

NSK300最新試題 & NSK300認證

ExamsLead offers top-notch Netskope NSK300 exam questions which will help you to pass the NSK300 exam with less effort.

Netskope NSK300 Exam Questions 2024 - Your Exam Success Guaranteed

Do you want to crack the NSK300 Netskope Certified Cloud Security Architect Exam easily in one go? If yes, then ExamsLead is here to help you to prepare for the NSK300 Netskope Cloud Security Certification Program exam in the best possible way. ExamsLead offers Netskope NSK300 exam questions to ensure the success of the NSK300 Netskope Certified Cloud Security Architect Exam candidates. The Netskope NSK300 test questions provide the Netskope NSK300 real questions with their correct answers. The experts of ExamsLead have prepared and verified these Netskope NSK300 exam questions and answers for the NSK300 Netskope Certified Cloud Security Architect Exam preparation. Moreover, you can get these Netskope NSK300 exam questions in pdf format and Netskope NSK300 practice test engine. Here are the features of the Netskope Cloud Security Certification Program NSK300 exam questions offered by ExamsLead.

Netskope NSK300 Exam Questions In Easy PDF Format

The Netskope NSK300 exam questions are available in an easy-to-understand pdf format so that you can download the Netskope Cloud Security Certification Program NSK300 exam questions on any device. So you can use it conveniently on your PC, laptop, Mac, tablet, and smartphone right after making the purchase. You can read and study the NSK300 Netskope Certified Cloud Security Architect Exam material anywhere, anytime with the help of these Netskope NSK300 pdf. The Netskope NSK300 pdf format makes it easy to access the Netskope Cloud Security Certification Program NSK300 exam questions even on the go.

BONUS!!! 免費下載Testpdf NSK300考試題庫的完整版: <https://drive.google.com/open?id=1Zu7vLvwJc5Z9awcU64E0Wf3hBuoMRFje>

將Testpdf的產品加入購物車吧！你將以100%的信心去參加考試，一次性通過Netskope NSK300 認證考試，你將不會後悔你的選擇的。

Testpdf提供高品質的最佳學習資料，讓通過Netskope NSK300考試從未如此快速、便宜、和簡單。有了最新詳細的題庫和答案，為您的NSK300考試做好充分的準備，我們將保證您在考試中取得成功。在購買前，您還可以下載我們提供的NSK300免費DEMO來試用，這是非常有效的學習資料。通過客戶的完全信任，我們為考生提供真實有效的訓練，幫助大家在第一次Netskope NSK300考試中順利通過。

熱門的NSK300最新試題，覆蓋全真{examanme} NSK300考試考題

通過這幾年IT行業不斷的發展與壯大，NSK300考試已經成為Netskope考試裏的里程碑，可以讓你成為IT的專業人士，有數以百計的線上資源，提供Netskope的NSK300考試的問題，為什麼大多數選擇Testpdf，因為我們Testpdf裏有一支龐大的IT精英團隊，專注於Netskope的NSK300考試的最新資料。讓你無障礙通過Netskope的NSK300考試認證。Testpdf保證你第一次嘗試通過Netskope的NSK300考試取得認證，Testpdf會和你站在一起，與你同甘共苦。

Netskope NSK300 考試大綱：

主題	簡介
----	----

主題 1	<ul style="list-style-type: none"> • Netskope Platform Implementation: This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.
主題 2	<ul style="list-style-type: none"> • Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.
主題 3	<ul style="list-style-type: none"> • Cloud Security Solutions: This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.
主題 4	<ul style="list-style-type: none"> • Netskope Platform Management: This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.
主題 5	<ul style="list-style-type: none"> • Netskope Platform Troubleshooting: This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.

問題 #58

You are consuming Audit Reports as part of a Salesforce API integration. Someone has made a change to a Salesforce account record field that should not have been made and you are asked to verify the previous value of the structured data field. You have the approximate date and time of the change, user information, and the new field value.

How would you accomplish this task?

- A. Query Skope IT Page Events and look for the specific Page URL that was called under the Application section.
- B. Create a classic report and apply a query that filters on the changed field value.
- C. Use the Application Events Data Collection within Advanced Analytics and filter on the changed field value.
- **D. Query Skope IT for an Access Method of API Connector and search Application Event Details for the Old Value field using the User details and Edit Activity.**

答案: D

解題說明:

To verify the previous value of a structured data field in Salesforce after an unauthorized change, you would use Skope IT with an Access Method of API Connector. This method allows you to search the Application Event Details for the 'Old Value' field. By filtering with the user details and the edit activity, you can pinpoint the exact change and retrieve the original value of the field.

問題 #59

You want customers to configure Real-time Protection policies. In which order should the policies be placed in this scenario?

