

Marvelous JN0-105 Valid Exam Discount - Easy and Guaranteed JN0-105 Exam Success

JN0-105 Exam Detail	
Vendor	Juniper
Exam Code	JN0-105
Full Exam Name	Junos Associate
Number of Questions	65
Sample Questions	Juniper JN0-105 Sample Questions
Practice Exams	Juniper Networks Certified Associate Junos Practice Test
Passing Score	Variable (60-70% Approx.)
Time Limit	90 minutes
Languages	English

100% Guaranteed Success with NWExam.com

P.S. Free & New JN0-105 dumps are available on Google Drive shared by Prep4King: <https://drive.google.com/open?id=1wyzoR5wYs2pvdy5asfeMTj4rLch2eoAe>

To other workers who want to keep up with the time and being competent in today's world, you are also looking for some effective JN0-105 exam prep as well. Without voluminous content to remember, our JN0-105 practice materials contain what you need to know and what the exam want to test, So our JN0-105 Real Exam far transcend others in market. We never avoid our responsibility of offering help for exam candidates like you, so choosing our JN0-105 training guide means you choose success.

In informative level, we should be more efficient. In order to take the initiative, we need to have a strong ability to support the job search. And how to get the test JN0-105 certification in a short time, which determines enough JN0-105 qualification certificates to test our learning ability and application level. Our JN0-105 Exam Questions are specially designed to meet this demand for our worthy customers. As long as you study with our JN0-105 learning guide, you will pass the exam and get the certification for sure.

Download Prep4King Juniper JN0-105 Exam Dumps after Paying Affordable Charges

Once you get the JN0-105 certificate, your life will change greatly. First of all, you will grow into a comprehensive talent under the guidance of our JN0-105 exam materials, which is very popular in the job market. Then you will form a positive outlook, which can aid you to realize your dreams through your constant efforts. Then our JN0-105 learning questions will aid you to regain confidence and courage with the certification as reward. So you will never regret to choose our JN0-105 study materials. Just browser our websites and choose our JN0-105 study materials for you.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q41-Q46):

NEW QUESTION # 41

Click the Exhibit button.

```
[edit firewall filter test]
term 1 {
    from {
        source-address {
            10.0.0.0/8;
        }
    }
    then {
        log;
        next term;
    }
}
term 2 {
    then {
        reject;
    }
}
```

How is traffic, sourced from 10.0.0.0/8, treated by the firewall filter shown in the exhibit?

- A. logged with no further action
- B. **logged and accepted**
- C. logged and discarded
- D. logged and rejected

Answer: B

Explanation:

The firewall filter configuration in the exhibit specifies a filter with two terms. Term 1 matches traffic from the source address 10.0.0.0/8 and has two actions: 'log' and 'next term'. The 'log' action will record the match to a log file, and 'next term' indicates that the firewall should evaluate the next term after logging. There is no explicit action such as 'accept' or 'reject' in term 1, so by default, the traffic will be accepted unless subsequently rejected by another term.

Term 2 has the action 'reject', which discards packets that reach this term. Since there is no 'from' condition in term 2, it acts as a default rule for all traffic not matched by term 1.

Because the traffic sourced from 10.0.0.0/8 matches term 1 and there is no reject action in that term, it will be logged and then accepted by the firewall filter. There is no subsequent term that rejects this specific traffic, so the action from term 2 does not apply to it.

NEW QUESTION # 42

Which two components are included in a transport header? (Choose two.)

- A. source MAC address
- B. **destination port number**
- C. **source port number**
- D. destination MAC address

Answer: B,C

NEW QUESTION # 43

Exhibit.

Referring to the exhibit, which routing configuration is required for these two users to access the remote server?

- A. Users and the server require a default gateway.
- B. A routing protocol must be enabled on the router.
- C. Users must connect directly to the router.
- D. Trunk ports must be enabled on the switch.

Answer: A

Explanation:

For the users in the 10.1.1.0/24 subnet and the server in the 10.1.2.0/24 subnet to communicate with each other, they need to route packets through the router that connects these two subnets. Each user and the server need to have their default gateway set to the IP address of the router interface on their respective subnet (.254). This ensures that packets destined for other subnets are sent to the router, which then routes them to the correct destination subnet.

Reference:

Juniper official documentation: Configuring Basic Routing.

General networking principles.

NEW QUESTION # 44

Click the Exhibit button.

```
[edit protocols ospf]
user@router# show
area 0.0.0.0 {
    interface all;
}
export [ policy1 policy2 policy3 ];
[edit routing-options]
user@router# show
static {
    route 10.10.10.0/24 next-hop 192.168.1.254;
}
```

Referring to the exhibit, OSPF has three export policies that match different static route prefixes. The 10.10.10.0/24 static route does not match any terms in the policy1 routing policy.

What happens next in this scenario?

- A. The static route is evaluated by the policy2 routing policy.
- B. The static route is rejected by the default routing policy.
- C. The static route is rejected by the policy1 routing policy.
- D. The static route is evaluated by the policy3 routing policy.

Answer: A

Explanation:

In Junos, when multiple policies are applied to a routing protocol for route export, the routes are evaluated in the order in which the policies are listed. In the exhibit, the OSPF configuration has three export policies listed: policy1, policy2, and policy3. The static route 10.10.10.0/24 does not match any terms in policy1; therefore, it is not rejected by policy1 but is instead passed on to the next policy in the sequence, which is policy2.

If the static route matches a term in policy2 that permits the route, it will be exported into OSPF. If it does not match in policy2, it will then be evaluated by policy3. If there is no match in policy3 as well, and assuming there are no more policies listed, the route would then be subject to the default routing policy behavior, which typically rejects the route unless an explicit accept statement is present in the policies.

NEW QUESTION # 45

Which two statements are true about the candidate configuration? (Choose two.)

- A. You can discard changes before committing them.
- B. Multiple users cannot modify the same candidate configuration.
- C. You can deploy multiple changes at the same time.
- D. Candidate configuration changes are automatically applied.

Answer: A,C

Explanation:

The candidate configuration in Junos OS is a temporary configuration that allows network administrators to make and stage multiple configuration changes before applying them to the device. This approach enables the deployment of multiple changes in a single operation, ensuring that all configurations work together as intended before making them active. Additionally, the candidate configuration can be discarded if the administrator decides not to apply the staged changes, allowing for a "trial and error" approach without affecting the currently active configuration. This feature provides flexibility and reduces the risk of disruptive changes to the network.

NEW QUESTION # 46

.....

The JN0-105 web-based practice questions carry the above-mentioned notable features of the desktop-based software. This version of Prep4King's JN0-105 practice questions works on Mac, Linux, Android, iOS, and Windows. Our customer does not need troubling plugins or software installations to attempt the web-based JN0-105 Practice Questions. Another benefit is that our JN0-105 online mock test can be taken via all browsers, including Chrome, MS Edge, Internet Explorer, Safari, Opera, and Firefox.
