

100% Pass Quiz 2026 HP High-quality Latest HPE7-J02 Test Blueprint

P.S. Free & New HPE7-J02 dumps are available on Google Drive shared by ExamDumpsVCE: <https://drive.google.com/open?id=19NvkNrQ7uS40vBLEm0BE7V3jRjZ-xePg>

Our product's passing rate is 99% which means that you almost can pass the test with no doubts. The reasons why our HPE7-J02 Test Guide's passing rate is so high are varied. Firstly, our test bank includes two forms and they are the PDF test questions which are selected by the senior lecturer, published authors and professional experts and the practice test software which can test your mastery degree of our Advanced HPE Storage Integrator Solutions Written Exam study question at any time. The two forms cover the syllabus of the entire test. Our questions and answers include all the questions which may appear in the exam and all the approaches to answer the questions. So we provide the strong backing to help clients to help them pass the test.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 2	<ul style="list-style-type: none"> • Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.
Topic 3	<ul style="list-style-type: none"> • Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.
Topic 4	<ul style="list-style-type: none"> • Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.

HPE7-J02 Valid Braindumps & Practice HPE7-J02 Test Online

HPE7-J02 training materials are famous for instant access to download, and you can receive your download link and password

within ten minutes after payment. And if you don't, you don't receive, you can contact with us, we will resolve it for you. Besides, we offer free demo for you, we recommend you to have a try before buying HPE7-J02 Training Materials. You can enjoy free update for 365 days if you choose us, so that you can obtain the latest information timely. And the latest version for HPE7-J02 exam dumps will be sent to your email automatically. You just need to receive them,

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

Your customer has just gone through a merger and is consolidating datacenters. They are currently using a mix of manufacturers. They are evaluating whether to consolidate on HPE as their new standard. You are helping them size their new virtualized environment.

What additional information do you need to decide on an assessment tool?

- A. If any equipment has expired support contracts
- **B. If they are virtualized on VMware or Hyper-V**
- C. If they are only purchasing in a CapEx model
- D. If they are using AWS or Azure public cloud storage

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The choice of assessment tool (e.g., HPE CloudPhysics for VMware vs. CloudPhysics.vhdx collector for Hyper-V) depends primarily on the virtualization platform in use. VMware and Hyper-V require different collectors, and this is the deciding factor for tool selection.

Distractors:

A: Public cloud use matters for hybrid sizing but not for tool selection.

C: Expired contracts are unrelated to tool choice.

D: Procurement model (CapEx vs. GreenLake) is separate from sizing assessment.

Key Concept: Assessment tool choice = based on hypervisor platform (VMware vs Hyper-V).

Reference: HPE CloudPhysics Assessment Guide.

NEW QUESTION # 18

A local startup company has grown rapidly and now needs block storage for enterprise workloads. They are virtualized with VMware and have a small IT staff. They are evaluating an HPE Alletra MP and a Pure FlashArray //X90R4.

Environment:

VMware 8.0

Cisco switches

Dell servers

HPE servers

What statement about HPE should you point out as a differentiator?

- A. HPE has the ability to disable garbage collection and overhead to meet workload requirements.
- B. HPE has live workload migration via the ActiveWorkload feature, based on a stretch cluster.
- C. HPE can natively tier data on a software-only deployment.
- **D. HPE provides full-stack visibility up to the app layer with prescriptive, actionable recommendations.**

Answer: D

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra with InfoSight provides end-to-end visibility from infrastructure through to virtual machines and applications. It offers prescriptive, AI-driven recommendations to simplify management - a key differentiator for startups with small IT staff. Pure arrays do not offer the same level of integrated, cross-stack predictive analytics.

Distractors:

B: "ActiveWorkload" is not an HPE feature - HPE uses Peer Persistence for stretch clusters.

C: Garbage collection is managed automatically in HPE arrays; disabling it is not supported.

D: Data tiering is not natively provided as "software-only" - HPE uses GreenLake and Alletra services.
Key Concept: InfoSight = predictive analytics and app-to-infra visibility differentiator.
Reference: HPE InfoSight for Alletra Datasheet.

NEW QUESTION # 19

Your customer is beginning to convert their applications to cloud-native apps on Kubernetes. They are considering HPE GreenLake for Containers.

Which statement about this platform is true?

- A. Supports only cloud-native applications.
- B. Provides tools for orchestration of containers without microservices support.
- C. Supports legacy virtualization technologies with manual configuration for containers.
- **D. Provides open-source Kubernetes with simplified management.**

Answer: D

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for Containers delivers an enterprise-grade Kubernetes platform, leveraging open-source Kubernetes but with simplified lifecycle management, monitoring, and integration with HPE infrastructure. It provides full support for containerized workloads, whether cloud-native or modernized traditional applications.

Distractors:

A: Incorrect - not about legacy virtualization.

B: Incorrect - microservices are supported; orchestration is Kubernetes-native.

D: Incorrect - it supports both cloud-native and modernized workloads.

Key Concept: GreenLake for Containers = Kubernetes with simplified enterprise management.

Reference: HPE GreenLake for Containers Overview.

NEW QUESTION # 20

Refer to the exhibit.

A junior engineer is expanding a StoreOnce deployment for a law firm with a hybrid environment. The customer already has Veeam backing up to StoreOnce 3660 Gen 4 at both primary and secondary sites. They want to add Cloud Bank Storage (CBS) to archive into AWS Glacier tier for compliance. The junior engineer has added Cloud Bank licenses for the 80TB onsite capacity at the primary office.

Question: What does the junior engineer need to add to enable this scenario?

- A. Federated Management
- B. Catalyst License for StoreOnce-B
- C. Cloud Bank Storage for AWS Glacier
- **D. Detach License on StoreOnce-A**

Answer: D

NEW QUESTION # 21

Two HPE Alletra 6000 arrays are configured for peer persistence between datacenters A and B, which have a fiber distance of 50km (31mi). The datacenter B hardware will be relocated to a new location that will increase the fiber distance to 150km (93mi). Which condition is valid once the relocation is finished?

- A. The peer persistence replication links need to be changed to RC transport.
- B. The fiber distance exceeds the distance supported for peer persistence setup.
- C. The peer persistence setup needs to be changed to active peer persistence.
- **D. The peer persistence configuration is supported, when latency remains <10ms.**

Answer: D

Explanation:
