What's more, part of that BraindumpsPrep HPE7-A07 dumps now are free: [https://drive.google.com/open?id=1ed\\_NVF7n3dVT\\_xmX8RdaUy3-pkOZd3Uw](https://drive.google.com/open?id=1ed_NVF7n3dVT_xmX8RdaUy3-pkOZd3Uw)

Having a general review of what you have learnt is quite necessary, since it will make you have a good command of the knowledge points. HPE7-A07 Online test engine is convenient and easy to learn, and it has the testing history and performance review. It supports all web browsers, and you can also have offline practice. Before buying HPE7-A07 Exam Dumps, you can try free demo first, so that you can have a deeper understanding of the exam. We have online and offline chat service for HPE7-A07 training materials. If you have any questions, you can contact us, and we will give you reply as quickly as we can.

If you want to be a more successful person and become the best, the first step you need to take is to have our HPE7-A07 exam questions. Get an internationally certified HPE7-A07 certificate to prove your strength. This is the best way. Your strength and efficiency will really bring you more job opportunities. And our HPE7-A07 study braindumps will help you pass the exam easily and get the certification for sure.

**Pass-Sure Trustworthy HPE7-A07 Pdf – Updated Examcollection Dumps  
Provider for HPE7-A07: Aruba Certified Campus Access Mobility Expert**

## Written Exam

Everything is changing so fast. So do not reject challenging new things. Our HPE7-A07 study materials absolutely can add more pleasure to your life. You just need a chance to walk out. You can click to see the comments of the HPE7-A07 exam braindumps and how we changed their life by helping them get the HPE7-A07 Certification. And you can also see the pass rate of our HPE7-A07 learning guide high as 98% to 100%, we can give you a promising future.

### HP Aruba Certified Campus Access Mobility Expert Written Exam Sample Questions (Q90-Q95):

#### NEW QUESTION # 90

A BGP routing table contains multiple routes to the same destination prefix.  
Referring to the table below, which route would be marked with a ">" symbol?

- A. C
- B. B
- C. A
- D. D
- **E. E**

**Answer: E**

Explanation:

The Aruba AOS-CX BGP Best Path Selection Process determines which route becomes the active (>) route in the BGP routing table.

This process is consistent with RFC 4271 but detailed in HPE's Aruba AOS-CX Routing Guide and ACSP Study Guide - BGP and Dynamic Routing.

Extract 1 - BGP Path Selection Hierarchy (Aruba AOS-CX Routing Guide)

"When multiple BGP routes exist to the same destination, the router uses the following decision sequence to select the best path:

- \* Highest LOCAL\_PREFERENCE
- \* Lowest AS\_PATH length
- \* Lowest ORIGIN type (IGP 'i' preferred over EGP 'e', preferred over Incomplete '?')
- \* Lowest MULTI\_EXIT\_DISC (MED) if received from the same AS
- \* Lowest IGP cost to the next hop (closest exit)
- \* Lowest BGP router ID as tie-breaker."

Extract 2 - Aruba Certified Switching Professional (ACSP) Study Guide - BGP Path Decision

"Local Preference is the first and most significant criterion within a single AS.

A higher Local Preference value indicates a preferred exit.

If multiple routes have equal Local Preference, the router compares their Origin Codes.

An Origin Code of 'i' (IGP) is preferred over '?' (Incomplete).

If still tied, the route with the lowest IGP cost to the next-hop is chosen as best." Step-by-Step Application to the Table Step 1 - Local Preference

\* Routes B, D, and E have Local Preference = 100

\* Routes A and C have Local Preference = 0

# Routes A and C are eliminated.

Remaining candidates: B, D, E

Step 2 - Origin Code

\* D and E: Origin Code = i (IGP) # Preferred

\* B: Origin Code = ? (Incomplete) # Less preferred

# Eliminate B

Remaining candidates: D, E

Step 3 - MED / Metric

Both D and E have Metric = 0 # Still tied

Step 4 - IGP Cost / Administrative Distance

\* D: Distance = 200

\* E: Distance = 20

According to ArubaOS-CX:

"When all BGP attributes are equal, the route with the lowest internal cost (shortest IGP distance) to the next-hop is selected."

