最高のC_S4EWM_2023最新な問題集と素敵なC_S4EWM_2023技術内容

数千人の専門家で構成された権威ある制作チームが、C_S4EWM_2023学習の質問を理解し、質の高い学習体験

を楽しんでいます。試験概要と現在のポリシーの最近の変更に応じて、C_S4EWM_2023テストガイドの内容を随時更新します。また、C_S4EWM_2023試験の質問は、わかりにくい概念を簡素化して学習方法を最適化し、習熟度を高めるのに役立ちます。

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management 認定 C_S4EWM_2023 試験問題 (Q33-Q38):

質問 # 33

Which of the following is a prerequisite for assigning a warehouse order to a resource automatically?

- A. The resource group of the resource must be assigned to the warehouse order creation rule.
- **B. The warehouse order must be picked from the same activity area that is assigned to the resource.**
- C. The creation of a pick-handling unit must be done automatically with a packaging specification.
- D. The warehouse order must be in a queue that is assigned to the resource either directly or through a resource group.

正解: B

質問 # 34

What are the advantages of using a mobile device during physical inventory? Note: There are 2 correct answers to this question.

- **A. It is optional to block bins**
- B. Recounting is never required
- **C. You can use collective counting for bulk storage**
- D. There is a special SAP Fiori app available

正解: A、C

解説:

Comprehensive and Detailed In-Depth Explanation:

Mobile devices enhance physical inventory in SAP EWM. Option A ("You can use collective counting for bulk storage") is correct because RF devices support collective counting, allowing multiple bins to be counted together, configured via transaction /SCWM/RFUI. Option D ("It is optional to block bins") is correct as mobile counting allows flexibility in bin blocking, unlike desktop processes where blocking may be mandatory, set in SPRO: SCM Extended Warehouse Management > Physical Inventory > RF Settings. Option B is incorrect as recounting may still be needed, and option C (SAP Fiori app) is not standard for EWM PI.

質問 # 35

Which of the following actions can you perform from the shipping cockpit? Note: There are 2 correct answers to this question.

- **A. Create waves.**
- B. Post goods receipts.
- **C. Create and check in transportation units.**
- D. Assign outbound delivery orders and inbound deliveries to transportation units.

正解: A、C

解説:

The shipping cockpit in SAP Extended Warehouse Management (EWM) is a centralized tool designed for managing and monitoring shipping processes. The following actions can be performed from the shipping cockpit:

* Create Waves (A):

* Waves are created to group and release outbound delivery orders for picking and further processing.

* This action helps streamline the planning and execution of outbound deliveries.

* Create and Check In Transportation Units (B):

* The shipping cockpit enables the creation and check-in of transportation units (e.g., trucks or containers) for managing goods movement.

* This action ensures proper tracking and handling of shipments.

Incorrect Options:

* C: Assigning outbound delivery orders and inbound deliveries to transportation units is not directly performed from the shipping cockpit but through other EWM functionalities.

* D: Posting goods receipts is related to inbound processes and not typically handled in the shipping cockpit.

質問 # 36

To which object do you assign the replenishment method?

- A. Document category
- B. Document type
- **C. Storage type**
- D. Warehouse process type

正解: C

解説:

Comprehensive and Detailed In-Depth Explanation:

Replenishment in SAP EWM moves stock from reserve to picking areas. Option A ("Storage type") is correct because the replenishment method (e.g., automatic, planned) is assigned to a storage type in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Replenishment > Define Replenishment Control per Storage Type. This determines how replenishment is triggered for that area. Options B, C, and D (document-related or process type) are not directly linked to replenishment method assignment.

質問 # 37

For which processes can you create a direct outbound delivery order? Note: There are 3 correct answers to this question.

- **A. Scrapping**
- **B. Direct sales**
- C. Replenishment
- **D. Issue to cost center**
- E. Staging for Kanban

正解: A、B、D

解説:

Comprehensive and Detailed In-Depth Explanation:

Direct outbound delivery orders (ODOs) in SAP EWM bypass ERP delivery creation. Option B ("Issue to cost center") is correct for internal consumption, option D ("Scrapping") is correct for stock disposal, and option E ("Direct sales") is correct for immediate sales, all initiated via transaction /SCWM/DIRO or SPRO: SCM Extended Warehouse Management > Goods Issue Process > Direct Outbound Delivery. Option A (Kanban) and option C (replenishment) are internal processes, not direct ODOs.

質問 # 38

.....

立派な生活を送るために、彼らはこの試験に関する専門知識の厳密な研究を行いました。SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Managementのトレーニング資料がありますので、完璧な練習資料の検索に時間をかけないでください。C_S4EWM_2023試験準備の熟練度を保証できます。ですから、これは決定的な選択です。つまり、C_S4EWM_2023実践教材は、あなたが成功の成果を得るのに役立つことを意味します。
