

Trustworthy Latest OGEA-101 Exam Tips | Amazing Pass Rate For OGEA-101: TOGAF Enterprise Architecture Part 1 Exam | Authorized Latest OGEA-101 Exam Practice

What's more, part of that ITExamDownload OGEA-101 dumps now are free: https://drive.google.com/open?id=1D7zOZKTvmrYxL_CGngtQ2XwHd871jCxV

ITExamDownload is a wonderful study platform that can transform your effective diligence in to your best rewards. By years of diligent work, our experts have collected the frequent-tested knowledge into our OGEA-101 exam materials for your reference. So our OGEA-101 Practice Questions are triumph of their endeavor. I can say that no one can know the OGEA-101 study guide better than them and our quality of the OGEA-101 learning quiz is the best.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Topic 2	<ul style="list-style-type: none">Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.
Topic 3	<ul style="list-style-type: none">Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.

Topic 4	<ul style="list-style-type: none"> Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.
Topic 5	<ul style="list-style-type: none"> Implementation Governance: This topic of The Open Group OGEA-101 Exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam
Topic 6	<ul style="list-style-type: none"> Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam
Topic 7	<ul style="list-style-type: none"> Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.
Topic 8	<ul style="list-style-type: none"> Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.

Quiz 2026 The Open Group Perfect OGEA-101: Latest TOGAF Enterprise Architecture Part 1 Exam Exam Tips

ITExamDownload try hard to makes OGEA-101 exam preparation easy with its several quality features. Our OGEA-101 exam dumps come with 100% refund assurance. We are dedicated to your accomplishment, hence pledges you victory in OGEA-101 exam in a single attempt. If for any reason, a user fails in OGEA-101 exam then he will be refunded the money after the process. Also, we offer 1 year free updates to our OGEA-101 Exam esteemed users; and these updates will be entitled to your account right from the date of purchase. Also the 24/7 Customer support is given to users, who can email us if they find any haziness in the OGEA-101 exam dumps, our team will merely answer to your all OGEA-101 exam product related queries.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q87-Q92):

NEW QUESTION # 87

Complete the sentence. Risk management involves: risk classification, identification,

- A. reporting, treatment
- B. auditing, evaluation
- C. assessment, monitoring, mitigation and
- D. measurement, response

Answer: C

Explanation:

In TOGAF's treatment of risk within architecture governance and ADM Guidelines & Techniques, risk management is seen as a continuous process including several phases. First one classifies potential risk types.

Then one identifies specific risks. After identification comes assessment (evaluating likelihood and impact), monitoring (tracking over time), mitigation (taking actions to reduce the risk), and related response or treatment options to decide what to do with residual risk. That sequence-classification, identification, assessment, monitoring, mitigation, and response-completes the risk management life cycle. It does not stop at evaluation or reporting; it includes active monitoring, control, and reaction to risks over time.

NEW QUESTION # 88

Complete the sentence The Architecture Landscape is divided into levels known as _____.

- A. Transitional Complete and incremental Architectures
- **B. Segment Strategic and Capability Architectures**
- C. Baseline. Transition and To Be Architectures
- D. Gaps Plateaus, and Target Architectures

Answer: B

Explanation:

The Architecture Landscape is divided into levels known as Segment Strategic and Capability Architectures. These levels correspond to different scopes and purposes of architectures within an enterprise. Segment Architectures are architectures that address specific business units, functions, or processes within an enterprise. Strategic Architectures are architectures that provide a high-level view of the enterprise's vision, goals, and direction. Capability Architectures are architectures that address specific business capabilities or services that span multiple segments or domains. Reference: The TOGAF Standard | The Open Group Website, Section 2.4 Architecture Repository.

NEW QUESTION # 89

What can be introduced to formalize a joint agreement between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture?

- A. The Statement of Architecture Work
- B. Non-disclosure Agreement
- **C. Architecture Contracts**
- D. Service Level Agreements

Answer: C

Explanation:

Comprehensive and Detailed Explanation

In TOGAF, Architecture Contracts are agreements between development partners and sponsors that define:

- * The deliverables to be produced.
- * The quality expectations.
- * The fitness-for-purpose of the architecture.
- * The responsibilities of each party and the governance arrangements.

Architecture Contracts are a key part of Phase G: Implementation Governance, where they are used to manage and control architecture implementation. They help ensure that implementation projects remain aligned with the approved Target Architecture and business objectives.

They serve as the formal mechanism for:

- * Validating that architecture deliverables meet stakeholder expectations.
- * Providing a measurable basis for conformance assessment.
- * Supporting architecture governance by linking architectural intent with project execution.

Why the other options are incorrect

- * B. The Statement of Architecture Work: This defines the scope, approach, resources, and schedule for architecture work, but it is not a joint agreement on deliverables and fitness-for-purpose.
- * C. Service Level Agreements (SLAs): These are agreements about operational service levels (e.g., availability, performance), not architecture deliverables.
- * D. Non-disclosure Agreement (NDA): This protects confidentiality of information but does not address deliverables, quality, or fitness-for-purpose of an architecture.

NEW QUESTION # 90

Which of the following are two of the architecture domains that are considered as subsets of an overall Enterprise Architecture?

- **A. Business, Technology**
- B. Vision, Target
- C. Technology, Digital

- D. Strategy, Enterprise

Answer: A

Explanation:

In the TOGAF Standard, the concept of an Enterprise Architecture is broken into several primary architecture domains. These domains provide a structured way to describe the enterprise from multiple perspectives that collectively support transformation and governance. TOGAF specifies four core architecture domains:

Business Architecture, Data Architecture, Application Architecture, and Technology Architecture. These domains, when combined, form a comprehensive view of how the enterprise functions, how information flows, how systems interact, and what technologies support the organization.

Among the choices provided, only Business and Technology are officially recognized architecture domains in TOGAF. The Business Architecture describes business strategy, governance, organization, and key processes.

The Technology Architecture defines the logical and physical technology infrastructure necessary to support mission-critical applications and data. The other answer options do not represent TOGAF architecture domains; for example, "Strategy," "Vision," "Target," or "Digital" are not formal architecture domains in TOGAF. Thus, the pair that correctly identifies subsets of an enterprise architecture according to the TOGAF framework is Business and Technology Architecture.

NEW QUESTION # 91

Exhibit:

Consider the image showing basic architectural concepts.
What are items A and B?

- A. A-Candidate Architecture, B-Trade-off
- **B. A-Stakeholder, B-Concern**
- C. A-Base Architecture, B-Target Architecture
- D. A-User, B-Requirement

Answer: B

Explanation:

In the context of TOGAF, a stakeholder is any individual, team, or organization who has interests in, or concerns relative to, the outcome of the architecture. Concerns are those interests which pertain to any aspect of the system's functioning, development or operation, including considerations such as performance, reliability, and security¹. References:
