The ITIL 4 Strategist: Direct, Plan and Improve (DPI) (ITIL4-DPI) certification examination is an essential component of professional development, and passing this ITIL ITIL4-DPI test can increase career options and a rise in salary. Nonetheless, getting ready for the Prepare for your ITIL4-DPI Exam may be difficult, and many working professionals have trouble locating the ITIL4-DPI practice questions they need to succeed in this endeavor.

ITIL 4 Strategist: Direct, Plan and Improve (DPI) Sample Questions (Q31-Q36):

NEW QUESTION # 31

At the start of an organizational change initiative, the managers of an organization ensure that stakeholders know what the change is supposed to achieve and encourage them to discuss it.

Which organizational change management requirement does this MOST contribute to?

- A. Clear and relevant objectives
- B. Strong and committed leadership
- C. Sustained improvement
- D. Willing and prepared participants

Answer: D

Explanation:

DPI emphasizes that OCM must create willing and prepared participants by providing clarity on the change's purpose and encouraging open discussion. This builds trust, reduces resistance, and increases engagement. Objectives (A) and leadership (B) are important but are managerial aspects, not participant readiness. Sustained improvement (C) occurs later. The direct outcome of early communication and dialogue is prepared participants.

(Reference: ITIL 4 Strategist DPI, section on "Organizational change management - preparing participants")

NEW QUESTION # 32

A small service provider is experiencing growth and success. Currently, all important decisions are made by a small executive group. This creates delays because some members of the group are often unavailable.

Which is the BEST approach for establishing an authority structure for decision-making within the service provider organization?

- A. Keep high-risk decisions within the executive group, but define a policy for delegating other decisions
- B. Refer decisions to line managers, who will escalate cases to the executive group when appropriate
- C. Ensure that technical decisions are made by the operational staff who can define the risks
- D. Allow people to make decisions about their work, and use training and automation to mitigate the risks

Answer: A

Explanation:

DPI emphasizes governance by defining clear decision-making authority. High-risk or strategic decisions should remain with executives, but less critical decisions must be delegated through policies to appropriate levels of management. This prevents bottlenecks and ensures accountability while balancing governance oversight. Options A and B may reduce delays but lack structured governance, while D risks insufficient control.

(Reference: ITIL 4 Strategist DPI, section on "Delegation of decision-making and governance structures")

NEW QUESTION # 33

A CIO has made value stream mapping a key part of an IT improvement effort. A value stream map for existing services is being developed.

Which approach would produce the BEST results?

- A. Hire process consultants to develop process maps, and minimize the involvement of staff in the design of the future state of the value stream
- B. Ask stakeholders to collaborate to optimize and eliminate waste, and establish metrics for measuring improvement
- C. Hire an organizational change management consultant to identify the attitudes, behaviours, and cultural changes that are required to make value streams more effective
- D. Ask stakeholders to document all value stream activities for which they are responsible, then assign team members to each activity to develop improvements

Answer: B

Explanation:

According to DPI, value stream mapping is collaborative. Stakeholders must work together to identify inefficiencies, optimize flow, and agree on metrics to measure improvement. Option A removes staff engagement, leading to resistance. Option B limits collaboration to documentation, not co-design. Option C addresses change attitudes, not mapping effectiveness. Collaboration + waste elimination + measurement (Option D) reflects Lean/Agile influence in DPI.

(Reference: ITIL 4 Strategist DPI, section on "Value stream mapping - collaborative optimization")

NEW QUESTION # 34

A service provider has developed a strategy to increase its revenue by launching a new cloud storage service.

This strategy is being cascaded down to the technical teams.

Which is a relevant objective that will support the strategy?

- A. Achieve a 10% increase in service requests fulfilled in the target time
- B. Increase profit by launching new wi-fi services into new geographic markets
- C. Average number of storage access failures per month
- D. Design and implement new infrastructure by the end of quarter 2

Answer: D

Explanation:

ITIL DPI emphasizes that objectives must cascade logically from strategy into actionable plans. Since the strategic goal is to launch a new cloud storage service, the technical objective must directly support that initiative. "Design and implement new infrastructure by the end of quarter 2" is aligned, measurable, and time-bound. The other options either do not directly relate to the cloud service (B, C) or are ongoing operational metrics (A), not strategic enablers.

(Reference: ITIL 4 Strategist DPI, section on "Cascading objectives and alignment with strategy")

NEW QUESTION # 35

In an organization, IT teams are working on documented, structured, and systematic processes for all customer-facing work.

Which concept is this an example of?

- A. A balanced scorecard
- B. A method
- C. A risk
- D. A control

Answer: B

Explanation:

In DPI, a method is defined as a structured and systematic approach to performing work, ensuring consistency and repeatability. Documented processes for customer-facing work represent methods applied to service management. A control is something put in place to manage risk, a balanced scorecard is a performance measurement tool, and a risk is a potential event. Hence, "method" is the correct categorization.

(Reference: ITIL 4 Strategist DPI, section on "Policies, controls, and methods")

NEW QUESTION # 36

A calm judgment is worth more than a thousand hasty discussions. I know that when you choose which our ITIL4-DPI exam materials to buy, it will be very tangled up. This is a responsible performance for you. But you can't casually make a choice because of tangle. And our ITIL4-DPI Study Materials won't let you regret. You can just free download the demos of the ITIL4-DPI practice guide to have a check our quality.