# E wins because it has a lower distance (20 < 200)

Extract 3 - ArubaOS-CX Routing Reference

"The route that wins the selection process is marked with a '>' symbol in the routing table.  
This route is installed in the forwarding table and used for traffic forwarding." Final Explanation

\* Route E has:

\* Highest Local Preference (100)

\* Best Origin (IGP 'I')

\* Lowest IGP distance (20)

Hence, Route E is selected as the best path, and the ">" symbol is placed beside it in the BGP routing table.

# Final Verified answer: E

# Official Aruba Documentation References:

\* Aruba AOS-CX Routing Guide - Section: BGP Best Path Selection Criteria

\* Aruba Certified Switching Professional (ACSP) Study Guide - Module: BGP and Path Selection Logic

\* Aruba AOS-CX Configuration and Management Guide - Command: show ip bgp summary / route selection

## NEW QUESTION # 91

An administrator is creating a fabric with NetConductor in HPE Aruba Networking Central Considering an EVPN VXLAN fabric, click on the most appropriate layer to be configured as a Route-Reflector Persona.

**Answer:**

Explanation:

Explanation:

In the context of an EVPN VXLAN fabric, the Route-Reflector Persona is most appropriately configured at the Services Aggregation layer. This layer is responsible for interconnecting different network services and typically includes more robust, higher-capacity devices capable of handling the route-reflection functions for EVPN VXLAN.

In an Aruba Networks fabric, route reflectors are used to optimize the distribution of BGP routes. The Services Aggregation layer, which is centrally located in the network topology, is best suited for this role due to its high availability and ability to efficiently manage routes between the core and access layers.

Therefore, if you were to click on the image provided, you would select the Services Aggregation layer to configure the Route-Reflector Persona.

## NEW QUESTION # 92

sw-1 is the master on all VRRP instances. To test the configuration, VLAN 100 was shut on sw-1, and then once the failover occurred, it was brought back up.

What is the expected outcome?

- A. sw-1 will only be the master for VRRP 200 and VRRP 300.
- B. sw-2 will be the master for all three VRRP instances.
- C. sw-1 will be the master for all three VRRP instances.
- D. sw-2 will only be the master for VRRP 200 and VRRP 300.

**Answer: D**

Explanation:

In ArubaOS-Switch / AOS-CX VRRP behavior, the expected master depends on preemption and interface tracking:

\* Interface tracking reduces VRRP priority if a tracked VLAN (e.g., VLAN 100) goes down

\* If preemption is disabled (default in many Aruba designs), the backup router remains master after failover even when the original master recovers

\* Only VRRP instances tracking that VLAN will experience the priority drop and master transition From HPE Aruba VRRP

Reference:

"If the tracked interface recovers and preemption is disabled, the VRRP backup continues to operate as master."

"Only VRRP instances that track the failed interface transition roles." Interpretation of the Scenario

\* VLAN 100 shutdown # causes failover only on instances tracking VLAN 100

\* VLAN restored # original master (sw-1) does not take back master role if preemption is not enabled Therefore:

\* VRRP instance 100 fails over to sw-2 and stays on sw-2 #

\* VRRP 200 and 300 remain on sw-1 #

Result:

\* sw-2 # master only for VRRP 100

\* sw-1 # master for VRRP 200 and 300

# This matches option C:

"sw-2 will only be the master for VRRP 200 and VRRP 300"

Oops - correction #

Actually option C says:

C). sw-2 will only be the master for VRRP 200 and VRRP 300.

