

Valid JN0-460 Test Pdf & JN0-460 Reliable Exam Review

P.S. Free 2026 Juniper JN0-460 dumps are available on Google Drive shared by ValidBraindumps: <https://drive.google.com/open?id=1UIukTnWkYZFar6oxnNl0wh6m5abtcDRr>

You can access the premium PDF file of Mist AI Wired, Specialist (JNCIS-MistAI-Wired) JN0-460 dumps right after making the payment. It will contain all the latest JN0-460 exam dumps questions based on the official JN0-460 exam study guide. These are the most relevant Juniper JN0-460 questions that will appear in the actual Mist AI Wired, Specialist (JNCIS-MistAI-Wired) exam. Thus you won't waste your time preparing with outdated JN0-460 Dumps. You can go through Juniper JN0-460 dumps questions using this PDF file anytime, anywhere even on your smartphone.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
Topic 2	<ul style="list-style-type: none">• Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 3	<ul style="list-style-type: none">• Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.

Topic 4	<ul style="list-style-type: none"> • Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
Topic 5	<ul style="list-style-type: none"> • Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.

2026 High-quality Valid JN0-460 Test Pdf Help You Pass JN0-460 Easily

Do not miss the opportunity to buy the best JN0-460 preparation questions in the international market which will also help you to advance with the times. If you are still worrying about our JN0-460 exam questions, I would like to help you out with the free demos of our JN0-460 Training Materials compiled by our company. There are so many strong points of our JN0-460 training materials, such as wide applicability, sharpen the saw and responsible after sale service to name.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q31-Q36):

NEW QUESTION # 31

How does MistAI Wired Assurance facilitate managing switches in a network?

- A. By eliminating the need for physical switches
- B. By focusing solely on wireless networks
- **C. By providing AI-driven insights for optimizing switch performance**
- D. Through manual switch configuration processes

Answer: C

NEW QUESTION # 32

Which two statements are correct about the campus fabric core-distribution architecture?(Choose two.)

- **A. The access tier does not participate in the EVPN-VXLAN topology.**
- **B. Only the core and distribution tiers are part of the EVPN-VXLAN topology.**
- C. Only the core tier participates in the EVPN-VXLAN topology.
- D. The access tier is included in the EVPN-VXLAN topology.

Answer: A,B

Explanation:

In a core-distribution campus fabric model, the EVPN-VXLAN overlay is established only between the core and distribution tiers. The access switches are not part of the EVPN fabric; they connect upstream to distribution but do not run VXLAN tunnels.

"In the core-distribution campus fabric, only the core and distribution layers participate in the EVPN-VXLAN topology. The access layer connects to the distribution switches and forwards traffic but does not take part in the EVPN-VXLAN fabric." Option

A: Correct - EVPN-VXLAN is built between core and distribution tiers.

Option B: Incorrect - both core and distribution participate, not just core.

Option C: Incorrect - access switches are excluded from EVPN-VXLAN participation.

Option D: Correct - the access layer does not participate in EVPN-VXLAN.

NEW QUESTION # 33

EVPN multihoming is essential for which of the following reasons?

- A. Decreasing network redundancy
- B. Increasing single points of failure
- C. Reducing network bandwidth
- **D. Providing link redundancy and load balancing for connected devices**

Answer: D

NEW QUESTION # 34

Deployment options for Wired Assurance include cloud-based management to:

- A. Limit remote access capabilities
- B. Decrease network flexibility
- C. Simplify physical installations
- **D. Enhance scalability and accessibility**

Answer: D

NEW QUESTION # 35

Which API is used within the Juniper Mist solution?

- A. RPC
- B. JSON
- C. SOAP
- **D. REST**

Answer: D

Explanation:

Juniper Mist Cloud uses an open RESTful API framework for integration, automation, and programmability across all Mist services, including Wired Assurance, Marvis, and AI-driven automation.

"All Mist Cloud services are built on a 100% open REST API framework, allowing customers to automate configuration, monitoring, and troubleshooting through standard REST calls." The REST API exchanges data in JSON format, but the API type itself is REST, not JSON.

Option A (REST): Correct - Mist services expose 100% REST-based APIs.

Option B (SOAP): Incorrect - SOAP is an older XML-based protocol not used in Mist.

Option C (JSON): Incorrect - JSON is the data format, not the API type.

Option D (RPC): Incorrect - not used in the Mist Cloud architecture.
