Scrum SSM (SAFe 5 Scrum Master) Exam is a certification program that is aimed at professionals who want to become an expert in the Scrum framework. SSM (6.0) - SAFe® Scrum Master certification program is designed for individuals who want to be a Scrum Master in a SAFe (Scaled Agile Framework) environment. The Scrum Master is responsible for facilitating the Scrum team and ensuring that they follow the Agile principles and values. The Scrum SSM Certification program provides candidates with the knowledge and skills required to effectively perform the role of a Scrum Master in a SAFe environment.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q19-Q24):

NEW QUESTION # 19
What is one benefit of PI Planning?

- A. It aligns the ART to established DevOps practices
- B. It maximizes team capacity
- C. Allows for faster decision-making
- D. It fosters cross-team dependencies

Answer: C

Explanation:
One benefit of PI Planning is that it allows for faster decision-making by bringing together all the members of the Agile Release Train (ART) and the relevant stakeholders in a face-to-face (or virtual) event. PI Planning provides an opportunity for the ART to align on a common vision and mission, review the business context and priorities, identify and resolve dependencies and risks, and commit to a realistic and achievable plan for the next Program Increment (PI). By having everyone involved in the planning process, the ART can leverage the collective knowledge and expertise of the participants, reduce ambiguity and uncertainty, and make informed and timely decisions that support the delivery of value to the customers.

NEW QUESTION # 20
What is one way a Scrum Master/Team Coach can help teams improve flow?

- A. Direct team members to work in their domain of expertise
- B. Work with team members to establish a team Kanban board
- C. Coach team members to combine work into bigger Stories
- D. Encourage hand-offs so each team member can write a Story to capture their piece of the work

Answer: B

Explanation:
Improving flow is a central responsibility of a Scrum Master/Team Coach (SM/TC) in SAFe. One of the most effective ways to enhance flow is by establishing a Team Kanban board with the team.
A Kanban board visualizes the workflow, showing where work items are in the process and helping teams identify bottlenecks or work-in-progress (WIP) issues. By visualizing flow, the team can inspect, measure, and optimize how work moves from "To Do" to "Done." This approach aligns with SAFe's Principle #6: Visualize and Limit WIP, Reduce Batch Sizes, and Manage Queue Lengths, which promotes smoother, faster delivery and higher predictability.
From SAFe guidance:
"Teams use Kanban systems to visualize work, identify bottlenecks, and optimize flow. Scrum Masters/Team Coaches help teams establish and maintain their Kanban to improve throughput and reduce delays." Therefore, the correct answer is B. Work with team members to establish a team Kanban board, as it directly enables better visibility and flow management.

NEW QUESTION # 21
What is one time when a scrum master participates but does not necessarily facilitate?

- A. If the entire team is present during the daily stand-up
- B. when using ad-hoc teams for inspect and adapt

- C. During team breakout sessions at PI planning
