SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q50-Q55):

NEW QUESTION # 50

What can you do with the SAP for Me mobile app? Note: There are 2 correct answers to this question.

- A. Access the SAP ONE Support Launchpad

- B. Get full transparency into your SAP product portfolio
- C. Download learning content from SAP Learning Hub
- D. Interact with SAP easily

Answer: B,D

Explanation:

The SAP for Me mobile app allows you to easily interact with SAP anywhere and anytime. You can review and reply to SAP support cases, start a chat with an expert, monitor your SAP cloud service status, receive notifications about important events, and more. The app also provides you with full transparency into your SAP product portfolio, including your licenses, systems, users, orders, contracts, and invoices. You can view the details of each product and service, as well as access relevant resources and tools. NEW QUESTION # 51

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer?

Note: There are 3 correct answers to this question.

- A. Test system
- B. Trial system
- C. Sandbox system
- D. Starter system
- E. Development system

Answer: A,C,D

Explanation:

* Sandbox system: This is an optional system that can be used to explore the SAP S/4HANA Cloud Public Edition capabilities and features before the implementation project starts. It is not connected to the starter system or the test system and does not have any data migration or configuration tools. It can be refreshed on demand by the customer¹.

* Starter system: This is the first system that is provisioned for the customer after the contract is signed.

It is used to perform the fit-to-standard workshops, where the customer validates the standard processes and identifies the gaps and requirements. It also serves as the configuration system, where the customer configures the business processes using the SAP Central Business Configuration tool. The starter system is connected to the test system and can transfer the configuration and master data to it².

* Test system: This is the second system that is provisioned for the customer after the starter system is configured. It is used to perform the integration testing, user acceptance testing, data migration, and cutover activities. It also serves as the production system, where the customer runs the live business processes after the go-live. The test system is connected to the starter system and can receive the configuration and master data from it³.

The systems that are not used to implement SAP S/4HANA Cloud Public Edition for a customer are:

* Trial system: This is a system that can be used to experience the SAP S/4HANA Cloud Public Edition solution for a limited time. It is not connected to any other system and does not have any data migration or configuration tools. It is not part of the implementation project and does not require a contract⁴.

* Development system: This is a system that can be used to develop custom applications or extensions using the SAP Business Technology Platform. It is not part of the SAP S/4HANA Cloud Public Edition landscape and does not have any data migration or configuration tools. It requires a separate contract and license.

NEW QUESTION # 52

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Conduct the Digital Discovery Assessment to identify extension requirements.
- B. Conduct the Fit-to-Standard analysis to gather configuration values.
- C. Use the Test system to demonstrate SAP Best Practice processes.
- D. Define the organizational structure and chart of accounts.

Answer: B,C

NEW QUESTION # 53

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Assign PFCG profiles to a business role
- **B. Assign business catalogs to a business role**
- **C. Maintain restrictions**
- D. Maintain technical catalogs

Answer: B,C

NEW QUESTION # 54

You have assigned a deployment target in SAP Central Business Configuration, but have not yet completed the Confirm Scoping milestone.

Which of the following tasks can you complete? Note: There are 2 correct answers to this question.

- A. Define the group currency.
- **B. Assign a different deployment target.**
- C. Create a company code.
- **D. Rename the deployment target.**

Answer: B,D

Explanation:

You can rename or assign a different deployment target in SAP Central Business Configuration before completing the Confirm Scoping milestone. This allows you to change the system tenant that will be used for the initial deployment of the content. However, you cannot define the group currency or create a company code before confirming the scoping, as these are configuration activities that require a deployed system. References = Deployment Targets, Assigning a Deployment Target

NEW QUESTION # 55

.....