- **A. RBI, CASB, Web, Threat**
- B. Threat, CASB, RBI, Web
- C. Threat, RBI, CASB, Web

- D. CASB, RBI, Threat, Web

答案： A

解題說明：

When configuring Real-time Protection policies in Netskope, the recommended order is as follows:

RBI (Risk-Based Index) Policies: These policies focus on risk assessment and prioritize actions based on risk scores. They help identify high-risk activities and users.

CASB (Cloud Access Security Broker) Policies: These policies address cloud-specific security requirements, such as controlling access to cloud applications, enforcing data loss prevention (DLP) rules, and managing shadow IT.

Web Policies: These policies deal with web traffic, including URL filtering, web categories, and threat prevention.

Threat Policies: These policies focus on detecting and preventing threats, such as malware, phishing, and malicious URLs.

Placing the policies in this order ensures that risk assessment and cloud-specific controls are applied before addressing web and threat-related issues. Reference:

問題 #60

Your customer is currently using Directory Importer with Active Directory (AD) to provision users to Netskope. They have recently acquired three new companies (A, B, and C) and want to onboard users from the companies onto the Netskope platform.

Information about the companies is shown below.

- Company A uses Active Directory.

-- Company B uses Azure AD.

-- Company C uses Okta Universal Directory.

Which statement is correct in this scenario?

- A. Company A users cannot be provisioned to Netskope because the customer is already using AD Importer to import users from another Active Directory environment.
- **B. Users from Companies A, B, and C can be provisioned to Netskope by deploying additional AD Importers and integrating more than one SCIM solution.**
- C. Either Company B or Company C users cannot be provisioned because integration with only one SCIM solution is allowed.
- D. Users from Company B and Company C cannot be provisioned because the customer is already using AD Importer.

答案： B

解題說明：

Users from Companies A, B, and C can indeed be provisioned to Netskope. Company A, which uses Active Directory, can continue to use the existing AD Importer. For Company B that uses Azure AD and Company C that uses Okta Universal Directory, integration with SCIM (System for Cross-domain Identity Management) solutions is possible. Netskope supports provisioning users from multiple directories, including Active Directory and cloud-based identity providers like Azure AD and Okta, by using additional AD Importers and integrating more than one SCIM solution¹².

問題 #61

Users in your network are attempting to reach a website that has a self-signed certificate using a GRE tunnel to Netskope. They are currently being blocked by Netskope with an SSL error. How would you allow this traffic?

- A. Configure a Real-time Protection policy with the action set to Allow.
- B. Ensure that the users add the self-signed certificate to their local certificate store.
- **C. Configure a Do Not Decrypt SSL Decryption rule to allow traffic to pass.**
- D. Set the No SNI setting in Netskope to Bypass.

答案： C

問題 #62

A company's architecture includes a server subnet that is logically isolated from the rest of the network with no Internet access, no

default gateway, and no access to DNS. New resources can only be provisioned on virtual resources in that segment and there is a firewall that is tunnel-capable securing the perimeter of the segment. The only requirement is to have content filtering for any server that might access the Internet using a browser.

Which two Netskope deployment methods would achieve this requirement? (Choose two.)

- A. Install the Netskope Client on the servers
- B. Deploy a mobile profile on the servers.
- C. Deploy IPsec or GRE tunnels in the segment to steer traffic from the servers to Netskope.
- D. Deploy Data Plane on Premises (DPoP) with a proxy configuration on the servers.

答案: C,D

解題說明:

For a server subnet that is isolated and requires content filtering for any server that might access the Internet using a browser, the two Netskope deployment methods that would meet this requirement are:

* B. Deploy Data Plane on Premises (DPoP) with a proxy configuration on the servers: Deploying DPoP would allow the isolated servers to connect to the Netskope cloud for content filtering through a proxy configuration. This setup would enable the servers to have controlled access to the Internet for content filtering purposes without requiring direct Internet access1.

* C. Deploy IPsec or GRE tunnels in the segment to steer traffic from the servers to Netskope: By deploying IPsec or GRE tunnels, the traffic from the servers can be securely directed to Netskope for content filtering. This method is suitable for environments where servers do not have direct Internet access, as the tunnel provides a secure path for traffic to reach Netskope's cloud services1. These deployment methods are designed to work in environments with strict network isolation and provide the necessary content filtering capabilities for servers accessing the Internet.

The deployment methods and their suitability for isolated server subnets are based on Netskope's documentation and resources, which detail various deployment options and their use cases21.

問題 #63

.....

在這個資訊時代，IT行業被很多人關注，但是在如今人才濟濟的社會裏任然比較缺乏IT人。很多公司都招聘IT人才，他們一般考察IT人才的能力會參考他們擁有的IT相關認證證書，所以擁有一些IT相關的認證證書是受很多公司歡迎的。但是這些認證證書也不是很容易就能拿到的。Netskope NSK300 就是一個相當有難度的認證考試，雖然很多人報名參加Netskope NSK300考試，但是通過率並不是很高。
