Are you planning to appear in the SAP Certified Associate - SAP Generative AI Developer (C-AIG-2412) certification test and need to know where to get updated practice questions? Then you are at the right place because SAP Certified Associate - SAP Generative AI Developer (C-AIG-2412) has made the learning material for the applicants to prepare successfully for the certification exam in a short time.

SAP C-AIG-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.
Topic 2	• Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 3	• Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.
Topic 4	• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

Unparalleled Useful C-AIG-2412 Dumps Covers the Entire Syllabus of C-AIG-2412

With all the information, we can say that your focus should be on real SAP C-AIG-2412 questions of Prep4sureGuide to clear the SAP Certified Associate - SAP Generative AI Developer (C-AIG-2412) test. Three formats of the C-AIG-2412 exam dumps shall collectively contribute to your success in this regard. In addition, this C-AIG-2412 prep material comes with up to 365 days of free SAP Dumps updates and a free demo.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q52-Q57):

NEW QUESTION # 52

What are the benefits of SAP's generative AI hub? Note: There are 2 correct answers to this question.

- A. Build custom AI solutions and extend SAP applications
- B. Send your data to various LLM providers for training feedback
- C. Provide libraries for no-code development
- D. Accelerate AI development with flexible access to a broad range of models

Answer: A,D

Explanation:

SAP's Generative AI Hub offers several benefits that enhance AI development and integration within business processes:

1. Accelerate AI Development with Flexible Access to a Broad Range of Models:

* Diverse Model Access: The Generative AI Hub provides instant access to a wide array of large language models (LLMs) from various providers, such as GPT-4 by Azure OpenAI and open-source models like Falcon-40b.

* Flexible Integration: This access allows developers to select and utilize the most suitable models for their specific use cases, thereby accelerating AI development and deployment.

2. Build Custom AI Solutions and Extend SAP Applications:

* Custom AI Solutions: The hub offers a comprehensive toolset for building custom AI solutions, including prompt engineering tools, SDKs, and fine-tuning services.

* Extending SAP Applications: Developers can leverage these tools to create AI-powered extensions for SAP applications like SAP S/4HANA and SAP SuccessFactors, enhancing their functionality and adaptability.

NEW QUESTION # 53

You want to use the orchestration service through SAP's generative-AI-hub-sdk.

What does the following code do?

```
from gen_ai_hub.orchestration.models.llm import LLM
```

```
llm =
```

```
LLM(name="gpt-40", version="latest", parameters={"max_tokens": 256, "temperature": 0.2})
```

- A. Define the Template and Default Input Values
- B. Define the LLM
- C. Create the Orchestration Configuration
- D. Run the Orchestration Request

Answer: B

NEW QUESTION # 54

What are some benefits of SAP Business AI? Note: There are 3 correct answers to this question.

- A. Automatic human emotion recognition
- B. Face detection and face recognition
- C. Intelligent business document processing
- D. AI-powered forecasting and predictions
- E. Personalized recommendations based on AI algorithms

Answer: C,D,E

NEW QUESTION # 55

What is the primary function of the generative AI hub in SAP's AI Foundation?

- A. To serve as an abstraction layer to access a range of foundation AI models
- B. To manage the AI lifecycle efforts end-to-end
- C. To store embeddings of unstructured data for semantic data retrieval
- D. To provide ready-to-use AI services for document processing

Answer: A

NEW QUESTION # 56

You want to assign urgency and sentiment categories to a large number of customer emails. You want to get a valid json string output for creating custom applications. You decide to develop a prompt for the same using generative AI hub.

What is the main purpose of the following code in this context?

prompt_test = ""Your task is to extract and categorize messages. Here are some examples:

{{?technique_examples}}

Use the examples when extract and categorize the following message:

{{?input}}

Extract and return a json with the following keys and values:

-"urgency" as one of {{?urgency}}

-"sentiment" as one of {{?sentiment}}

"categories" list of the best matching support category tags from: {{?categories}} Your complete message should be a valid json string that can be read directly and only contains the keys mentioned in t import random random.seed(42) k = 3 examples random

sample (dev_set, k) example_template = ""<example> {example_input} examples

"\n--\n'.join([example_template.format(example_input=example["message"], example_output=json.dumps(example["f_test =

partial(send_request, prompt=prompt_test, technique_examples=examples, **option_lists) response =

f_test(input=mail["message"])

- A. Evaluate the performance of a language model using few-shot learning
- B. Train a language model from scratch
- C. Generate random examples for language model training
- D. Preprocess a dataset for machine learning

Answer: A

Explanation:

The provided code is designed to evaluate the performance of a language model in assigning urgency and sentiment categories to customer emails by utilizing few-shot learning within SAP's Generative AI Hub.

1. Few-Shot Learning in Prompt Engineering:

* Definition: Few-shot learning involves providing a language model with a limited number of examples to enable it to perform a specific task effectively. In this context, the model is given a few examples of categorized messages to learn how to assign urgency and sentiment to new, unseen emails.

2. Code Functionality:

* Prompt Template Creation: The prompt_test variable defines a template that instructs the model to extract and categorize messages, specifying the desired output format as a JSON string.

* Example Selection: The code randomly selects a subset of examples from a development set (dev_set) to include in the prompt, demonstrating the expected input-output pairs to the model.

* Model Interaction: The function f_test sends the constructed prompt, along with the input message, to the language model for processing.

* Response Handling: The model's response is expected to be a JSON string containing the assigned urgency, sentiment, and categories for the input message.

3. Purpose of the Code:

* Performance Evaluation: By using few-shot learning, the code evaluates how well the language model can generalize from the provided examples to accurately categorize new customer emails. This approach assesses the model's ability to understand and apply the categorization criteria based on minimal training data.

NEW QUESTION # 57

Prep4sureGuide C-AIG-2412 Desktop Practice Exam Software: In the Desktop C-AIG-2412 practice exam software version of C-AIG-2412 practice test is updated and real. The software is useable on Windows-based computers and laptops. There is a demo of the SAP Certified Associate - SAP Generative AI Developer (C-AIG-2412) practice exam which is totally free. SAP C-AIG-2412 practice test is very customizable and you can adjust its time and number of questions.
