

# Key Features Of Desktop SAP C\_SEC\_2405 Practice Exam Software

2026 Latest Actual4test C\_SEC\_2405 PDF Dumps and C\_SEC\_2405 Exam Engine Free Share: <https://drive.google.com/open?id=1iX3zF2dPo6SetydD0JtKwYdioE8sQyPC>

SAP certification C\_SEC\_2405 exam can give you a lot of change. Such as work, life would have greatly improve. Because, after all, C\_SEC\_2405 is a very important certified exam of SAP. But C\_SEC\_2405 exam is not so simple.

## SAP C\_SEC\_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>User Administration:</b> This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>SAP Fiori Authorizations and SAP S</b></li> <li>• <b>4HANA:</b> This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S</li> <li>• <b>4HANA.</b> It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Public Cloud User and Role Management:</b> This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.</li> </ul>

## Get Reliable Valid C\_SEC\_2405 Real Test and Pass Exam in First Attempt

They struggle to find the right platform to get actual SAP Certified Associate - Security Administrator (C\_SEC\_2405) exam questions and achieve their goals. Actual4test has made the product after seeing the students struggle to solve their issues and help them pass the C\_SEC\_2405 certification exam on the first try. Actual4test has designed this C\_SEC\_2405 Practice Test material after consulting with a lot of professionals and getting their good reviews so our customers can clear C\_SEC\_2405 certification exam quickly and improve themselves.

## SAP Certified Associate - Security Administrator Sample Questions (Q63-

## Q68):

### NEW QUESTION # 63

What does SAP Key Management Service (KMS) do to secure cryptographic keys? Note: There are 3 correct answers to this question.

- A. Store keys
- B. Rotate keys
- C. Conceal keys
- D. Transmit keys
- E. Generate keys

**Answer: A,B,E**

Explanation:

The SAP Key Management Service (KMS) provides robust mechanisms to secure cryptographic keys within SAP environments. It supports the generation of cryptographic keys, ensuring that keys are created with high entropy and adhere to security standards, which is critical for encryption and authentication processes. KMS also securely stores keys in a protected environment, safeguarding them against unauthorized access and ensuring availability for authorized applications. Additionally, KMS facilitates key rotation, allowing organizations to periodically update keys to mitigate risks associated with long-term key exposure, thereby enhancing security. While concealing or transmitting keys may be part of broader security practices, these are not primary functions of SAP KMS. Instead, KMS focuses on generating, storing, and rotating keys to maintain a secure cryptographic infrastructure, aligning with best practices for data protection and compliance in SAP systems.

### NEW QUESTION # 64

Which access categories are available to maintain restrictions in SAP S/4HANA Cloud Public Edition? Note: There are 3 correct answers to this question.

- A. Read, Value Help (read access)
- B. Write, Read, Value Help (write access)
- C. Read (read access)
- D. Value Help (value help access)
- E. Write, Read (write access)

**Answer: A,C,D**

Explanation:

\* Context: Access categories in SAP S/4HANA Cloud Public Edition define the type of restrictions applied to business users' data access.

\* Solution Explanation:

\* A: "Read" allows view-only access.

\* C: "Read, Value Help" includes read access and field-level help for specific data.

\* D: "Value Help" restricts access to value-help fields.

SAP Security References:

\* SAP Authorization Management in S/4HANA Cloud

### NEW QUESTION # 65

To connect to data sources that are NOT all based on OData, which of the following options does SAP recommend you use?

- A. SAP Process Integration
- B. SAP Integration Suite
- C. OData Provisioning service
- D. Cloud connector

**Answer: B**

Explanation:

For connecting to data sources that are not exclusively based on OData, SAP recommends using the SAP Integration Suite. This

comprehensive platform supports a wide range of integration scenarios, including OData, REST, SOAP, and other protocols, making it ideal for connecting diverse data sources, whether on- premise or cloud-based. The SAP Integration Suite provides tools for data mapping, transformation, and orchestration, ensuring seamless and secure data exchange across heterogeneous systems. In contrast, the OData Provisioning service is specifically designed for OData-based integrations, limiting its applicability to non-OData sources. The Cloud connector facilitates secure connectivity between SAP BTP and on-premise systems but is not a complete integration solution. SAP Process Integration, while used for integration in older SAP landscapes, lacks the flexibility and cloud-native capabilities of the SAP Integration Suite. By leveraging the SAP Integration Suite, organizations can achieve robust, scalable, and secure integrations, aligning with SAP's modern integration strategy for complex, multi-protocol environments.

#### NEW QUESTION # 66

Which authorization objects can be used to restrict access to SAP Enterprise Search models in the SAP Fiori launchpad? Note: There are 2 correct answers to this question.

- A. RSDDLTP
- B. S\_ESH\_ADM
- C. SDDLVIEW
- D. S\_ESH\_CONN

**Answer: C,D**

Explanation:

To restrict access to SAP Enterprise Search models in the SAP Fiori launchpad, the authorization objects SDDLVIEW and S\_ESH\_CONN are used. SDDLVIEW controls access to data definition language (DDL) views, which are often underlying components of search models, ensuring that only authorized users can access or execute these views within the Fiori environment. S\_ESH\_CONN governs access to enterprise search connectors, which link search models to the Fiori launchpad, allowing administrators to restrict which users can utilize specific search functionalities. These objects provide granular control over search model access, aligning with security and segregation of duties requirements. S\_ESH\_ADM is used for administrative tasks related to enterprise search, not direct model access, and RSDDLTP is not a standard SAP authorization object. By leveraging SDDLVIEW and S\_ESH\_CONN, SAP ensures that search capabilities in the Fiori launchpad are securely managed, preventing unauthorized access to sensitive data while enabling efficient search functionality for authorized users.

#### NEW QUESTION # 67

Which cloud-based SAP solution helps organizations control their data across various cloud platforms and on- premise data sources?

- A. SAP Privacy Governance
- B. SAP Data Custodian
- C. SAP Information Steward
- D. SAP Identity Access Governance

**Answer: B**

Explanation:

SAP Data Custodian is the cloud-based SAP solution designed to help organizations control their data across various cloud platforms and on-premise data sources. It provides a centralized framework for data governance, enabling organizations to monitor, manage, and secure data throughout its lifecycle, regardless of where it resides. SAP Data Custodian ensures compliance with data protection regulations by offering tools for data discovery, classification, and access control, making it ideal for hybrid environments. In contrast, SAP Identity Access Governance focuses on managing user access and permissions, SAP Information Steward is used for data quality and profiling, and SAP Privacy Governance addresses privacy compliance. SAP Data Custodian's unique capability to unify data control across diverse platforms makes it the correct choice for comprehensive data management and security.

#### NEW QUESTION # 68

.....

As is known to us, people who want to take the C\_SEC\_2405 exam include different ages, different fields and so on. It is very important for company to design the C\_SEC\_2405 exam prep suitable for all people. However, our company has achieved the
