Over this long time period, countless candidates have passed their Microsoft Dynamics 365: Finance and Operations Apps Solution Architect MB-700 Exam and they all got help from Microsoft Dynamics 365: Finance and Operations Apps Solution Architect practice questions and easily pass the final exam.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q15-Q20):

NEW QUESTION # 15

A company plans its Dynamics 365 finance and operations apps implementation. The implementation must do the following:

- * Use an agile methodology.
- * Follow Microsoft's recommendations for checks and balances.
- * Align with FastTrack touchpoints.

FastTrack touchpoints must be identified and included in the implementation timeline. You need to integrate FastTrack checks and balances into the implementation methodology. What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

FastTrack component	Tool
Checks and balances tool	<input type="checkbox"/> Microsoft Dynamics Sure Step <input type="checkbox"/> Lifecycle Services (LCS) <input type="checkbox"/> Success by Design <input type="checkbox"/> Microsoft Solutions framework (MSF)
Touchpoints	<input type="checkbox"/> Phase gate reviews <input type="checkbox"/> Readiness assessments <input type="checkbox"/> TechTalks <input type="checkbox"/> Workshops

Answer:

Checks and balances tool

Touchpoints

Tool

Success by Design

Workshops

NEW QUESTION # 16

A company uses Dynamics 365 Finance. An ISV provides a fix for an issue with a solution that the company uses. You must deploy the fix to the production environment.

You need to schedule the deployment.

What should you do?

- A. Open a hotfix request.
- B. Create a support request in Lifecycle Services (LCS).
- C. Create a service request in Lifecycle Services (LCS).
- D. Open an extensibility support request.

Answer: D

Explanation:

Extensibility requests

Finance and Operations applications exclusively use extensions to customize the product.

We've been working toward an extension-based customization model for some time. Over the past several releases we have been gradually sealing models. As of Dynamics 365 for Finance and Operations release 8.0, this completes the sealing. From this release forward, only extension-based customizations are allowed.

In future releases, we will be adding even more extensibility capabilities to enable independent software vendors (ISVs) and value-added resellers (VARs) to deliver complete business solutions. We will prioritize these on a customer-by-customer basis with frequent releases.

NEW QUESTION # 17

An organization is implementing Dynamics 365 Finance.

You need to assign security roles.

Which tools should you use? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools

Security Diagnostic Tool

Security Configuration Tool

Security Upgrade Advisor Tool

Answer Area

Microsoft

Set-CsTeamsMeetingPolicy -Identity IT -NewMeetingRecordingExpirationDays

NEW QUESTION # 19

A multinational organization is evaluating Dynamics 365 Supply Chain Management.

Each regional office uses processes and procedures developed internally without input from the other offices. The organization wants to perform a gap analysis to understand redundancies and additional requirements in their system.

You need to recommend a solution.

Which tool should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft Scenario

Identify differences between regional office processes and procedures.

Track the progress of the implementation project and its alignment to documented processes and procedures.

Identify differences between standard company processes and how the system works.

Tool
Business process modeler
Configuration manager
Regression suite automation tool (RSAT)
Business process modeler
Microsoft Azure DevOps
Regression suite automation tool (RSAT)
Business process modeler
Configuration manager
Regression suite automation tool (RSAT)

Answer:

Explanation:

Answer Area

Answer Area	Scenario	Tool
	Identify differences between regional office processes and procedures.	Business process modeler Configuration manager Regression suite automation tool (RSAT)
	Track the progress of the implementation project and its alignment to documented processes and procedures.	Business process modeler Microsoft Azure DevOps Regression suite automation tool (RSAT)
	Identify differences between standard company processes and how the system works.	Business process modeler Configuration manager Regression suite automation tool (RSAT)
