We keep a close watch at the change of the popular trend among the industry and the latest social views so as to keep pace with the times and provide the clients with the newest NSE7_EFW-7.2 study materials resources. Our service philosophy and tenet is that clients are our gods and the clients' satisfaction with our NSE7_EFW-7.2 Guide material is the biggest resource of our happiness. So why you still hesitated? Go and buy our NSE7_EFW-7.2 guide questions now. With our NSE7_EFW-7.2 learning guide, you will be able to pass the NSE7_EFW-7.2 exam without question.

Fortinet NSE7_EFW-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	• Central management: The topic of Central management covers implementing central management.
Topic 2	• System configuration: This topic discusses Fortinet Security Fabric and hardware acceleration. Furthermore, it delves into configuring various operation modes for an HA cluster.

Topic 3	• Security profiles: Using FortiManager as a local FortiGuard server is discussed in this topic. Moreover, it delves into configuring web filtering, application control, and the intrusion prevention system (IPS) in an enterprise network.
Topic 4	• VPN: Implementing IPsec VPN IKE version 2 is discussed in this topic. Additionally, it delves into implementing auto-discovery VPN (ADVPN) to enable on-demand VPN tunnels between sites.
Topic 5	• Routing: It covers implementing OSPF to route enterprise traffic and Border Gateway Protocol (BGP) to route enterprise traffic.

Free PDF 2026 High Hit-Rate NSE7_EFW-7.2: Discount Fortinet NSE 7 - Enterprise Firewall 7.2 Code

Our NSE7_EFW-7.2 study materials are famous for instant download, and if you want to start practicing as quickly as possible, you can have a try. After purchasing NSE7_EFW-7.2 exam dumps , you will receive the downloading link and password within ten minutes, and if you don't receive, just contact us. In addition, NSE7_EFW-7.2 Exam Dumps are high-quality, and they can ensure you pass the exam just one time. We also pass guarantee and money back guarantee if you fail to pass the exam, and money will be returned to your payment account.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q81-Q86):

NEW QUESTION # 81
Which FortiGate in a Security I auric sends togs to FortiAnalyzer?

- A. Only the last FortiGate that handled a session in the Security Fabric
- B. Each FortiGate in the Security fabric.
- C. Only the root FortiGate.
- D. The FortiGate devices performing network address translation (NAT) or unified threat management (UTM). if configured.

Answer: B

Explanation:
Option B is correct because each FortiGate in the Security Fabric can send logs to FortiAnalyzer for centralized logging and analysis12. This allows you to monitor and manage the entire Security Fabric from a single console and view aggregated reports and dashboards.
Option A is incorrect because the root FortiGate is not the only device that can send logs to FortiAnalyzer. The root FortiGate is the device that initiates the Security Fabric and acts as the central point of contact for other FortiGate devices3. However, it does not have to be the only log source for FortiAnalyzer.
Option C is incorrect because the FortiGate devices performing NAT or UTM are not the only devices that can send logs to FortiAnalyzer. These devices can perform additional security functions on the traffic that passes through them, such as firewall, antivirus, web filtering, etc4. However, they are not the only devices that generate logs in the Security Fabric.
Option D is incorrect because the last FortiGate that handled a session in the Security Fabric is not the only device that can send logs to FortiAnalyzer. The last FortiGate is the device that terminates the session and applies the final security policy5. However, it does not have to be the only device that reports the session information to FortiAnalyzer. Reference: =
1: Security Fabric - Fortinet Documentation1
2: FortiAnalyzer Demo6
3: Security Fabric topology
4: Security Fabric UTM features
5: Security Fabric session handling

NEW QUESTION # 82
Winch two statements about ADVPN are true? (Choose two)

- A. Routing is configured by enabling add-advpn-route

- B. It supports NAI for on-demand tunnels
- C. auto-discovery-receiver must be set to enable on the spokes
- D. Spoke to-spoke traffic never goes through the hub

Answer: B,C

Explanation:
ADVPN (Auto Discovery VPN) is a feature that allows to dynamically establish direct tunnels (called shortcuts) between the spokes of a traditional Hub and Spoke architecture. The auto- discovery receiver must be set to enable on the spokes to allow them to receive NHRP messages from the hub and other spokes. NHRP (Next Hop Resolution Protocol) is used for on-demand tunnels, which are established when there is traffic between spokes. Routing is configured by enabling add-nhrp-route, not add-advpn-route.

