTION # 90

How often should the Statements of Standards for Attestation Engagements-16 (SSAE16)/International Standard on Assurance Engagements 3402 (ISAE3402) report of your vendors be reviewed?

- **A. Annually**
- B. Bi-annually
- C. Quarterly
- D. Semi-annually

**Answer: A**

Explanation:

\* SSAE16/ISAE3402 reports should be reviewed annually to evaluate vendor compliance with agreed- upon controls and identify any risks or gaps in their processes.

\* Annual reviews align with standard auditing practices and vendor contract expectations.

Why Other Options Are Incorrect:

- \* A. Quarterly: This frequency is unnecessary unless specific risks require closer monitoring.
- \* B. Semi-annually: Twice a year reviews may be overkill for standard vendor operations.
- \* C. Bi-annually: The term "bi-annually" could mean either twice a year or every two years, leading to ambiguity and potential non-compliance.

EC-Council CISO Reference: Vendor management processes, including the annual review of attestation reports, are a key component of the CISO role.

## NEW QUESTION # 91

Using the Transport Layer Security (TLS) protocol enables a client in a network to be:

- A. Assured of the server's identity
- B. Registered by the server
- C. Provided with a digital signature
- D. Identified by a network

**Answer: A**

### Explanation:
