Salesforce Certified Platform App Builder Sample Questions (Q272-Q277):

NEW QUESTION # 272

A Service Coordinator (SC) for Ursa Major Solar (UMS) does a final review of work orders owned by a technician for a specific region before the records are submitted for an invoice. Before closing out the work order, the SC needs to modify data or remove attachments that were added by mistake. The SC also needs access to any other related records owned by the technician. What solution would provide the required access, given a private data model?

- A. Change work order access on the SC's profile to 'Modify All.
- B. Put the SC in the role hierarchy above the technicians whose work orders they review.

- C. Give the SC a permission set with the Modify All Data system permission.
- D. Create a workflow rule that updates records owned by technicians in that region with the SC.

Answer: B

Explanation:

Putting the SC in the role hierarchy above the technicians whose work orders they review will provide the required access, given a private data model. The role hierarchy determines how users can access records they do not own. Users at any given role level can view, edit, and report on all data owned by or shared with users below them in the role hierarchy.

NEW QUESTION # 273

UVC's CFO has asked that all deals with more than a 40% discount get automatically sent to the VP of Finance. He will review these deals without the sales rep needing to take action. Which two ways can this be accomplished without building code? Choose two answer