But based on logic above sw-2 is master only for VRRP 100, which is not listed - so we must re-check answer choices carefully:

Instance

Master Expected

Based on Tracking

VRRP 100

sw-2

Tracking VLAN 100 triggered failover + no preemption

VRRP 200

sw-1

Not affected

VRRP 300

sw-1

Not affected

Correct expected:

# sw-1 remains master for VRRP 200 & 300

# sw-2 stays master for VRRP 100

Which choice matches this? # B

sw-1 will only be the master for VRRP 200 and VRRP 300.

# Final Correct answer: B

# Supporting Aruba Documentation

\* Aruba AOS-CX Layer 3 Services Guide - VRRP Tracking and Failover Behavior

\* Aruba Certified Switching Professional (ACSP) Study Guide - VRRP Preemption and Priority Logic

\* VRRP Design Best Practices - Failover without Preemption

## NEW QUESTION # 93

Exhibit.

□

After configuring VRRP between sw-1 and SW-2, you notice that both switches are showing as active. What could be the reason for this issue?

- A. VRRP preemptive mode is disabled.
- **B. Both switches are configured as VRRP 'primary.'**
- C. SW-1 can reach SW-2 on VLAN 10.
- D. SW-2 has no priority configurations for VRRP 1.

**Answer: B**

Explanation:

In VRRP (Virtual Router Redundancy Protocol), only one switch should be the primary (master) for a given virtual IP address, with the other switches being backups. If both switches are showing as active, it suggests a misconfiguration where both are set to act as the primary for the same VRRP group. The exhibits provided indicate that both switches believe they are the active or primary for the VRRP group, which is an incorrect configuration.

## NEW QUESTION # 94

In a campus topology using VSX with two aggregation switches and downlinks to access switches, which LAG interface configuration at the aggregation layer is correct based on the parameters below?

\* ZTP VLAN 1001

\* access switch MGMT VLAN 2002

\* access switch MGMT VLAN is tagged

\* connectivity to the access switch should be maintained before and after the ZTP operation is complete

- A. □
- **B. □**
- C. □

- D. □

**Answer: B**

## NEW QUESTION # 95

.....

Our product boosts many advantages and varied functions to make your learning relaxing and efficient. The client can have a free download and tryout of our HPE7-A07 exam torrent before they purchase our product and can download our study materials immediately after the client pay successfully. HPE7-A07 exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our HPE7-A07 latest question is absolutely good choices for you

**HPE7-A07 Examcollection Dumps:** <https://www.briandumpsprep.com/HPE7-A07-prep-exam-braindumps.html>

HP Trustworthy HPE7-A07 Pdf Then you can download it for study soon, You can prepare for the Aruba Certified Campus Access Mobility Expert Written Exam (HPE7-A07) exam dumps during your job, Our HPE7-A07 learning material carries the actual and potential exam questions, which you can expect in the actual exam, So if you choose our company, you will get a good experience of HP HPE7-A07 Examcollection Dumps HPE7-A07 Examcollection Dumps - Aruba Certified Campus Access Mobility Expert Written Exam practice test training and surprise you cannot imagine, The HPE7-A07 on-line file is the updated version of the soft file.

In her university courses, she helps students of all ages, from freshman HPE7-A07 through graduate level, believe they can change the world and guides them in learning the tools the patterns) to do so.

## Free PDF 2026 HPE7-A07: Updated Trustworthy Aruba Certified Campus Access Mobility Expert Written Exam Pdf

Zoom Out for Sharper Web Images, Then you can download it for study soon, You can prepare for the Aruba Certified Campus Access Mobility Expert Written Exam (HPE7-A07) exam dumps during your job, Our HPE7-A07 learning material carries the actual and potential exam questions, which you can expect in the actual exam.

So if you choose our company, you will get a good experience of HP Aruba Certified Campus Access Mobility Expert Written Exam practice test training and surprise you cannot imagine, The HPE7-A07 on-line file is the updated version of the soft file.
