You do not worry about that you get false information of VMCE_v12 guide materials. According to personal preference and budget choice, choosing the right goods to join the shopping cart. The 3 formats of VMCE_v12 study materials are PDF, Software/PC, and APP/Online. Each format has distinct strength and shortcomings. We have printable PDF format prepared by experts that you can study our VMCE_v12 training engine anywhere and anytime as long as you have access to download. We also have installable software application which is equipped with VMCE_v12 simulated real exam environment.

Veeam VMCE_v12 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs. |
| Topic 2 | <ul style="list-style-type: none">Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique. |
| Topic 3 | <ul style="list-style-type: none">Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements. |
| Topic 4 | <ul style="list-style-type: none">Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas. |
| Topic 5 | <ul style="list-style-type: none">Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories. |
| Topic 6 | <ul style="list-style-type: none">Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover. |
| Topic 7 | <ul style="list-style-type: none">Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers. |
| Topic 8 | <ul style="list-style-type: none">Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data. |

| | |
|----------|---|
| Topic 9 | <ul style="list-style-type: none"> Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents. |
| Topic 10 | <ul style="list-style-type: none"> Initial security considerations: This section defines ways and tools to secure the Veeam backup server. |
| Topic 11 | <ul style="list-style-type: none"> Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager. |
| Topic 12 | <ul style="list-style-type: none"> Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform. |
| Topic 13 | <ul style="list-style-type: none"> Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment. |
| Topic 14 | <ul style="list-style-type: none"> Data protection strategies: This section of the exam covers an overview of data protection strategies. |

High Pass-rate Latest VMCE_v12 Real Test & The Best Torrent to help you pass Veeam VMCE_v12

The Veeam Certified Engineer v12 (VMCE_v12) certification has become a basic requirement to advance rapidly in the information technology sector. Since Veeam VMCE_v12 actual dumps are vital to prepare quickly for the examination. Therefore, you will need them if you desire to ace the Veeam Certified Engineer v12 (VMCE_v12) exam in a short time.

Veeam Certified Engineer v12 Sample Questions (Q61-Q66):

NEW QUESTION # 61

A backup job is configured as follows.

| | |
|------------------------|--|
| Mode | Forward incremental with weekly synthetic full |
| Start time | Every day at 20:00 |
| Active full | Sunday |
| Restore points to keep | 14 restore points |
| Time to finish job | 1 hour |
| Job created | Friday, 13:00 |

How many full and incremental restore points will be in a repository on day 16 at 23:00?

- A. 1 full and 13 incremental
- B. 3 full and 14 incremental
- C. 2 full and 12 incremental
- D. 3 full and 15 incremental

Answer: C

NEW QUESTION # 62

What should be implemented when backing up NAS file shares to ensure there is more than one copy of the data?

- A. Secondary copy
- B. Archive repository
- C. Cache repository
- D. Backup repository

Answer: A

Explanation:

When backing up NAS file shares, it's essential to ensure that more than one copy of the data exists to adhere to best practices for data protection, often referred to as the 3-2-1 Rule (3 total copies of your data, 2 of which are local but on different devices, and at least 1 copy offsite). Implementing a secondary copy of the data provides this additional layer of redundancy. In Veeam, this can be achieved by creating backup copy jobs, which ensure that there is a secondary copy of the data, possibly stored in a different location. This is not to be confused with the simple use of backup repositories, which are storage locations for primary backups, or with cache/archive repositories which serve different purposes in the backup process.

NEW QUESTION # 63

Veeam Backup and Replication is currently configured with backup jobs that are targeting a local Backup Repository on a Windows Server.

The backups are now configured to run periodically every 6 hours. The engineer wants to create a secondary copy of the backups. However, due to bandwidth and compute restrictions, the copies must be created and transferred only once a day.

Which option should the engineer choose to achieve this goal?

- A. [Add the repository to a Scale-Out Backup repository, extend it with a Public Cloud Object Storage as Capacity tier in copy mode
- B. Find a Service Provider with Offsite Backup services, create a Backup Copy job with Immediate Copy (Mirroring) mode to the Service Provider repository
- C. Add the repository to a Scale-Out Backup repository, extend it with a Public Cloud Object Storage as Capacity tier in copy and move mode, and set the operational restore window to 7 days
- **D. Configure a Hardened Linux Repository, create a Backup Copy job with Periodic Copy (Pruning) mode to this repository and schedule it to run once a day**

Answer: D

Explanation:

To achieve the goal of creating a secondary copy of the backups that is transferred only once a day, the engineer should configure a Hardened Linux Repository and create a Backup Copy job with Periodic Copy (Pruning) mode to this repository, scheduling it to run once a day. This setup respects the bandwidth and compute limitations while ensuring a daily copy of the backups.

NEW QUESTION # 64

A company needs several VMware thick provisioned VMs restored. The physical proxies used for restoration have access to the Fibre Channel datastores used by VMware. Which transport mode will be used by default to restore these VMs?

- A. Network mode
- B. Quick Migration
- C. Virtual appliance
- **D. Direct Storage Access**

Answer: D

Explanation:

Explanation:

NEW QUESTION # 65

Which two public cloud infrastructures can be backed up without an agent? (Choose two.)

- A. Tencent Cloud
- **B. Microsoft Azure**
- C. Oracle VM Virtualbox
- D. Alibaba Cloud
- **E. AWS**

Answer: B,E

Explanation:

Veeam provides agentless backup solutions for several public cloud infrastructures, among which AWS (Amazon Web Services) and Microsoft Azure are the prominent platforms supported. Thus, the correct answers are A: AWS and E: Microsoft Azure.

* For AWS, Veeam offers Veeam Backup for AWS, an agentless solution designed to protect AWS workloads by leveraging native AWS technologies. This solution allows for the backup and recovery of AWS EC2 instances without the need for agents inside the instances, providing efficient and flexible cloud-native data protection.

* In the case of Microsoft Azure, Veeam Backup for Microsoft Azure provides a similar agentless data protection capability, allowing for the backup and recovery of Azure VMs. This solution also utilizes native Azure technologies to facilitate seamless integration and management of backups within the Azure ecosystem.

These solutions are designed to provide comprehensive data protection for cloud workloads, simplifying management while ensuring robust backup and recovery capabilities in these public cloud environments.

NEW QUESTION # 66

.....

It is known to us that more and more companies start to pay high attention to the VMCE_v12 certification of the candidates. Because these leaders of company have difficulty in having a deep understanding of these candidates, may it is the best and fast way for all leaders to choose the excellent workers for their company by the VMCE_v12 certification that the candidates have gained. There is no doubt that the certification has become more and more important for a lot of people, especial these people who are looking for a good job, and it has been a general trend. More and more workers have to spend a lot of time on meeting the challenge of gaining the VMCE_v12 Certification by sitting for an exam.
