

AWS-Developer Test Guide Online - AWS-Developer Certification Dumps

A startup's photo-sharing site is deployed in a VPC. An ELB distributes web traffic across two subnets. ELB session stickiness is configured to use the AWS-generated session cookie, with a session TTL of 5 minutes. The webserver Auto Scaling Group is configured as: min-size=4, max-size=4. The startup is preparing for a public launch, by running load-testing software installed on a single EC2 instance running in us-west-2.

After 60 minutes of load-testing, the webserver logs show:

WEBSERVER CODE	# of HTTP requests	# of HTTP requests
	From load-tester	From private beta users
webserver #1 (subnet in us-west-2a)	32,223	434
webserver #2 (subnet in us-west-2a)	31,780	480
webserver #3 (subnet in us-west-2b)	0	417
webserver #4 (subnet in us-west-2b)	0	426

Which recommendations can help ensure load-testing HTTP requests are evenly distributed across the four web servers? (Choose two.)

A. Launch and run the load-tester EC2 instance from us-east-1 instead.
 B. Reconfigure the load-testing software to re-use DNS for each web request.

First and foremost, even though our company has become the staunch force in this field for almost ten years and our AWS-Developer exam questions have enjoyed such a quick sale in the international market we still keep an affordable price for our customers. Second, we have prepared free demo in this website for our customers to have the first-hand experience of the AWS-Developer Latest Torrent compiled by our company before making their final decision. So do not hesitate any more, just hurry up to buy our AWS-Developer test question which will never let you down.

Amazon AWS-Certified-Developer-Associate Exam is designed to test the candidate's knowledge and expertise in developing and deploying cloud-based applications using Amazon Web Services (AWS). AWS Certified Developer Associate Exam (DVA-C02) certification proves that the candidate has a thorough understanding of AWS services, such as Elastic Compute Cloud (EC2), Simple Storage Service (S3), and Relational Database Service (RDS), and can use them effectively to develop and deploy scalable, secure, and fault-tolerant applications.

To prepare for the AWS Certified Developer - Associate exam, candidates should have a solid understanding of AWS services and be proficient in at least one programming language. Candidates should also have experience developing applications on the AWS platform and be familiar with AWS development tools such as AWS Elastic Beanstalk and AWS CodeDeploy. By passing the AWS Certified Developer - Associate exam, developers can demonstrate their proficiency in working with AWS and increase their career opportunities in cloud computing.

The AWS Certified Developer - Associate certification exam is an excellent way for developers to validate their AWS skills and improve their career prospects. Whether you are new to AWS or have years of experience working with the platform, earning this certification can help you stand out from the crowd and demonstrate your expertise in developing and deploying cloud-based applications on AWS.

Our AWS-Developer study questions are efficient and can guarantee that you can pass the AWS-Developer exam easily. But if you buy our AWS-Developer exam torrent you can save your time and energy and spare time to do other things.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q76-Q81):

NEW QUESTION # 76

A developer tested an application locally and then deployed it to AWS Lambda. While testing the application remotely, the Lambda function fails with an access denied message.

How can this issue be addressed?

- A. Update the Lambda function's resource policy to include the missing permissions.
- **B. Update the Lambda function's execution role to include the missing permissions.**
- C. Redeploy the Lambda function using an account with access to the AdministratorAccess policy.
- D. Include an IAM policy document at the root of the deployment package and redeploy the Lambda function.

Answer: B

Explanation:

Explanation/Reference: <https://aws.amazon.com/premiumsupport/knowledge-center/access-denied-lambda-s3-bucket/>

NEW QUESTION # 77

When developing an AWS Lambda function that processes Amazon Kinesis Data Streams, Administrators within the company must receive a notice that includes the processed data.

How should the Developer write the function to send processed data to the Administrators?

- **A. Use Amazon CloudWatch Events to send the processed data**
- B. Publish the processed data to an Amazon SNS topic
- C. Push the processed data to Amazon SQS
- D. Separate the Lambda handler from the core logic

Answer: A

NEW QUESTION # 78

A company needs a fully-managed source control service that will work in AWS. The service must ensure that revision control synchronizes multiple distributed repositories by exchanging sets of changes peer-to-peer. All users need to work productively even when not connected to a network.

Which source control service should be used?

- A. AWS CodeBuild
- B. Subversion
- C. AWS CodeStar
- **D. AWS CodeCommit**

Answer: D

NEW QUESTION # 79

A Developer is testing a Docker-based application that uses the AWS SDK to interact with Amazon DynamoDB. In the local development environment, the application has used IAM access keys. The application is now ready for deployment onto an ECS cluster.

How should the application authenticate with AWS services in production?

- A. Configure the credentials file with a new access key/secret access key
- B. Configure AWS access key/secret access key environment variables with new credentials
- **C. Configure an ECS task IAM role for the application to use**
- D. Refactor the application to call AWS STS AssumeRole based on an instance role

Answer: C

Explanation:

Explanation

NEW QUESTION # 80

Which one of the following operations is NOT a DynamoDB operation?

- A. BatchWriteItem
- **B. BatchDeleteItem**
- C. DescribeTable
- D. BatchGetItem

Answer: B

Explanation:

In DynamoDB, DeleteItem deletes a single item in a table by primary key, but BatchDeleteItem doesn't exist.
