## IIA Business Knowledge for Internal Auditing Sample Questions (Q117-Q122):

### NEW QUESTION # 117

An organization with global headquarters in the United States has subsidiaries in eight other nations. If the organization operates with an ethnocentric attitude, which of the following statements is true?

- A. Orders, commands, and advice are sent to the subsidiaries from headquarters
- B. Standards used for evaluation and control are determined at local subsidiaries, not set by headquarters

- C. People of local nationality are developed for the best positions within their own country
- D. There is a significant amount of collaboration between headquarters and subsidiaries

**Answer: A**

Explanation:

Reference: IIA Business Knowledge for Internal Auditing, Organizational Structure and Culture section.

#### NEW QUESTION # 118

The cost of statistical quality control in a product quality cost system is categorized as a(n):

- **A. Appraisal cost.**
- B. Training cost.
- C. Internal failure cost.
- D. External failure cost.

**Answer: A**

Explanation:

The following are the four categories of quality costs: prevention, appraisal, internal failure, and external failure (lost opportunity). Appraisal costs include quality control programs, inspection, and testing. However, some authorities regard statistical quality and process control as preventive activities because they not only detect faulty work but also allow for adjustment of processes to avoid future defects.

#### NEW QUESTION # 119

A bank is designing an on-the-job training program for its branch managers. The bank would like to design the program so that participants can complete it as quickly as possible. The training program requires that certain activities be completed before others. For example, a participant cannot make credit loan decisions without first having obtained experience in the loan department. An appropriate scheduling technique for this training program is:

- A. Linear programming.
- B. Sensitivity analysis.
- **C. PERT/CPM.**
- D. Queuing theory.

**Answer: C**

Explanation:

PERT/CPM is a network technique for scheduling interrelated time series activities and identifying any critical paths in the series of activities. The critical path is the longest path through the network.

#### NEW QUESTION # 120

Which of the following attributes of data is the most significantly impacted by the internet of things?

- A. Veracity
- **B. Velocity**
- C. Normalization
- D. Structuration

**Answer: B**

Explanation:

\* Understanding How IoT Impacts Data Attributes:

\* The Internet of Things (IoT) refers to connected devices that continuously collect and transmit data in real-time.

\* IoT generates massive amounts of data at high speeds, affecting the velocity of data processing and analysis.

\* Why Velocity is the Most Affected Attribute:

\* Velocity refers to the speed at which data is generated, processed, and transmitted.

\* IoT devices continuously stream data, requiring real-time or near-real-time processing.

- \* Examples include:
  - \* Smart sensors in factories sending real-time equipment status.
  - \* Wearable devices tracking health metrics every second.
  - \* Smart cities using IoT for traffic monitoring and instant updates.
  - \* Why Other Options Are Incorrect:
  - \* A. Normalization - Incorrect.
  - \* Normalization refers to organizing database structures, but IoT deals with data transmission speed rather than database design.
  - \* C. Structuration - Incorrect.
  - \* Structuration relates to how data is formatted (structured vs. unstructured), but IoT's biggest challenge is real-time data flow.
  - \* D. Veracity - Incorrect.
  - \* Veracity concerns data accuracy and reliability, which is a challenge in IoT but not the most significant impact compared to velocity.
  - \* IIA's Perspective on IoT and Data Management:
  - \* IIA Standard 2110 - Governance emphasizes the need for robust data processing frameworks to handle IoT-generated data velocity.
  - \* IIA GTAG (Global Technology Audit Guide) on Big Data highlights real-time data analytics and IoT challenges.
  - \* ISO 27001 Information Security Standard recommends ensuring real-time data processing controls for IoT security and management.
- IIA References:
- \* IIA Standard 2110 - IT Governance & Data Management
  - \* IIA GTAG - IoT and Big Data Risks
  - \* ISO 27001 - Information Security and Real-Time Data Processing
- Thus, the correct and verified answer is B. Velocity.

#### NEW QUESTION # 121

When executive compensation is based on the organization's financial results, which of the following situations is most likely to arise?

- A. The organization encourages employee behavior that is inconsistent with the interests of relevant stakeholders.
- B. The organization reports inappropriate estimates and accruals due to poor accounting controls.
- C. The organization uses an unreliable process for gathering and reporting executive compensation data.
- D. The organization experiences increasing discontent of employees, if executives are eligible for compensation amounts that are deemed unreasonable.

**Answer: A**

#### NEW QUESTION # 122

.....
