If you buy the JN0-253 training files from our company, you will have the right to enjoy the perfect service. We have employed a lot of online workers to help all customers solve their problem. If you have any questions about the JN0-253 learning materials, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our JN0-253 study questions well. We believe our perfect service will make you feel comfortable when you are preparing for your JN0-253 exam.

The advantages of our JN0-253 study materials are plenty and the price is absolutely reasonable. The clients can not only download and try out our products freely before you buy them but also enjoy the free update and online customer service at any time during one day. The clients can use the practice software to test if they have mastered the JN0-253 Study Materials and use the function of stimulating the test to improve their performances in the real test. So our products are absolutely your first choice to prepare for the test JN0-253 certification.

Pass-Sure JN0-253 Exam Dumps Free - Win Your Juniper Certificate with Top Score

Our company attaches great importance on improving the JN0-253 study prep. In addition, we clearly know that constant improvement is of great significance to the survival of a company. The fierce competition in the market among the same industry has long existed. As for our JN0-253 exam braindump, our company masters the core technology, owns the independent intellectual property rights and strong market competitiveness. What is more, we have never satisfied our current accomplishments. The highest record is up to five seconds. There has no delay time of the grading process. Slow system response doesn't exist. In addition, the calculation system of the JN0-253 Test Question is very powerful and stable. We promise that the results of your exercises are accurate.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.

Topic 2	<ul style="list-style-type: none"> Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
Topic 3	<ul style="list-style-type: none"> Juniper Mist Configuration Basics: This domain addresses initial setup including user accounts, device onboarding, organizational structures, subscription licensing, certificate management, and automated provisioning with labels and policies.
Topic 4	<ul style="list-style-type: none"> Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q81-Q86):

NEW QUESTION # 81

A Mist administrator may link their Mist login to which type of social account login?

- A. LinkedIn
- **B. Google**
- C. TikTok
- D. Facebook

Answer: B

Explanation:

Google Account Integration: Mist administrators can link their Mist login to a Google account. This facilitates easier access and management of Mist services using a single sign-on (SSO) mechanism provided by Google.

Benefits of SSO: Using Google SSO simplifies user management, reduces password fatigue, and enhances security through Google's robust authentication mechanisms.

NEW QUESTION # 82

What are two requirements to use the Wired Visibility option of Juniper Mist Wireless Assurance?
(Choose two.)

- **A. A Mist AP must be deployed in the network.**
- B. A cloud-ready switch must be deployed in the network.
- **C. The LLDP protocol must be configured on the switch.**
- D. The SNMP protocol must be configured on the switch.

Answer: A,C

Explanation:

The Wired Visibility feature in Juniper Mist relies on Mist APs to gather insights about wired network devices. The APs act as sensors to collect data from connected switches and devices.

LLDP (Link Layer Discovery Protocol) is required for discovering neighboring devices, identifying switch port details, and enabling Wired Visibility to provide comprehensive insights.

NEW QUESTION # 83

What are three methods for requesting authentication in the Juniper Mist API? (Choose three.)

- A. Use RADIUS certificates.
- **B. Use an HTTPS login with a user name and password.**
- C. Enable MFA with Okta Verify.
- **D. Enable basic authentication with a token.**
- **E. Use OAuth2 linked to an OAuth provider.**

Answer: B,D,E

Explanation:

The three valid methods for requesting authentication with the Juniper Mist API are:

Use an HTTPS login with a user name and password: The Mist API accepts HTTPS requests where credentials are provided directly for session/token generation and user administration.

Use OAuth2 linked to an OAuth provider: "Juniper Mist APIs offer authentication via OAuth2 with various OAuth-compatible identity providers, such as Okta, for secure and federated access."

Enable basic authentication with a token: Mist APIs accept programmatic requests using tokens (API tokens or bearer tokens) for automation, scripting, and integration—each token mapping to specific scopes and user permissions.

Enabling MFA with Okta Verify enhances user portal security but is not an API authentication mechanism.

RADIUS certificates are used for infrastructure 802.1X authentication, not for API access.

Reference:

Juniper Mist API Authentication Mechanisms

NEW QUESTION # 84

Which two statements are correct about Juniper Mist Wired Assurance ZTP? (Choose two.)

- A. The technician must have console access to the switch during the initial setup.
- B. The cloud-ready Juniper switch must either boot from the factory-default state or you can issue the request system zeroize Junos command to reset the configuration.
- C. The switch must be running a supported Junos version for Juniper Mist Wired Assurance.
- D. All legacy Juniper switch models are supported.

Answer: B,C

Explanation:

Supported Junos Version: For Juniper Mist Wired Assurance to function correctly, the switch must be running a supported Junos version. This ensures compatibility with Mist's cloud management and AI capabilities.

Factory-Default State or Zeroize Command: The switch must boot from a factory-default state, or you can use the request system zeroize command to reset its configuration. This is essential for seamless onboarding and auto-provisioning.

NEW QUESTION # 85

Which location-based service does User Engagement provide?

- A. Wi-Fi presence analytics
- B. ultra wide band location
- C. wayfinding
- D. asset tracking

Answer: A

NEW QUESTION # 86
