It will have all the questions that you should cover for the The Open Group OGBA-101 exam. If you are facing any issues with the products you have, then you can always contact our 24/7 support to get assistance.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78
What component of the Architecture Repository is an architectural representation of SBBs supporting the Architecture Landscape?

- A. Solutions Continuum
- B. Solutions Landscape
- C. Solutions Repository
- D. Solutions Library

Answer: A

Explanation:
In the context of the TOGAF Architecture Repository, the Solutions Continuum represents an architectural representation of Solution Building Blocks (SBBs) supporting the Architecture Landscape. It provides a view of the available and implemented solutions that can be used or adapted for new initiatives.

NEW QUESTION # 79
What criteria for a good architecture principle Indicates that it is sufficiently definitive and precise to support consistent decision-making in complex situations?

- A. Completeness
- B. Consistency
- C. Stability
- D. Robustness

Answer: D

NEW QUESTION # 80
Which step during development of a business scenario ensures that each iteration is managed as a mini-project?

- A. Gathering Step
- B. Reviewing Step
- C. Planning Step
- D. Documenting Step

Answer: C

Explanation:
The step during development of a business scenario that ensures that each iteration is managed as a mini-project is the Planning Step3. The Planning Step is a preparatory step that defines how to approach each iteration of developing a business scenario3. The Planning Step involves setting up a project team with clear roles and responsibilities, defining a project plan with milestones and deliverables, identifying stakeholders and their concerns, establishing communication channels and feedback mechanisms, and securing resources and budget3. The Planning Step can help to ensure that each iteration is managed as a mini-project with clear objectives, scope, schedule, quality criteria, risks, and issues.

NEW QUESTION # 81

In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Phase B
- B. Phase A
- C. Preliminary Phase
- D. Phase E

Answer: A

Explanation:

In TOGAF's Architecture Development Method (ADM), the information map is linked to other business blueprints duringPhase B: Business Architecture. Phase B is focused on developing the Business Architecture, which involves creating and aligning various business architecture artifacts, such as capability maps, value streams, organizational maps, and information maps.

The information map provides an outline of the critical information needed to support the business capabilities and processes. By linking the information map with other business blueprints (like the process and capability maps), architects can ensure alignment and coherence across business architecture components.

This helps in creating a clear, unified view of how information flows and supports business operations and value creation.

* Option B (Phase E)is incorrect because Phase E (Opportunities and Solutions) is primarily focused on identifying potential solutions and prioritizing initiatives for implementation.

* Option C (Phase A)is incorrect as Phase A (Architecture Vision) is focused on defining the scope and vision of the overall architecture effort and gaining stakeholder agreement.

* Option D (Preliminary Phase)is incorrect as it focuses on establishing the architecture framework and principles rather than creating detailed business blueprints.

Therefore,Phase B: Business Architectureis the correct answer, as it is the stage where the information map is integrated with other business architecture artifacts to create a cohesive business architecture.

NEW QUESTION # 82

Which of the following describes how business models are used within the TOGAF standard?

- A. To tailor the enterprise architecture for the business.
- B. To help formulate architecture and business principles.
- C. To identify, classify, and mitigate risks to the business.
- D. To document the factors impacting the business migration plan.

Answer: B

Explanation:

Business models play a significant role in shaping the principles that guide both architecture development and business operations within the TOGAF framework. Here's how:

* Understanding value creation:Business models articulate how an organization creates, delivers, and captures value. This understanding informs the development of architecture principles that support and enable value creation.

* Aligning architecture with business goals:By analyzing the business model, architects can identify the key drivers and priorities of the business. This helps to formulate architecture principles that ensure the architecture aligns with the business goals and strategy.

* Defining desired behaviors:Business models often implicitly or explicitly define desired behaviors and ways of working within an organization. These behaviors can be codified into business principles that guide decision-making and actions across the enterprise.

* Promoting consistency:Using the business model as a foundation for principles ensures consistency between the architecture and the business strategy. This helps to avoid conflicts and ensures that the architecture supports the overall direction of the organization.