NEW QUESTION # 83
Exhibit.

Network diagram
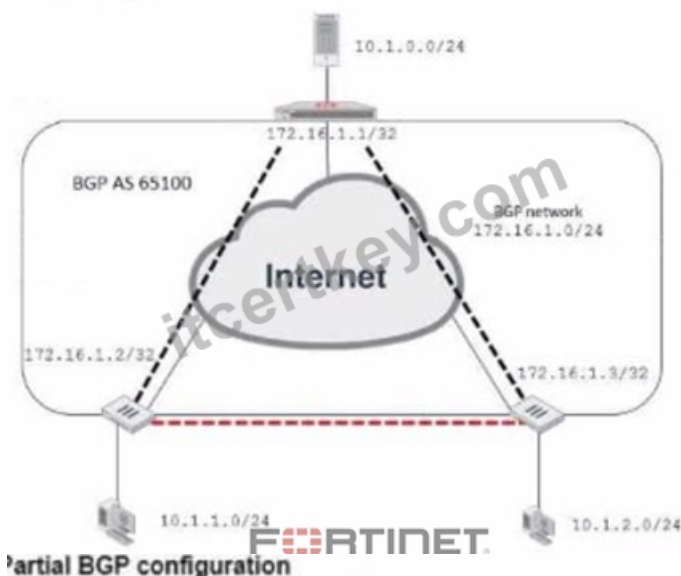

Partial BGP configuration

Refer to the exhibit, which contains an ADVPN network diagram and a partial BGP con figuration Which two parameters Should you configure in config neighbor range? (Choose two.)

- A. set prefix 10.1.0 255.255.254.0
- B. set prefix 172.16.1.0 255.255.255.0
- C. set neighbor-group advpn
- D. set route reflector-client enable

Answer: B,C

Explanation:
In the ADVPN configuration for BGP, you should specify the prefix that the neighbors can advertise. Option A is correct as you

would configure the BGP network prefix that should be advertised to the neighbors, which matches the BGP network in the diagram. Option C is also correct since you should reference the neighbor group configured for the ADVPN setup within the BGP configuration.

NEW QUESTION # 84

Refer to the exhibit, which shows a routing table.

Network ⇕	Gateway IP ⇕	Interfaces ⇕	Distance ⇕	Type ⇕
0.0.0.0/0	10.1.0.254	port1	10	Static
10.1.0.0/24	0.0.0.0	port1	0	Connected
10.1.4.0/24	10.1.0.100	port1	110	OSPF
10.1.10.0/24	0.0.0.0	port3	0	Connected
172.16.100.0/24	0.0.0.0	port3	0	Connected

What two options can you configure in OSPF to block the advertisement of the 10.1.10.0 prefix? (Choose two.)

- A. Configure a route-map out
- B. Remove the 10.1.10.0 prefix from the OSPF network
- C. Disable Redistribute Connected
- D. Configure a distribute-list-out

Answer: B,C

Explanation:
On OSFP distribute-list and route-maps exist only incoming, and because you want to exclude a connected network from redistribution you can not use the option "redistibute connected", so you have to specify the networks manually.

NEW QUESTION # 85

Which three conditions are required (or two FortiGate devices to form an OSPF adjacency? (Choose three.)

- A. OSPF peer interface must have same Hello and Wait time
- B. OSPF peer interface must have same MTU size
- C. OSPF peer interfaces must have same network and mask
- D. OSPF peer interface must have same Hello and Dead time
- E. OSPF peer interface must have same cost value

Answer: B,C,D

NEW QUESTION # 86

......

All NSE7_EFW-7.2 online tests begin somewhere, and that is what the NSE7_EFW-7.2 training guide will do for you: create a foundation to build on. Study guides are essentially a detailed NSE7_EFW-7.2 training guide and are great introductions to new NSE7_EFW-7.2 training guide as you advance. The content is always relevant, and compound again to make you pass your NSE7_EFW-7.2 exams on the first attempt.
