## Pass Guaranteed 2026 CIS-DF: Trustable Certified Implementation Specialist - Data Foundations (CMDB and CSDM) New Questions

Our ServiceNow CIS-DF practice exam simulator mirrors the ServiceNow CIS-DF exam experience, so you know what to anticipate on Certified Implementation Specialist - Data Foundations (CMDB and CSDM) day. Our ServiceNow CIS-DF practice

test software features various question styles and levels, so you can customize your ServiceNow CIS-DF Exam Questions preparation to meet your needs.

## ServiceNow Certified Implementation Specialist - Data Foundations (CMDB and CSDM) Sample Questions (Q114-Q119):

### NEW QUESTION # 114

A new ServiceNow customer is assembling a Configuration Management team to support their CMDB.

Drag each role to its corresponding job description.

CI Analyst	<p><b>Answer Area</b></p> <div style="border: 1px dashed gray; height: 20px; width: 100%;"></div> <div style="border: 1px dashed gray; height: 20px; width: 100%;"></div> <div style="border: 1px dashed gray; height: 20px; width: 100%;"></div> <div style="border: 1px dashed gray; height: 20px; width: 100%;"></div>	Has read-only access to CMDB data and to basic user interface such as CMDB reports and dashboards
CMDB Process Owner		Accountable for managing all elements that make up a portfolio throughout their entire lifecycle
Configuration Manager/CMDB Admin		Manages assigned CI tables and keeps records updated and resolves tasks related to CMDB records
Service or Product Owner		Obtains highest level role for CMDB privileges

**Answer:**

Explanation:

CI Analyst	<p><b>Answer Area</b></p> <div style="border: 2px dashed red; padding: 2px;">CMDB Process Owner</div> <div style="border: 2px dashed red; padding: 2px;">Service or Product Owner</div> <div style="border: 2px dashed red; padding: 2px;">CI Analyst</div> <div style="border: 2px dashed red; padding: 2px;">Configuration Manager/CMDB Admin</div>	Has read-only access to CMDB data and to basic user interface such as CMDB reports and dashboards
CMDB Process Owner		Accountable for managing all elements that make up a portfolio throughout their entire lifecycle
Configuration Manager/CMDB Admin		Manages assigned CI tables and keeps records updated and resolves tasks related to CMDB records
Service or Product Owner		Obtains highest level role for CMDB privileges

Explanation:

CI Analyst # Manages assigned CI tables, keeps records updated, and resolves tasks related to CMDB records  
 Service or Product Owner # Accountable for managing all elements that make up a portfolio throughout their entire lifecycle  
 Configuration Manager / CMDB Admin # Obtains the highest-level role for CMDB privileges  
 CMDB Process Owner # Has read-only access to CMDB data and to basic user interfaces such as CMDB reports and dashboards

### NEW QUESTION # 115

You are modeling a customer-facing Email Service delivered via multiple application instances and underlying servers. How should this be modeled in CSDM?

- A. Email Service → Application
- **B. Email Service → Application Services → Infrastructure CIs**
- C. Email Service → Servers
- D. Email Service → Technical Service → Servers

**Answer: B**

Explanation:

Correct CSDM layering is:

Business Service → Application Service → Infrastructure CIs.

### NEW QUESTION # 116

A customer's CMDB is aligned to the CSDM Walk stage.  
What benefit is provided by the CMDB?

- A. Improves the implementation velocity of APM Foundation for future business application rationalization
- **B. Enables impact assessments for incident, problem, and change on Business Services**
- C. Allows for additional stratification of technical teams' support structure along the lines of OLAs and commitments

**Answer: B**

### NEW QUESTION # 117

ACMDB Data Manager needs to access the ServiceNow platform to create, publish, and manage policies that automate and govern CI lifecycle operations, ensuring the CMDB remains healthy and efficient.  
Where can the Data Manager do this?

- **A. CMDB Workspace - Management tab**
- B. CI Class Manager
- C. CMDB Workspace - CMDB 360 tab
- D. Service Operations Workspace

**Answer: A**

Explanation:

The CMDB Data Manager performs governance activities such as creating, publishing, and managing lifecycle policies (archival, certification, attestation, cleanup) to ensure long-term CMDB health. These activities are executed within the CMDB Workspace, specifically under the Management tab.

In ServiceNow, the CMDB Workspace - Management tab is the centralized location for CMDB governance operations. From here, Data Managers can define policy logic, assign ownership, schedule execution, monitor outcomes, and manage remediation tasks generated by those policies.

Option A (CMDB 360 tab) focuses on visibility and analysis of CI data and relationships, not policy authoring.

Option B (Service Operations Workspace) is used for operational response and service monitoring, not CMDB governance. Option C (CI Class Manager) is used to define class hierarchy and ownership, but it does not manage lifecycle policies.

Therefore, the correct location for CMDB Data Manager policy management is CMDB Workspace - Management tab, making Option D correct.

### NEW QUESTION # 118

A ServiceNow Administrator wants to implement Service Graph Connectors to provide integrations to many third-party solutions that the company wants integrated into the CMDB. Which categories of connectors are available to the Administrator?

- A. Workflow Automation
- **B. Cloud**
- C. DevOps
- **D. Observability**

**Answer: B,D**

Explanation:

Service Graph Connectors are a key Data Foundations ingestion capability in ServiceNow. They provide out-of-the-box, upgrade-safe integrations that ingest data into the CMDB using the Identification and Reconciliation Engine (IRE), ensuring data quality and source governance.

Two primary categories of Service Graph Connectors are:

Cloud (Option A): These connectors integrate with major cloud providers and platforms (such as AWS, Azure, and GCP) to ingest infrastructure, platform, and service data into the CMDB. They are essential for managing hybrid and multi-cloud environments and maintaining accurate cloud CI relationships.

Observability (Option B): These connectors integrate with monitoring and observability tools (such as APM, infrastructure monitoring, and telemetry platforms). They provide near-real-time operational data that enriches CI records and supports incident correlation, impact analysis, and service health insights.

## NEW QUESTION # 119

.....

Different from general education training software, our CIS-DF exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the CIS-DF exam, so little time great convenience for some workers, how efficiency it is. Time is money, in today's increasingly pay attention to efficiency, we should use time in the right place, with low time get high scores in return, the CIS-DF Latest Exam torrents are very good to do this.
