

# High-efficiency NetSec-Architect Exam Practice Bootcamp Materials are wise for you - Test4Cram

Our NetSec-Architect study materials are excellent examination review products composed by senior industry experts that focuses on researching the mock examination products which simulate the real NetSec-Architect test environment. Experts fully considered the differences in learning methods and examination models between different majors and eventually formed a complete review system. It will help you to Pass NetSec-Architect Exam successfully after a series of exercises, correction of errors, and self-improvement.

Have tough-minded boy only, ability appeases billows, hoist the sails Yuan Hang. Our Palo Alto Networks NetSec-Architect exam dumps are the first step to bring you achievement. It provides you with pdf real questions and answers. By choosing it, you must put through Palo Alto Networks NetSec-Architect Certification that other people think it is very difficult. After you get the certification, you can lighten your heart and start a new journey.

## 2026 Authorized NetSec-Architect Test Dumps Free PDF | Valid Valid NetSec-Architect Exam Topics: Palo Alto Networks Network Security Architect

How can we occupy a place in a market where talent is saturated? The answer is a certificate. All kinds of the test certificationS, prove you through all kinds of qualification certificate, it is not hard to find, more and more people are willing to invest time and effort on the NetSec-Architect exam guide, because get the test NetSec-Architect Certification is not an easy thing, so, a lot of people are looking for an efficient learning method. And here, fortunately, you have found the NetSec-Architect exam braindumps, a learning platform that can bring you unexpected experiences.

### Palo Alto Networks Network Security Architect Sample Questions (Q14-Q19):

#### NEW QUESTION # 14

A retail organization wants to sanction the use of a particular third-party SaaS-based AI application for inventory management. This

application will need network layer data access to the organization's internal supply chain database with confidential information highly secured in its own DMZ. The implementation is delayed because the CISO is concerned that the sanctioned third-party AI application could get compromised and then used to exfiltrate customer PII from the internal database. Which solution will address the CISO's concern?

- A. Prisma AIRS with AI Security content updates to inspect the model's behavior and block anomalous database queries
- **B. AI Access Security with an Enterprise DLP subscription to identify and block the PII within the traffic to and from the SaaS application**
- C. Prisma AIRS with the AI agent deployed on the database server to monitor for unauthorized access attempts
- D. AI Access Security with an App-ID Cloud Engine subscription to precisely identify and then block the inventory management application entirely

**Answer: B**

Explanation:

Enterprise DLP integrated with AI Access Security inspects traffic to and from the SaaS application and can detect sensitive data such as customer PII. It enforces policies to prevent exfiltration even if the application is compromised, allowing the organization to safely sanction the AI application while protecting confidential data.

#### **NEW QUESTION # 15**

A large organization is building a hybrid AI environment. The plan is to develop proprietary machine learning (ML) models on-premises in a VMware NSX environment and create separate, cloud-native AI applications in a Google Kubernetes Engine (GKE) cluster environment. The CISO has requested a single solution that can offer runtime protection and visibility for the two environments. Which Prisma AIRS component or form factor should a security architect recommend to this customer?

- A. AI Security Posture Management (AI-SPM) scanner to connect to both on-premises and cloud environments to scan for misconfigurations
- **B. Prisma AIRS Network Intercept deployed as security virtual appliances in both environments**
- C. Prisma AIRS SaaS platform to ingest telemetry from both environments without requiring local enforcement points
- D. AI Agent Security installed on each individual virtual machine (VM) and container across both environments to provide host-level protection

**Answer: B**

Explanation:

Network Intercept provides runtime visibility and protection by inspecting live traffic flows within both virtualized environments like VMware NSX and containerized environments such as GKE.

This allows a single, consistent control point to monitor and secure AI workloads across hybrid environments, addressing both visibility and enforcement requirements at runtime.

#### **NEW QUESTION # 16**

A security architect needs to design a log collection architecture for a large organization with hundreds of firewalls distributed across multiple geographic regions. The primary requirement is to ensure that if a single Log Collector in any region fails, logs from the firewalls in that region will automatically be sent to another available Log Collector without manual intervention. What is the recommended Panorama feature to achieve this level of log collection resilience?

