EMC DEP-3CRI

PowerProtect Cyber Recovery Exam

3

질문 #26

An enterprise customer needs a Cyber Recovery solution to be implemented. As an outcome from a previous workshop, the following backup environment needs to be protected to the CR Vault.

Location 1: 4 PowerProtect DDS

Location 2: 4 PowerProtect DDS

Location 3: 2 PowerProtect DDS

Location 4: 2 PowerProtect DDS

The customer wants to implement a CR Vault in a 5th location.

How many Cyber Recovery systems must be installed at a minimum level?

- A. 0
- B. 1
- C. 2
- D. 3

정답 B

질문 #27

What vault status is displayed if none of the PowerProtect DD systems in the CR Vault are able to communicate with the Cyber Recovery software?

- A. Unknown
- B. Unlocked
- C. Locked
- D. Degraded

정답 B

질문 #28

ExamPassdump 의 BCI인증 CBCI덤프는 PDF버전과 소프트웨어버전 두가지 버전으로 되어있는데 소프트웨어버전은 시뮬레이션버전입니다. 소프트웨어버전의 문제를 푸는 과정은 시험현장을 연상케하여 시험환경에 먼저 적응하여 실제시험에서 높은 점수를 받도록 도와드릴수 있습니다.

BCI CBCI 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none">Introduction: This section lays the groundwork for newcomers to business continuity by clarifying what business continuity is, why it matters in organizational resilience, and how its fundamental practices interconnect under the Good Practice Guidelines (GPG) framework.
주제 2	<ul style="list-style-type: none">Policy and Programme Management and Embedding: This part guides users through establishing a Business Continuity Management System (BCMS), including how to craft governance, define a policy, and embed these elements into the fabric of an organization for long-term sustainability.

주제 3	<ul style="list-style-type: none"> Validation: This final module emphasizes testing and verifying the effectiveness of implemented plans through exercises and reviews—ensuring that what was designed and implemented actually performs as intended under real-world conditions.
주제 4	<ul style="list-style-type: none"> Implementation: This section covers putting the designed continuity strategies into action, including creating and deploying incident response and business continuity plans, structuring effective response teams, and ensuring operational readiness.

CBCI시험대비 최신 공부자료 - CBCI적중율 높은 인증덤프자료

ExamPassdump의 경험이 풍부한 IT전문가들이 연구제작해낸 BCI인증 CBCI덤프는 시험패스율이 100%에 가까워 시험의 첫번째 도전에서 한방에 시험패스하도록 도와드립니다. BCI인증 CBCI덤프는 BCI인증 CBCI최신 실제시험문제의 모든 시험문제를 커버하고 있어 덤프에 있는 내용만 공부하시면 아무런 걱정없이 시험에 도전할수 있습니다.

최신 CBCI 7.0 Certification Course CBCI 무료샘플문제 (Q55-Q60):

질문 # 55

Which of the following statements best describes the relationship between Business Continuity strategies and solutions?

- A. Strategies align to the direction set out in the Business Continuity policy whilst solutions address the outlined objectives in the Business Continuity Management System (BCMS)
- B. Strategies are high-level approaches for meeting the organization's Business Continuity requirements whereas solutions detail how the strategies will be implemented**
- C. Strategies are based on the outcomes of the Business Impact Analysis (BIA) whereas solutions are based on the outcomes of the risk assessment
- D. Strategies focus on the methods and procedures for business as usual activities whereas solutions focus on the treatments and actions to minimize risks

정답: **B**

설명:

According to CBCI 7.0, strategies represent the high-level approaches that define how the organization will maintain or recover critical operations, aligned with Business Continuity requirements identified through BIAs and risk assessments. Solutions, on the other hand, are the specific, detailed methods and resources deployed to implement these strategies effectively. Strategies set the direction, while solutions translate these into practical capabilities such as alternate site arrangements, backup systems, or communication plans.

