It also covers comprehensive risk management processes, including identifying, assessing, and mitigating cybersecurity risks in line with NIS 2 requirements.</li></ul> |

## PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q16-Q21):

### NEW QUESTION # 16

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

According to scenario 2, MHospital is committed to issuing an official notification within four days of identifying an incident. Is this in compliance with the NIS 2 Directive requirements?

- A. No, the official notification should be issued within 72 hours of identifying the incident
- B. No, the official notification should be issued within 48 hours of identifying the incident
- C. Yes, the official notification should be issued within 96 hours of identifying the incident

**Answer: C**

### NEW QUESTION # 17

What is the required frequency for Member States to update the register of entities?

- A. Every two years
- B. Every year
- C. Every six months

**Answer: A**

#### NEW QUESTION # 18

What is the primary focus of cryptanalysis?

- A. To analyze and breach secure communication
- B. To develop encryption keys
- C. To safeguard data

**Answer: A**

#### NEW QUESTION # 19

What is the role of the Commission within the Union Civil Protection Mechanism regarding cybersecurity situational awareness?

- A. Coordinate international cybersecurity collaborations
- B. Provide analytical reports on diverse areas
- C. Develop cybersecurity policies for Member States

**Answer: B**

#### NEW QUESTION # 20

On which of the following critical areas does an organization focus when it promotes a culture of awareness and conducts comprehensive training sessions?

- A. Infrastructure and application security