- **A. Log Collector Group for each geographic region**
- B. Storage capacity increase on each individual Log Collector
- C. Log Collectors deployed in a high availability (HA) pair
- D. Load balancer to distribute logs across all Log Collectors

**Answer: A**

Explanation:

A Log Collector Group allows multiple collectors to operate together so firewalls can automatically forward logs to any available collector in the group. If one collector fails, logging seamlessly continues to other members without manual reconfiguration, providing the required resilience across regions.

### NEW QUESTION # 17

Which factor must be taken into consideration when determining whether an NGFW edge architecture or a SASE architecture is appropriate to recommend to a customer planning to implement a Zero Trust Network Access (ZTNA) solution?

- A. ZTNA can be implemented regardless of the whether an NGFW or SASE solution is selected
- B. ZTNA requires User-ID and Group-ID information that is not available in Prisma SD-WAN
- C. ZTNA is a component of SASE and can only be implemented with Prisma Access
- D. ZTNA revolves around an agent on the endpoint and does not influence the overall NGFW or SASE architecture

**Answer: A**

Explanation:

Zero Trust Network Access is a security approach that can be implemented using either traditional NGFW-based architectures or SASE solutions. The key consideration is how identity, policy enforcement, and segmentation are applied, not the deployment model itself, since both architectures are capable of supporting ZTNA principles.

### NEW QUESTION # 18

An organization with offices throughout the world has an SD-WAN solution in which all traffic is backhauled to a central set of data centers. Many of the offices have IoT / OT devices. Which IoT Security requirement must be taken into consideration by the security architect when determining which Zero Trust network solution will help this organization evolve its security architecture?

- A. All DHCP requests must traverse the Prisma SD-WAN fabric for IoT / OT detection.
- B. Either a Prisma SD-WAN ION or an NGFW device must be present for accurate IoT / OT detection.
- C. The organization must have local NGFW for enforcement.
- D. A local sensor must be deployed as either an agent on the DHCP server or as a container on the virtual infrastructure.

**Answer: B**

Explanation:

Accurate IoT/OT detection requires direct visibility into local network traffic where devices communicate. This is achieved when a Prisma SD-WAN ION or a Next-Generation Firewall is deployed at the site, enabling proper device identification and profiling based on observed traffic and network behavior.

### NEW QUESTION # 19

.....

The Palo Alto Networks NetSec-Architect practice questions come with three easy-to-use and install formats. The certification for the Palo Alto Networks NetSec-Architect exam is a valuable, well-recognized professional credential. You can develop your skills and become a recognized specialist with the Palo Alto Networks Network Security Architect NetSec-Architect Certification in addition to learning about new technology requirements.

**Valid NetSec-Architect Exam Topics:** [https://www.test4cram.com/NetSec-Architect\\_real-exam-dumps.html](https://www.test4cram.com/NetSec-Architect_real-exam-dumps.html)

You only need 1-3 days to master the questions and answers of our NetSec-Architect test questions, you will get all the keywords content of the real test, you will feel easy and casual while facing the real test, Our website is considered to be the top test seller of NetSec-Architect practice materials, and gives you the best knowledge of the content of the syllabus of NetSec-Architect preparation materials, Palo Alto Networks NetSec-Architect exam questions PDF file is designed for easy comprehension, allowing you to download it onto various smart devices.

 Click to view larger image, Enter NetSec-Architect Reliable Exam Tutorial fixed costs, You only need 1-3 days to master the questions and answers of our NetSec-Architect test questions, you will get all the keywords Reliable NetSec-Architect Exam Preparation content of the real test, you will feel easy and casual while facing the real test.

## Free PDF Quiz Palo Alto Networks - NetSec-Architect Perfect Authorized Test Dumps

Our website is considered to be the top test seller of NetSec-Architect practice materials, and gives you the best knowledge of the content of the syllabus of NetSec-Architect preparation materials.

Palo Alto Networks NetSec-Architect exam questions PDF file is designed for easy comprehension, allowing you to download it onto various smart devices, Test4Cram presents Palo Alto Networks NetSec-Architect exam preparation material, which is best to help you to clear your professional NetSec-Architect Palo Alto Networks Network Security Generalist , Palo Alto Networks Palo Alto Networks Network Security Architect , Palo Alto Networks Network Security Generalist, Palo Alto Networks Network Security Generalist Certifications Exam.

We are sure that using NetSec-Architect Exam Questions preparation material will support you in passing the NetSec-Architect exam with confidence.
