Exam Vce AP-215 Free - Test AP-215 Centres

People who want to pass the exam have difficulty in choosing the suitable AP-215 guide questions. They do not know which study

materials are suitable for them, and they do not know which the study materials are best. Our company can promise that the AP-215 study materials from our company are best among global market. As is known to us, the AP-215 Certification guide from our company is the leading practice materials in this dynamic market. All study materials from our company are designed by a lot of experts and professors. In addition, these experts and professors from our company are responsible for constantly updating the AP-215 guide questions.

Salesforce Marketing Cloud Intelligence Accredited Professional Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which two statements are correct regarding LiteConnect?

- A. Data coming from LiteConnect cannot be harmonized with the rest of the workspace data via the harmonization center at a later step.
- **B. It does not require any identification of entities, keys or any other categorization.**
- **C. The dataset does not conform to the standard data model**
- D. All of the dimensions mapped within a LiteConnect data stream are considered overarching entities.

Answer: B,C

Explanation:

LiteConnect is a feature in Salesforce Marketing Cloud Intelligence that allows users to bring external data into the platform quickly and easily. Here are the correct statements regarding LiteConnect:

A . LiteConnect allows for a quick setup by not requiring detailed identification of entities, keys, or categorization. Users can upload files without having to conform to the standard data model, which speeds up the process of data integration.

B . With LiteConnect, datasets are uploaded in their native format and do not conform to the standard data model of Marketing Cloud Intelligence. This means that the original structure of the dataset is maintained, and there is no need for extensive transformation or mapping upon the initial data import.

For C and D: While LiteConnect datasets might not conform to the standard data model initially, there are capabilities within Marketing Cloud Intelligence to further categorize and harmonize this data if needed. Therefore, C is not entirely correct, and D is incorrect because harmonization can indeed occur at a later step.

NEW QUESTION # 35

A client has integrated the following files:

File A:

File B:

The client would like to link the two files in order to view the two KPIs ('Tasks Completed' and 'Tasks Assigned) alongside 'Employee Name' and/or 'Squad'.

The client set the following properties:

+ File A is set as the Parent data stream

* Both files were uploaded to a generic data stream type.

* Override Media Buy Hierarchies is checked for file A.

* The 'Data Updates Permissions' set for file B is 'Update Attributes and Hierarchy'.

When filtering on the entire date range (1-30/8), and querying employee ID, Name and Squad with the two measurements - what will the result look like?

- **A.**
- B.
- C.
- D.

Answer: A

Explanation:

In Marketing Cloud Intelligence, when linking two data streams, the parent data stream (File A) provides the main structure. Since 'Override Media Buy Hierarchies' is checked for File A, the hierarchies from File B will be aligned with File A. Given 'Data Updates Permissions' set for file B as 'Update Attributes and Hierarchy', this means that attributes and hierarchy will be updated in the parent file based on the child file (File B), but the child file's metrics won't be associated with the parent file's date.

Hence, when filtering on the entire date range (1-30/8), the resulting view will align with the structure of the parent data stream, showing the KPIs ('Tasks Completed' from File A and 'Tasks Assigned' from File B) alongside the employee names and squads from the respective files. Since the employee IDs align, the data can be linked properly. However, since the dates do not align (File A data is from 01/08/2019 and File B from 15/08/2019), only attributes from File B will be updated without date association. The result will look like Option C, where the employee names are corrected based on File B's data, the squads are added from File B, and the tasks_completed and tasks_assigned are displayed from their respective files. The tasks_assigned from File B are shown without date association as File B's date doesn't match with File A's.

NEW QUESTION # 36

A client's data consists of three data streams as follows:

Data Stream A:

- * The data streams should be linked together through a parent-child relationship.
- * Out of the three data streams, Data Stream C is considered the source of truth for both the dimensions and measurements.
- * Data Stream C was set as a 'Parent', and the 'Override Media Buy Hierarchy' checkbox is checked. What should the Data Updates Permissions be set to for Data Stream B?

- A. There is no difference, all permissions will have a similar effect given the scenario.
- **B. Update Attributes and Hierarchies**
- C. Inherit Attributes and Hierarchies
- D. Update Attributes

Answer: B

Explanation:

With Data Stream C set as the 'Parent' and 'Override Media Buy Hierarchy' checked:

The appropriate setting for Data Stream B would be 'Update Attributes and Hierarchies'. This setting will ensure that the hierarchy and attributes from the parent data stream (C) are updated based on the child data stream (B) without overwriting the measurement data that the parent is the source of truth for.

The 'Override Media Buy Hierarchy' option checked indicates that the hierarchy of the parent is to be considered as the main one, but the attributes and hierarchy can still be updated from the child data stream, which aligns with option B.

NEW QUESTION # 37

An implementation engineer is requested to extract the first three-letter segment of the Campaign Name values.

For example:

Campaign Name: AFD@Mulop-1290

Desired outcome: AFD

Other examples:

Which formula will return the desired values?

- A. LEFT(EXTRACT(csv['campaign_name'],~',0),3)
- B. EXTRACT(EXTRACT(csv['campaign_name']/@,1),-,0)
- C. EXTRACT(csv['campaign_name'],-,0)
- D. LEFT(EXTRACT(csv['campaign_name']}/-/ ,1),3)
- **E. EXTRACT(csv['campaign_name'];@,1)**

Answer: E

Explanation:

The EXTRACT function is used to split a string based on a delimiter and return the segment at the specified position. The campaign names are structured with the segment of interest followed by an '@' sign. Therefore, the formula needs to extract the segment before the '@'.

The correct formula is: EXTRACT(csv['campaign_name']; '@', 1). This will take the 'campaign_name' field, split it at the '@' sign, and return the first segment (position 1), which is the three-letter code that is required. The other options are incorrect because they do not properly specify the delimiter and the segment position in the way needed to achieve the desired outcome.

NEW QUESTION # 38

What are two potential reasons for performance issues (when loading a dashboard) when using the CRM data stream type?

- A. When a data stream type 'CRM - Leads' is created, another complementary 'CRM - Opportunity' is created automatically.
- B. Pacing - daily rows are being created for every lead and opportunity keys
- C. No mappable measurements - all measurements are calculated
- D. The data is stored at the workspace level.

Answer: B,C

NEW QUESTION # 39

.....

We have collected the frequent-tested knowledge into our AP-215 practice materials for your reference according to our experts' years of diligent work. So our AP-215 exam braindumps are triumph of their endeavor. By resorting to our AP-215 practice dumps, we can absolutely reap more than you have imagined before. No only that you will pass your AP-215 Exam for sure, according you will get the certificate, but also you will get more chances to have better jobs and higher salaries.