Distinguishing strategies from solutions clarifies planning and execution responsibilities within the BCMS.

Reference: CBCI 7.0 Study Guide, Module 5: Solutions Design, pages 88-90.

질문 # 56

Which of the following is a possible outcome of a gap analysis to establish whether new strategies and solutions are required?

- A. Validation exercises to confirm the findings of the gap analysis that can be presented to top management as part of the decision-making process
- B. Agreement from top management that a Business Impact Analysis (BIA) should be completed to determine the new procedures required
- C. A schedule for sharing the outcomes with all personnel to invite their comments and encourage them to embrace Business Continuity
- D. A determination that Business Continuity capabilities exceed requirements and resources could be redistributed**

정답: **D**

설명:

A gap analysis identifies discrepancies between current capabilities and required Business Continuity needs.

The CBCI 7.0 course explains that outcomes may reveal that the organization's existing capabilities exceed what is necessary, offering opportunities to redistribute resources or adjust investments. This insight helps optimize resource allocation and improve efficiency. While validation exercises and communication plans are important subsequent steps, the immediate and tangible result of a gap analysis can include the reassessment of capability adequacy.

Reference: CBCI 7.0 Study Guide, Module 5: Solutions Design and Gap Analysis, pages 95-98.

질문 #57

A breakdown of internal and external dependencies that may include priority suppliers is an outcome of

- A. An Activity Business Impact Analysis (BIA)
- B. An initial assessment
- C. A risk assessment
- D. A Product and Services Business Impact Analysis (BIA)

정답: A

설명:

The CBCI 7.0 course explains that an Activity Business Impact Analysis (BIA) provides detailed identification of dependencies necessary to deliver prioritized products and services. This includes internal dependencies such as departments and resources, and external dependencies such as suppliers and partners.

Mapping these dependencies is crucial to understanding potential vulnerabilities and planning continuity solutions that address both internal process interrelations and supply chain considerations. The Product and Services BIA focuses more on outcomes and impacts, while risk assessments identify threats but do not detail operational dependencies. Initial assessments are broader and less detailed.

Reference: CBCI 7.0 Study Guide, Module 3: Business Impact Analysis, pages 41-44.

질문 #58

Where social media is a key element in an organization's communications response strategy, it is important for the organization to:

- A. Empower all staff to engage with social media to ensure that information during a disruption can be delivered quickly
- B. Ensure all staff who engage with social media are aware of the need to keep a note of their engagement in case valuable contacts are secured through this route
- C. Build up followers and establish a social media presence before an incident
- D. Limit social media engagement to one-way communications as only the organization's formal statements and opinions are required

정답: C

설명:

The CBCI 7.0 course highlights that an effective social media strategy requires establishing and nurturing a following before incidents occur. A pre-existing audience ensures messages disseminated during disruptions reach stakeholders promptly and credibly. While empowering staff to engage may lead to inconsistent messaging and risks, centralized management ensures accuracy and control. Recording engagement can be useful but is secondary. Limiting social media to one-way communications may reduce interaction but safeguards message consistency. Building presence early is foundational to effective crisis communications.

Reference: CBCI 7.0 Study Guide, Module 6: Crisis Communications, pages 110-114.

질문 #59

A strategic plan:

- A. Should identify viable options to coordinate efforts of the operational teams
- B. Should contain procedures for responding to emergencies, including threats to life, or the environment
- C. May be supported by a separate crisis communications plan
- D. May contain procedures for coordinating the transportation of personnel to alternate facilities

정답: C

설명:

Strategic plans set the overarching framework and objectives for Business Continuity and are often supported by separate tactical or

crisis communication plans tailored to communication needs during disruptions. The CBCI 7.0 course clarifies that while strategic plans guide overall responses, detailed emergency procedures and logistics coordination typically reside in operational or tactical plans, ensuring clarity and focus at different planning levels.

Reference: CBCI 7.0 Study Guide, Module 5: Solutions Design and Planning, pages 100-103.
