CloudSec-Pro Pass Test - CloudSec-Pro Reliable Study Notes

That is the reason TrainingDump has compiled a triple-formatted CloudSec-Pro exam study material that fulfills almost all of your preparation needs. The Palo Alto Networks CloudSec-Pro Practice Test is compiled under the supervision of 90,000 Palo Alto Networks professionals that assure the passing of the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam on your first attempt.

Palo Alto Networks Cloud Security Professional Sample Questions (Q213-Q218):

NEW QUESTION # 213
Which RQL will trigger the following audit event activity?

- A. event from cloud.audit_logs where cloud.service = s3.amazonaws.com' AND json.rule = $.userAgent contains 'parrot1
- B. event from cloud.audit_logs where operation IN('cloudsql.instances.update','cloudsql.sslCerts.create', cloudsql.instances.create','cloudsq
- C. event from cloud.audit_logs where operation ConsoleLogin AND user = 'root'
- D. event from cloud.audit_logs where operation IN ('GetBucketWebsite', 'PutBucketWebsite', 'DeleteBucketWebsite')

Answer: C

Explanation:

The correct RQL to trigger the audit event activity shown is Option A. This RQL is designed to capture events from cloud audit logs where a ConsoleLogin operation occurs by the 'root' user. The given audit event details match this RQL's criteria, which specifies the operation type and the user involved in the event.

NEW QUESTION # 214

A customer wants to monitor its Amazon Web Services (AWS) accounts via Prisma Cloud, but only needs the resource configuration to be monitored at present.
Which two pieces of information are needed to onboard this account? (Choose two.)

- A. Active Directory ID
- B. CloudTrail
- C. External ID
- D. RoleARN

Answer: C,D

Explanation:
To onboard an AWS account for monitoring by Prisma Cloud, specifically for resource configuration monitoring, the required pieces of information include:
* A. External ID: The External ID is a unique identifier used in the trust relationship between Prisma Cloud and the AWS account, ensuring secure access, making it a correct choice.
* D. RoleARN: The Role Amazon Resource Name (RoleARN) is necessary to grant Prisma Cloud the required permissions to access and monitor the AWS account resources, making it a correct choice.
Option B (CloudTrail) is related to AWS logging but is not required solely for onboarding. Option C (Active Directory ID) is not relevant to AWS account onboarding for Prisma Cloud.

NEW QUESTION # 215

Which two bot categories belong to unknown bots under Web-Application and API Security (WAAS) bot protection? (Choose two.)

- A. Web scrapers
- B. News bots
- C. HTTP libraries
- D. Search engine crawlers

Answer: A,C

Explanation:
Under Web-Application and API Security (WAAS) bot protection in Prisma Cloud, unknown bots are categorized based on their behavior and characteristics. Web scrapers and HTTP libraries fall into the category of unknown bots. Web scrapers are automated scripts or programs that extract data from websites, often without permission, while HTTP libraries are tools used for making HTTP requests. Both can be used benignly but may also be employed in malicious activities, hence their classification as unknown bots requiring further analysis.

NEW QUESTION # 216

Which intensity setting for anomaly alerts is used for the measurement of 100 events over 30 days?

- A. Medium
- B. Low
- C. High
- D. Very High

Answer: A

Explanation:
In the context of setting anomaly alert intensities in Prisma Cloud, an intensity setting of "Medium" could be used for the measurement of 100 events over 30 days. This setting indicates a moderate level of anomaly detection sensitivity, which is suitable for environments where there is a need to balance between detecting potential security issues and minimizing false positives.

NEW QUESTION # 217

A DevOps lead reviewed some system logs and notices some odd behavior that could be a data exfiltration attempt. The DevOps lead only has access to vulnerability data in Prisma Cloud Compute, so the DevOps lead passes this information to SecOps. Which pages in Prisma Cloud Compute can the SecOps lead use to investigate the runtime aspects of this attack?

- **A. The SecOps lead should use the Incident Explorer page and Monitor > Events > Container Audits.**
- B. The SecOps lead should investigate the attack using Vulnerability Explorer and Runtime Radar.
- C. The SecOps lead should use Incident Explorer and Compliance Explorer.
- D. The SecOps lead should review the vulnerability scans in the CI/CD process to determine blame.

Answer: A

Explanation:
To investigate the runtime aspects of a potential data exfiltration attempt, the SecOps lead in Prisma Cloud Compute should focus on areas that provide insights into runtime activity and potential threats. C. The SecOps lead should use the Incident Explorer page and Monitor > Events > Container Audits. These sections provide detailed information on security incidents and container-level activities, enabling a thorough investigation into the runtime behavior that might indicate a security issue.

NEW QUESTION # 218

......

To some extent, to pass the CloudSec-Pro exam means that you can get a good job. The CloudSec-Pro exam materials you master will be applied to your job. The possibility to enter in big and famous companies is also raised because they need outstanding talents to serve for them. Our CloudSec-Pro Test Prep is compiled elaborately and will help the client a lot.
