

# NSK300 Free Study Material | Valid NSK300 Exam Answers

ExamsLead offers top-notch Netskope NSK300 exam questions which will help you to pass the NSK300 exam with less effort.

## Netskope NSK300 Exam Questions 2024 - Your Exam Success Guaranteed

Do you want to crack the NSK300 Netskope Certified Cloud Security Architect Exam easily in one go? If yes, then ExamsLead is here to help you to prepare for the NSK300 Netskope Cloud Security Certification Program exam in the best possible way. ExamsLead offers Netskope NSK300 exam questions to ensure the success of the NSK300 Netskope Certified Cloud Security Architect Exam candidates. The Netskope NSK300 test questions provide the Netskope NSK300 real questions with their correct answers. The experts of ExamsLead have prepared and verified these Netskope NSK300 exam questions and answers for the NSK300 Netskope Certified Cloud Security Architect Exam preparation. Moreover, you can get these Netskope NSK300 exam questions in pdf format and Netskope NSK300 practice test engine. Here are the features of the Netskope Cloud Security Certification Program NSK300 exam questions offered by ExamsLead.

## Netskope NSK300 Exam Questions In Easy PDF Format

The Netskope NSK300 exam questions are available in an easy-to-understand pdf format so that you can download the Netskope Cloud Security Certification Program **NSK300 exam questions** on any device. So you can use it conveniently on your PC, laptop, Mac, tablet, and smartphone right after making the purchase. You can read and study the NSK300 Netskope Certified Cloud Security Architect Exam material anywhere, anytime with the help of these Netskope NSK300 pdf. The Netskope NSK300 pdf format makes it easy to access the Netskope Cloud Security Certification Program NSK300 exam questions even on the go.

This Netskope Certified Cloud Security Architect (NSK300) software has a simple-to-use interface. By using the NSK300 practice exam software, you can evaluate your mistakes at the end of every take and overcome them. Our software helps you to get familiar with the format of the original NSK300 test. Software lets you customize your Netskope NSK300 Practice Exam's duration and question numbers as per your practice needs. You just need an active internet connection to confirm the license of your product. All Windows-based computers support this NSK300 practice exam software.

## Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Troubleshooting:</b> This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Management:</b> This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Cloud Security Solutions:</b> This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Implementation:</b> This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.</li> </ul>

## Valid Netskope NSK300 Exam Answers & Well NSK300 Prep

Our App online version of NSK300 study materials, it is developed on the basis of a web browser, as long as the user terminals on the browser, can realize the application which has applied by the NSK300 simulating materials of this learning model, users only need to open the App link, you can quickly open the learning content in real time in the ways of the NSK300 Exam Guide, can let users anytime, anywhere learning through our App, greatly improving the use value of our NSK300 exam prep.

## Netskope Certified Cloud Security Architect Sample Questions (Q28-Q33):

### NEW QUESTION # 28

You are using Netskope CSPM for security and compliance audits across your multi-cloud environments. To decrease the load on the security operations team, you are researching how to auto-remediate some of the security violations found in low-risk environments.

Which statement is correct in this scenario?

- A. Netskope does not support automatic remediation of security violation results due to the high risk associated with it.
- B. You can use Netskope Cloud Exchange for auto-remediation of security violation results.
- **C. You can use Netskope Auto-remediation frameworks from the public Netskope GitHub Open Source repository for auto-remediation of security violation results.**
- D. You can use Netskope API-enabled Protection for auto-remediation of security violation results.

**Answer: C**

**Explanation:**

Netskope supports automatic remediation of security violations through its Auto-Remediation frameworks, which are available in the public Netskope GitHub Open Source repository. These frameworks allow for the automatic mitigation of risks associated with security misconfigurations in your cloud environment. The Netskope Auto-Remediation framework for AWS, for example, deploys a set of AWS Lambda functions that query the Netskope API at scheduled intervals and automatically mitigates supported violations<sup>1</sup>. Similarly, there are frameworks for GCP and other cloud environments that follow the same principle<sup>2</sup>. This capability is particularly useful for low-risk environments where the security operations team's workload can be reduced by automating the

remediation process.

The answer is based on the information provided by Netskope's community resources and documentation, which detail the use of their Auto-Remediation frameworks for various cloud platforms

#### NEW QUESTION # 29

You are asked to create a Real-time Protection policy to inspect outbound e-mail for DLP violations. You must prevent sensitive e-mail from leaving the corporate mail relay.

In this scenario, which Real-time Protection policy action must be specified?

- A. Add SMTP Header
- B. Forward to Proxy
- C. Block
- D. Alert

**Answer: A**

#### NEW QUESTION # 30

You have users connecting to Netskope from around the world. You need a way for your NOC to quickly view the status of the tunnels and easily visualize where the tunnels are located. Which Netskope monitoring tool would you use in this scenario?

- A. Network Events in Skope IT
- B. Alerts in Skope IT
- C. Web Usage Summary in Advanced Analytics
- D. Network Steering in Digital Experience Management

**Answer: D**

Explanation:

Network Steering in Digital Experience Management is the appropriate Netskope monitoring tool for this scenario. It allows the Network Operations Center (NOC) to quickly view the status of the tunnels and provides an easy way to visualize the locations of the tunnels. This tool is designed to give a clear overview of network health and performance, which is essential for managing global connectivity and ensuring the reliability of the service.

#### NEW QUESTION # 31

Your CISO asks that you provide a report with a visual representation of the top 10 applications (by number of objects) and their risk score. As the administrator, you decide to use a Sankey visualization in Advanced Analytics to represent the data in an efficient manner.

In this scenario, which two field types are required to produce a Sankey Tile in your report? (Choose two.)

- A. Period of Type
- B. Measure
- C. Dimension
- D. Pivot Ranks

**Answer: B,C**

Explanation:

□ Sankey diagram

□ Sankey diagram

To produce a Sankey Tile in a report that visually represents the top 10 applications by number of objects and their risk score, you would need:

\* Dimension (A): This field type would be used to represent the nodes in the Sankey visualization, which could be the applications in this case.

\* Measure (B): This field type would provide the weight of the links between the nodes, representing the number of objects or the risk score associated with each application.

These two field types are essential for creating a Sankey visualization as they define the structure and flow of data between different stages or categories within the visualization.

### NEW QUESTION # 32

- A. Create a Real-time Protection policy to allow the Browse activity to the Cloud Storage category
- B. Create a Real-time Protection policy to allow the Download activity to the Cloud Storage category
- C. Create a Real-time Protection policy to allow the Download activity to the Amazon S3 application
- D. Create a Real-time Protection policy to allow the Browse activity to the Amazon S3 application.

To solve the problem of normal websites not rendering properly due to a Real-time Protection policy that blocks all activities to non-corporate S3 buckets, the best solution is to create a Real-time Protection policy to allow the Browse activity to the Cloud Storage category. This approach will enable users to view content from various cloud storage services, including Amazon S3, without allowing full access to non-corporate S3 buckets. It's a more granular and less restrictive policy that allows necessary browsing activities while still maintaining control over the upload and download activities to non-corporate buckets<sup>1</sup>.
